A sentence is started with a capital letter while a verb within it is
not. We also believe you meant to say "providing' not 'proving'

'Proving', 'You' and 'Link' should all be lower case.
'enjoy' should be capitalized.

;-} should be: ;-} (-; as many have called you two faced.

Five or six mistakes in one posting..you are certainly improving.
As proof, you didn't spell radios as radio's.

Mike:
That should help you understand why the U.S. government is so inept and incompetent. RHF was a civil "servant" (in other words, a worthless parasitic bureaucrat living off the taxpayers) for 32 years.
It further clarifies why government agencies in the USA are not so affectionately referred to as "charitable organizations providing employment for the otherwise unemployable".
Note how he still clings to and manifests the innate characteristics of all bureaucrats, viz. being a meddling, petty, obnoxious pain in the ass.

HD Radio is the ONLY solution I can come up with in order to listen to ANY AM station in my city - even the very powerful signals - while in my home office, where I spend a good deal of time. With dimmer switches, electronic air cleaners, computer, etc. etc. the noise level wipes out all signals. I have to go to another room in the house if I want to listen to AM analog. HD Radio is a blessing for me.

With so many complaining about the interference it causes on analog signals - someone please tell me which analog station(s) in the Fresno area are getting this interference. I can't locate ANY analog station with ANY interference when in a "quiet" room in my home, and there are MANY HD stations broadcasting in Fresno. I use both the CCRadio and the CCRadio-SW and just don't have that problem, or at least haven't been able to identify it.

I understand some of the complaints, but the industry isn't concerned with those who dx. In fact, I have the problem with television signals. When I moved to the Fresno area from Sacramento, I paid $1,000 for a large tv antenna installation so that I could pick up the major stations from Sacramento, about 180 miles from me. Shortly after paying $1,000, the low-powered stations started appearing all over the dial and wiped out channels 3 and 13 from Sacramento, channel 12 from Santa Barbara, channel 8 from Salinas, etc. But that's life. TV and Radio are for the masses, NOT just the few who dx as a hobby. HDTV has solved the tv problem for me as now I get channels 3 and 13 on digital tv. HD Radio solves the problem I have with too much electrical noise on AM.

No one really cares about the hobbiest. We are left out of the picture when technology changes.

- TV and Radio are for the masses,
- NOT just the few who dx as a hobby.

GA - Radio and Television : They don't call them
Mass Media for nothing -aka- Media for the Masses.

> HDTV has solved the tv problem for me as now I get channels 3 and 13
> on digital tv. HD Radio solves the problem I have with too much
> electrical noise on AM.
>

GA,

A very valid statement by an AM/MW Radio Listener about
the 'positive' side of "HD" AM/MW Radio in today's Noisy
Urban Radio Listening Environment.

I still need to take the Radi-osophy HD100 down to Oakland,
CA to try it out in an Urban Area with many Strong Local

Signals to try it out; and see what I can hear.

Up here in Twain Harte, CA - All I get is the Blinking Blue
Light and No "HD" Signal Lock.

Plus I have noticed some Digital Hash on a few of the
formerly 'clear' AM/MW Radio Signals from :
KNBR 680 kHz
KCBS 740 kHz
KGO 810 kHz

Using a CCRadioPlus+ Radio ; GE Superadio III Radio;
Grundig S350 Radio; or a Redsun RP2100 Radio; and
a Select-A-Tenna : I use to be able to Tune any of the
above SF Bay Area AM/MW Radios Stations and hear
Perfectly "Clear" Audio. Now there is always some
buzz or hiss that is part of the Sound being heard.

life exists and radio listening happens
beyond the 10 mv/m contour ~ RHF
{ where iboc 'hd' radio fears to go }
.

This sounds like the FCC needs to look at actually ENFORCING Part 15 rules,
rather than FORCING people to stop listening to whatever radio station they
wish.

BAD - Think About It . . .

How Many Part 15 'qualified' Devices did you have in
your Home 40 Years ago ? Guesstimate/Count ___

How Many Part 15 'qualified' Devices did you have in
your Home 20 Years ago ? Guesstimate/Count ___

How Many Part 15 'qualified' Devices did you have in
your Home 10 Years ago ? Guesstimate/Count ___

How Many Part 15 'qualified' Devices did you have in
your Home 5 Years ago ? Guesstimate/Count ___

How Many Part 15 'qualified' Devices did you have in
your Home 1 Year ago ? Guesstimate/Count ___

How Many Part 15 'qualified' Devices do you have in
your Home Today ? Actual Count ___

It may be that it is not Part 15 that is the Problem :
It Is The Growth of Part 15 Items That Is Saturating
The Environment That Is The Problem.

? Have You Reached Part 15 Critical Mass ?
{ Within Your Home and/or Office }

Tip {Clue} - Batteries are Not the Answer.

and that is . . . something to think about ~ RHF

How bad can he be when he has a 97.5% positive with a 5542 (as of a few minutes ago) score? Seems like at least some of the negatives were a bit undeserved. If I got something that didn't work, and got a full refund, that's NOT a negative, or a neutral, IMO, since sometimes shit happens.

Warantee, guarantee, warranty, garranty, and a couple more different spellings have been printed on the info of stuff I've bought over the years. I have no idea where people come up with all the different spellings.

"I am delighted to have available this New in the Box, top end Icom ICR-75 Short Wave Receiver complete with brand new Warentee and the DSP option fitted."

Anyone know what a "Warentee" is? British maybe?

"The receiver is still in the box, I have used my pictures of one I sold last week as an example, the one I am selling has never been out of the box, it is brand new."

But does it work?

"Shortwave is back, and sounds better than ever with the modern technology driving Icom's IC-R75 HF/50 MHz all mode base receiver"

I'm so glad that shortwave is back. I didn't even know it left.

"Buyer is responsible for all shipping fees as well as a 20% re-stocking fee."

Watch our for that restocking fee!

"accept the following payment methods:

a.. Paypal
b.. Money Orders and Cashier's Checks
c.. Western Union Transfers
d.. Checks (once cleared)
These are the ONLY methods of payment accepted"
I wonder if Martyn would accept cash.

3891. The importance of "Overvoltage Protection".

Newsgroup: rec.radio.shortwave
Date: 2007-09-11 11:26:16 UTC
From: r2000swler@hotmail.com
Message-ID: <1189509976.225913.288900@r34g2000hsd.googlegroups.com>
Source record: 123723

Yesterday afternoon my wife was using my SW gear when, as she said,
"Everything died".

She called me a little more then upset. I told her how to switch to
the backup power supply
and to reset the individual breakers to the radios. Everything came
back up.

When I got home I found my ~20 year old Lambda power supply had a
couple of shorted NPN
pass elements. (house numbered 2N3055) The on board OVP for the Lambda
is ~16.5 V, but
all of me gear has individual OVP set to 14.8V, the maximum I have
measured in a modern car.

The moral of this story is that if you use a large capacity external
DC power supply you had better
make sure you have adequate over voltage protection. I my case I have
added a heavy duty Si diode
with the anode (banded end) going to the + side so that in the even of
a reverse power application,
the diode will conduct tripping the breaker and the device will only
see about 0.7V for a few mS.
Don't laugh, in the dark at 3:00AM during a nasty thunderstorm it is
very easy to hook stuff up
backwards.

I have found this OVP module to be inexpensive and extremely effect
and very robust. When I
first built it I test one by repeated application of 120V 60Hz AC
mains then +160 DC. The unit
never even got warm and when I tested it on my lab power supply, the
trip point had not changed.
The trip point will vary a few hundredths of a volt over the temp
range of 0F to 100F.

So, because you can't hear any analog signals in your home office,
you're content to support HD, which will allow you to hear what you
want to hear while effectively wiping out everything on analog. I see.
And of course, when you leave your home office, your options will be
limited by all the familiar limitations plaguing HD.

And this sounds like a good deal to you?

Have you ever heard of internet radio? I think you'll find that it's
quite effective in your home office environment.

That's odd. I travel a fair amount and almost never find myself in a
place where the interference isn't very noticeable.

I use both the CCRadio and
> the CCRadio-SW and just don't have that problem, or at least haven't
> been able to identify it.

Don't worry. You will. Just give it a little time.

DXers may be one thin slice of the population, but the option to DX is one that many people value, whether they (currently) DX very often or not. Besides, it's only a small slice of the population who ever gets around to visiting Lake Tahoe. So, should we allow Ibiquity to turn it into a chemical dump? (It would be really, really convenient for a lot folks if we did turn it into a chemical dump, you understand. There's a whole lot of chemical waste out there...).

>
> No one really cares about the hobbiest. We are left out of the
> picture when technology changes.

I wouldn't even think of MW DX as the realm of hobbyists in the way that SW DX is. A lot of people don't even have the foggiest idea what SW is, let alone what SW DX is. Very few people in the US listen even to strong signals on SW, let alone weak ones. The situation's (very) different with MW.

Bravo Mo!

They've done a very good job keeping this a secret. To those irritated that this is off topic...Off Topic?---do we radio/shortwave enthusiasts live in a vacuum? Though those with their cars plastered with magnetic yellow ribbons don't want to hear this perhaps one day they will notice that what is happening to radio/shortwave/media/free speech etc etc is all part of "The Flat World" they are creating. And the NAFTA Superhighway is sympomatic of what is coming to trade and every thing else that we touch, see, feel, taste and, yes my dear radio guys, hear.

Yes and no. FM HD stations wipe out stations next door. AM HD
stations make gurgling noises and lack high end. You cannot listen to
an AM HD station in sync selectable sideband, so your $1,400 Drake is
less useful than it was last year. And AM HD stations wipe out 2 of
their neighbors, on each side. Lovely.

Analog doesn't allow conditional access. Digital is the first step to
all ''Pay Radio''.

No, your radios are not junk. Your analog radios will still pick up stations. The only problem is that if you have a hi-fi radio (like a Tivoli Model 1 or something similar), the local AM stations will sound like junk (clipping and "hissy") and distant stations will be blotted out by the IBOC sideband hash.

If you're listening on a pocket radio, however....you may not notice anything.

With FM stations, the local stations' sound isn't affected, but their IBOC sidebands will still block out first-adjacent out-of-town signals.

That's the village idiot, unable to live up to community standards
by quoting what he's replying to, unable to actually be on topic, in
the threads he's replying to or even to the point of this newsgroup.

He uses this newsgroup as a substitute for a life. If he was actually
doing things and interracting with people, then he wouldn't have to spew
this newsgroup with his junk. At the very least, if he found newsgroups
where his drivel belonged, he wouldn't have to spew this newsgroup with
his junk.

There is absolutely no reason to be asking about him, because his
being gone from this newsgroup is not one bit of a loss.

[stuff deleted]

You do realize, since you posted about "netiquette" you must have
read the stuff, that you are now technically spamming?

You are now cluttering up this newsgroup with advertising to another
space, that "google group". The only purpose of your post is
to direct attention to that "google group". You are not adding
to the discussion here, since you aren't actually really saying
anything in these posts.

Plus your long pasted in bit about those other groups is
at the very least repetitive, and thus qualifies as spam.

Note that a signature block is properly defined so it
is recognized by real newsreader software as a signature
and then when people reply with a proper newsreader, the signature
disappears. SOme of your recent nonsense has had the same
material included three times, as people aren't snipping the
quoted material.

But there are also community standards about the length of a
signature, and you don't fit those standards, even if your
"signature" was properly defined as a legit signature.

The good news is that it appears we can get someone's google
account cancelled for abuse of this newsgroup. And you've
set yourself up for not only lots of abuse reports, but
you keep blundering away with your abuse, making the case
real easy.

Again, what we value as a small group just doesn't matter to the masses. I am disappointed that DISH NETWORK and DIRECT TV are not allowed, by law, to sell me a package with out-of-town stations without my local stations agreeing, which they won't. I can spend $1,000 for a large tv antenna installation and pick up many out-of-town stations, but I can't subscribe to get those SAME stations on satellite. The reason -- the industry does NOT want me (or anyone else) watching out-of-town stations because that means I am not watching the local stations with local commercials. I tried getting waivers from the local stations and every one of them refused.

I have been both a radio and tv dxer for over 50 years and know the fun and excitement this hobby has given me. MOST tv dxing is done on channels 2 through 6. In 2009, looks like that hobby will be history.

YOu see that all the time with AM broadcast radio. When the local
station dropped Art Bell some years back, moving to an all-news
format, one local columnist lamented that it was the end of Art
Bell.

But one station in Vermont carried it. And it's really easy to receive
that New York station at 770KHz that carried the show, along with all
kind of other stations up and down the dial.

Yet people never tuned up and down that dial, assuming that they'd not
be able to receive anything. And yes, that's what the local stations
want, because they want the listenership to their ads.

Oddly, a station like WBZ out of Boston even makes an issue of this.
I don't know about them lately, their reception here has been curtailed
by a more local station on an adjacent frequency, but at one point
they acknowledged that most overnight radio was syndicated, and basically
the same syndicated show, but they were live, and they covered a really
big area. The overnight announcers, maybe even the bumpers, made a point
of mention that there were listeners in faraway places.

And I treated it like a local talk show. There were some obvious differences
in what was discussed, but it came booming in here and except for the
fading, was strong enough to be local. I initially started listening
to WBZ overnight when there wasn't something of interest on the local
stations at that time (too much syndicated talk shows, and at one
point one station was airing repeats of programming from the daytime),
but for a number of years I was pretty much listening to WBZ overnight.

There are two groups who "own" iBiquity.

The first, the private capital investors, expect a return on capital. But they do not always expect instant returns in the form of dividends, etc., or the same sector would not invest in startups, genetic research, biomed companies, etc. They expect that, after a number of years, they can either take the company public or sell to a larger company. These private equity investors are, by definition, NOT public entities.

The broadcast investors, in my experience, invested to insure a single technology would be developed, avoiding the multi-technology disputes that surrounded the AM stereo debacle. They also wanted a single system for AM and FM, hoping the developed technology might help "drag up" AM before it became totally unviable. One can almost look at the radio company investments as if they were donations or seed capital; no radio company is expecting a return on these relatively small investments that are, I believe, all less than $10 million each.

3909. HD and September 14

Newsgroup: rec.radio.shortwave

The sad fact is that the current version of HD radio will live on for quite a few years.

Its death, if at all, will be long and miserable and create interference havoc far into the future unless average people like you and me are vocal enough to quicken it's demise, if that's even possible.

That inept government agency that is charged with governing the broadcast airwaves has essentially sold the airwaves to a corporate entity and probably find some way of allowing it to continue in the so-called interest of the public.

Since the public doesn't even know what's happening to their airwaves it's unlikely there will be enough public interest to make a difference.

Unfortunately, it will be a problem that will be with us for a long time.

MB,

KGO-AM on 810 kHz makes it a point with their
Over-Night Talk-Radio Call-in Show to take Callers
from all over the West Coast from San Diego to Alaska.

IMHO - KGO is what every 50 KW "Clear-Channel"
AM/MW Radio Station should be :
* Regional Coverage and Programming to Match
* Original Local Hosts and Programming
* No Syndication Allowed
Resulting in 100 Distinct Radio Voices Across the Nation

~ RHF
.

Of course, but KGO does NOT want people living in San Francisco to be listening to an out-of-town station. KMJ in Fresno also makes a point of having listeners from all over the West Coast, but KMJ does NOT want listeners IN Fresno to be listening to KGO or any other out-of-town station. All the stations love people to be listening from out of town, but NONE of the stations want people in their city to be listening to out-of-town stations.

Same with TV. KGO-7 in San Francisco loved it when I told one of their engineers that I was getting their signal in Clovis (Fresno). They even offered to send me a gift (forgot what, but I think it was a t-shirt) if I would tape it and send it to them. But do you think KGO-7 would give someone in San Francisco a waiver so they could get the KABC from Los Angeles on Dish Network?

It's a one-way deal with these stations.

Again, the original poster should produce the evidence that IBiquity
is having financial problems. Makes me think whoever is posting as
RFBurns has another agenda. Maybe he has an interest in one of the
third tier competitor companies. Or he's some hack journalist.

I notice he has not responded again under that name.

3920. Michael Black - So In Your 'Opinion' Posting Shortwave Listener's Radio Reception Reports are Off-Topic and "SPAM"

Again, having the option to DX matters to many people in much the way
that having the option to one day visit Lake Tahoe does. So, the
"masses: aren't the problem. The problem is companies like Ibiquity
that will gladly destroy a big swath of the spectrum in order to turn
a quick profit.

The only good news is that it will be a quick and shortlived profit,
as the business model of HD (or at any rate HD AM) is laughable.

IBOC,

FM "HD" Radio Is ALIVE And Growing !

FM "HD" Radio does 'fit' into the FM Radio Band Plan
and not change FM Radio Listening habbits very much.

Plus it will give FM "HD" Radio Listeners more Listening
'Options' and better Quality Radio Listening overall.

AM/MW "HD" Radio is another Story and may in-fact
have a short life -but- Only Time Will Tell !

~ RHF

The public doesn't know what's happening to their airwaves, but when
enough people stop listening to AM to make it commercially viable,
you'll see plenty of change and you'll see it real quick. And if
anything HD AM will just accelerate the process.

"I hate to blow your cover but our "Crush the Buzz" group's meeting in the Winnebago sitting at the border crossing clearly elected you as our leader. I have the minutes of the meeting somewhere. I thought the visit by Homeland Security was fun and enjoyed our temporary notoriety as terrorists. I suspect we were reported by a member of the other side in hopes we'd be sent to Guantanamo and silenced."

"I think we all have to understand that those who work for IBUZ excited companies risk their jobs if they post things that disagree with the official policy of the company. The company involved clearly is enamored of the system and I wouldn't expect any engineer within it to put anything negative in writing and not expect something pink to appear in his pay envelope. I have a feeling that the same situation might exist in Canada. It's not limited to engineering. It's even more dangerous when the company is a major investor in the system."

"I found it very interesting that someone in a recent trade publication suggested stations that interfere might be willing to alter their nighttime patterns. The examples given were WJR, Detroit, and WABC, New York. As a former ABC employee who remembers the long and heated battle between WABC and KOB, Albuquerque, over clear channel dominance on 770, I see that as the remotest of options. Unless, of course, Citadel doesn't care. For stations at that distance the issue was more one of being on a par with CBS and NBC, each of which had a clear channel flagship. WJR is much closer."

"I agree with the engineer from the dark side that there won't be an Armageddon on the AM band on September 14. It'll happen in isolated but very visible places. For a long time I've advocated nighttime operation at the early stage before there were many stations operating so we could get a handle on where the problems might be and how they might be fixed. The Grand High Poobah engineer of a large company assures us that his company will shut IBUZ down if any of its stations causes interference. Given no evidence to the contrary I expect he'll keep his word. I expect that, when the first interference call comes in, any one of their former clear channel blowtorches will shut it down within minutes."

"I have faith in the concept of good engineering practice. Have I mentioned I still have some spiffy bridges for sale?"

RHF (rhf-newsgroups@pacbell.net) writes:
> Michael Black - So In Your 'Opinion' Posting Shortwave Listener's
> Radio Reception Reports are Off-Topic and "SPAM"
>
No bozo, the issue is that there's no report here. You have
nothing valid to say, you are merely pointing to something somewhere
else. We do not need to see such junk posts on a regular basis.

If you were actually posting a reception report here, without
all that junk pointing to elsewhere, then I wouldn't say a thing.

A proper reception report includes far more details. Your single
line "report" wouldn't get you a QSL from any station, since
there's nothing to suggest you actually did receive it, and nothing
about signal strength or the other things that a station might
be interested in hearin about. (I should point out that reception
reports were not merely about scoring QSL cards, at least not
in the early days. They were a means for a transmitting station
to get feedback, about the quality of their transmission and
the extent of their reception area.)

But you aren't. You're posting something with the intent of pointing
elsewhere.

You've decided you can fix up this newsgroup, but you can't because
you continue to blunder.

You've decided that it needs "on topic" posts, but all you
are posting is filler, nothing important in itself.

Like I said months ago, you've picked up the worst habits of
bad posters, and think they will fix the newsgroup.

I'm certain by now everyone has seen your pointers to elsewhere.
There is no reason to clutter up the newsgroup some more with
what amount to empty posts.

Note that if you're advertising something, like those other
"groups", community standards allow for a pointer in the
signature. But you can't even conjure up a proper signature
line. And even then, you would need to be posting something
that adds to the existing discussion, not merely posting so
people might see your signature.

I want you to live up to community standards, and that's
why I'm picking apart your posts. You are still
pathalogically changing the subject headers.

Start living up to community standards, including proper formation of sentences with only the usual amount of punctuation marks, and quoting only which you are specifically replying to, and keeping subject headers constant, and not posting empty posts, and quoting properly (you are now, or maybe continue to quote badly, so it's not really clear at what point your post starts and the bit you are quoting ends.

Once you live up to those community standards, it would be far easier to understand what you are saying. And then we can decide whether or not you have any value here or not.

And finally, if everyone is ignoring you, then what's the point of posting your junk?

Michael

Not sure I read conspiracy into that, maybe you can explain where you see one.

Rfburns is simply a fool spouting off unsupported nonsense about the financial condition of iBiquity. We can argue about whether HD is worth going out of ones way to listen to. To me it is about as unappealing as satellite radio. But there are more than a few radio stations adding those channels and switching programming over, so it is achieving some level of success.

>
> Could RF Burns and IBOC Crock are Part of a Capitalist Cabal

Naw, it's just the usual group of clowns on rec.radio.shortwave whining on and on about why HD radio is bad. But that's about all it is - just vague whining and lots of unsupported allegations. If they could come up with some solid reasons why it won't be a commercial success and attract listeners I'm sure that would be interesting reading.

Whether there is enough demand to make HD radio a commercial success is anyones guess at this point. It may end up like satellite radio and never generate enough listeners to break even. Somehow HD radio will have to come up with unique programming to draw listeners away from traditional radio programming. Satellite radio failed with tricks like Howard Stern and they are hemmoraging red ink because of those multi-million dollar contracts. Who knows - maybe extended BBC programming will draw listeners to HD radio.

The fundamental problem faced by any new mode of radio transmission is that there is a huge reluctance on the part of listeners to add the required new hardware and subscribe as in the case of satellite radio. HD and satellite radio could overcome that reluctance with a set of programming that is interesting and different. So far they haven't made their case.

Your old radios will still work; the high-definition (HD) signal that's currently in use is compatible with good old-fashioned AM receivers. This is because the digital information is placed (in frequency) above and below the analog signal. There are couple of HD stations here in the Washington DC area, and on any AM receiver I've used so far, including my antique tube radios, this digital "hash" has not bleed through to the audio stages. When accurately tuned to an HD station, the voice and music sound just as it always has.

The Ibiquity website has information on how this all works, and at one time, you could download a couple of conference papers describing how the HD signal is formatted. Go to the following link and start fishing around:

http://www.ibiquity.com/hd_radio/hdradio_how_does_it_work

There's concern that HD signals cause interference because the digital information is placed in what are often referred to as "guard bands," essentially the blank space on the dial between local stations. Indeed, when you tune across an HD signal you hear hash, then clean audio, then hash again. Consequently, to date the FCC has only allowed HD signal to be broadcast during daytime when AM radio signals travel shorter distances. However, this restriction may have been lifted recently. Perhaps other posters can comment on this.

Personally, I'm indifferent as whether HD radio is here to stay or ultimately proves to be a wash. If it does gain a foothold, and the public enthusiastically buys new receivers to hear it, then it could breathe new life back into AM radio, which has been moribund for years. Right now, I'm not inclined to cough up $200 for a new AM radio, but if the price were a third of that, I might be interested.

Finally, if HD radio becomes a permanent presence on the AM band, I imagine it will be decades before a completely digital version is adopted, if at all. AM broadcasting has been with us since 1922 and there are millions of analog-only receivers out there. I therefore imagine broadcasters much favor the current backward-compatible HD format, because adopting it won't mean shutting out entire audiences.

I again, beg Humanity to speak in opposition to Amerika
in the defense of our innocent forsaken dying lives. CBC
producers know the bushmob did 911 but lie with propaganda

to kill our families for the ungodly as thieving neocon enemies. They refuse to inform ourselves that Al-Qaida is General Mahmoud Ahmad, as according to the FBI. Or that video of iron flowing like water from the WTC towers exists indicating without doubt, the bushmob enemies did 911 as TRAITORS.

http://youtube.com/results?search_query=%22hadji+girl%22&search=Search

/ / "as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.] \ \

Instead, we as humanity suffer with yet to be hunted demons who sing in joy while laughing and cheering over the murder of our innocent children. God, I beg you to only listen to these naked demons on video, then join me in calling for Justice as Life Wills. The company Aegis has been found killing innocent people for money from America, and Americans speak near nothing for our defenses as their very own sons and daughters die in total contempt.

So never lose sight that TV news personalities hold an unwavering Public commitment to answer our calls for liberty with murder, as the enslavement of Your dying rights, through willfully committing criminal acts in our demonized innocent name is real. Johnny Wizard needs his own international live radio program to take open line communications.

Nationless bushites who blindly war Life as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

I AM AMERICA

Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected traitor neocon. I AM AMERICA.

America MUST demand war crime trials for the propaganda CNN broadcast "Anvil of God" regarding the demonic actions of Bravo company. They forgot to tell America importantly, nazi forces forbade the population from leaving, gunning originally for everyone between 15 to 55, but sided instead to murder infants and the elderly too, when beginning the Zarqawi campaign by bombing hospitals as first strike targets. As such, the bushite murdered many good doctors and nurses - so all to send bushite snipers on hospital near rooftops gunning for every seriously injured woman and child who tried to get

help from the Humans. While driving down residential streets, grenading every home of humans being. Remember that when you hear these dishonorable bushite thieves die rightly for god and country.

[Sideline: It's been thought the reason why rescue efforts in New Orleans were provably sabotaged by Rove, was an attempt to make the blue state red.]

See?.. women and children, who the enemy bushite forbade to leave the city with their innocent families, who, as were all living in the entire city of mosques conveniently found labeled therefore by bushite, "Insurgents" (or did leave earlier, and had our innocent families reportedly indiscriminately murdered two miles or so down the road by the most evil war crime act of recorded history.)

Importantly, there was no evidence made awared of that legitimately offered PUBLICLY, from the UN or the U.S. to indicate a refugee camp anywhere, but for maybe a small group photographed - then some belligerent bushite bogus pocus - all headed up by a blatant traitor to America named Sattler. Reminder: after the indiscriminate carnage, they couldn't find near anyone for weeks who would take money offered to any citizen freely who survived for their satanic benefactor. So insanely disturbing as ungodly evil doing, war criminal Sattler called a halt to giving out charitable considerations from Americans to the unseen surviving victims - all in an 'escape' attempt to make it look better for US, the paying audience. So, where did our stolen values go to then eh? (Sattler's pocket no doubt.)

http://www.esterrepublic.com/Archives/djamail9.html

/ / "With no medical supplies, people died from their wounds. Everyone in the street was a target for the Americans.

The US also deployed incendiary weapons, including white phosphorous. "Usually we keep the gloves on," Captain Erik Krivda said, but "for this operation, we took the gloves off". By the end of operations, the city lay in ruins. Falluja's compensation commissioner has reported that 36,000 of the city's 50,000 homes were destroyed, along with 60 schools and 65 mosques and shrines. \ \

So Remember: Bushite grunts told the world they wouldn't let anyone out of the city, because [enemy Sattler LIED] pro-bushite Zarqawi was there present, so the innocent families who believed they had nothing to fear from the liar disciples of the ungodly enemy of ALL HUMAN LIVES, remained in the tiny city to be indiscriminately 'protected' with more than nine two thousand pound bombs, or made dead instead by

heinous pro-bush escaping war criminals who used white phosphorous on civilization. All to die our Humanity for the thieved loss of evidence to demand ourselves of some official freedom time to deal with our terrorized as suffering reality.

True Tyranny - to continue as an American refusing to publicly demand torture, theft, and murder as unexceptable when battlin' evil for your dying freedoms.. Evidence we must pursue on 911 to know really what the heavens Johnny 'The Law Man' is talking about still. Justice to the bushwhacker neocon soldier, a foreigner who apparently speaks no defense for innocent Americans dying sacrificed as conned for the ill stolen gains of the 911 trifecta. Justice to the lying enemies of freedom for America in Christ. Justice for YOU.

http://www.cageprisoners.com/articles.php?id=21621

/ / the following crimes had taken place at Abu Ghraib: urinating on detainees, jumping on a detainee's wounded leg, pouring phosphoric acid on detainees, sodomizing detainees with a baton, and tying ropes to the detainees' legs or penises and dragging them across the floor.

The hooded prisoner shown in one of the public photos standing on a box with electrical wires connected to various parts of his body stated in an interview after his release that the wires were live and electric shocks were applied many times. \ \

What Freedom do bushite war the innocent for to rape, pillage,
and murder as blind neocon followers of the 'lawless' demon

antichrist? Eh?

"Al-Qaida" = "General Mahmoud Ahmad"

CBC, CNN, FOXNEWS, the Zionists, purposefully work to LIE to the dying American Marine, that the ungodly bushite wars to escape the 911 perpetrators hold some hidden benefit, as the TREASONOUS neocon thieves freely rob from both undefended American and Iraqi citizens, The neoconner, Mr. Bush closed criminal investigations on 911 immediately after the event occurring, while Billions are stolen through 'ear marks' and TVed Americans have no care known to speak of.

Done with American tax paid for rapists, torturers, and terrorists like Aegis who dress up as al-Qaida to murder godly lovers of Justice. CNN, CBC, and FOXNEWS would rather kill the Marine, than teach them where to aim their weaponry of liberation.

CNN, CBC, and FOXNEWS speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED if God were Loved by America, or that the man or woman on the street would financially support my rise by popular command. Would you leave me to know, I will be left without a home to rest, or food to feed my hunger? Would an American?, I ask all Peoples of Earth to witness the American's contempt for Our worthy lives. Sattler ordered the murder of more than 200,000 innocent people in Fallujah, and they speak nothing but lies on how such demonic behaviors are godly as just ignored. Our Lives forsaken, as they hold their very own to die sacrificed for the unelected neocon. I AM AMERICA.

Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

CBC National News producers must be tried for treason, CBC reported that the Taliban banned girls from school, and women from work. LIES. I want the death sentence returned to Canada, to have executed Brian Stewart for his boastful true contempt for the lives of Canadian soldiers, who he LIES to, to have them die as assisting the escape of the zionist bushmob, by supporting fundamentalist dope pushing savages. Death to the documented liars of the zionist neocon, death to those who indiscriminately murder our species for a stolen nickel.

Johnny America Speaks Out

"what's this freedom war against Life for again"?

Hannity is a perfect example of what a neocon is. It's a one way communications system. He tells us what we think, and he'll never takes our calls, they won't read our emails, and they'll continue to pretend WE don't exist. AND... when WE die, they'll be richer for it. AND you'll be dead, your innocent brother will be dead, your innocent child will be dead. No evidence against an accused is US being truly abused. George Walker Bush is Guilty for 911, while every irrational bushite is a traitor to the American Family.

ABCNEWS.com : FBI Called off Terror Investigations

THERE ARE certain principles that we would all agree to publicly speaking. There are criminals who don't like these ideas, but they ain't going to speak out against us. Example 'I don't want to be held accountable to the American public, cause I want to steal that 16 billion dollars for myself. That's my public opinion.' What are we going to do but defend ourselves of deathly lawless tyranny, eventually. Or, you won't by DECIDING not to decide. Support our rise as the top cop of Humanity, coming down for diplomatic talks to engage the flagrant wanton stupidity of the bushite grunters. All on hopes you'll consider also, these Kingly texts worth a couple hedge funder salaries, a sixty cent barrel of oil marked up to 74 dollars, or a thousandth of the money America would save in a year, if you adopted Canadian Health care systems overnight for yourself to immediately provide all People the respect for life we deserve. Or don't, and needlessly continue to pay twice as much, while dying broke as self made losers without a cause worth preserving. A free market open to waste for profit what more could we ask for? Death to the bushite.

UN's Admission: Lebanon Was Right All Along
http://www.globalresearch.ca/index.php?context=viewArticle&code=COO20070816&articleId=6568

/ / Last month its cartographers quietly admitted that Lebanon
is right in claiming sovereignty over a small fertile area
known as the Shebaa Farms, still occupied by Israel. Israel
argues that the territory is Syrian and will be returned in
future peace talks with Damascus, even though Syria backs
Lebanon's position. The UN's admission has been mostly
ignored by the international media. \ \

Nazi zionists gave US Jews a bad rap again I see. They're
despicable criminal savages the neocon.. who steal the rights
and privileges of US peopled folks, all to fall victimized
with their self confessed contempt for love and justice.
Condi's crew dropped seven million land mines to murder
ourselves for generations, and, shouldn't she and the neocons
responsible be put to death for such conducts?? If not then,
when? discuss.. They openly target innocent human beings
indiscriminately without apology, but excuses that don't hold
water. Not that corporate news professionals are even
pouring! It's most definitely the re-occurring true story of
a censored mankind with You as it's innocent victim. For,
what human would support victimizing others for the tyranny of
blind terror? Only bushite amerika would fall silent under
such self contempt for our constitutions.

/ / [..]Israeli "Defense" Force (IDF) has announced that it
will discontinue its practice of "capturing" populated
Palestinian villages during military training exercises. The
IDF states it will "reexamine their policy" of conducting

such raids on uninformed, panic-stricken Palestinian villages. \ \

Tell me, is this the godly people the neocon boast of for defense in? Or, just again examples of standing terrorism against life ourselves - committed by the censored as will giving, sacrificing American payer? Justice is Freedom.

Do you care to buy the bushite lies, when they commit openly the very same terrorist acts they say we should all be outraged against? Somalia is a case to point. They murder helpless people as bushite, then say they'll remain dying to thieve further as enemies to Humans being. It doesn't fool me, but perhaps it does you. A neocon soldier murders innocent Iraqis, while selling you they are all there risking their lives to bring freedom. So, they die. For lies. Die. Again, KNOWN Aegis goons openly commit crimes against Iraq done officially to get killed! the supposed to be Patriot Marine. P2OG. Soldiers under bushite command would rather die cowardly, than to honorably demand the bushmob's arrest for public trials as defeating ungodly fascist war criminals.

Why suffer otherwise this way under the tyrannies of naked neocon plunder to deny our lives for measured justice I ask YOU again, please believe: truth will set us free.

Al-Qaida = General Mahmoud Ahmad = ungodly bushite liars

I can't understand why you can't help get this party up as starting by supporting our rise to highest acclaim with my authority free willed to anyone. Let's face it, we're great because Your great. However, for greed, corporate america aren't taking our concerns nightly. We want Justice, and WE will get it if we reflect together with impeccable credentials as standing with measured reason for proper assessment on rights making might. Who is who here, a freeing peoples I tell you, arriving to bring a true patriotism to Life for US. Are you with yourself as respected an equal under the law devised fairly for all concerned parties?.. well then... let's g o ! ! !

be Great!,
for here comes the mighty,

Johnny America - make way! make way!

-

Footage of Israeli Soldiers Beating Palestinian Children
http://www.uruknet.de/?p=m35516&hd=&size=1&l=e

-

Where is the Evidence?

How so can all of Iranian Military Officers be
"terrorists", while lawless bushite bomb defenseless
innocent peoples indiscriminately routinely, with
praises from the actual demon antichrist responsible
personally for 911 I want to know. NOW. Kill a bushite
THIEF for American Freedom why don't You victimized
Peoples of Earth? A bushite kills bushite for stolen
nickels. Examples: Aegis, Condi's land-mines, fixed
elections, torturing. driving over children, blahblahblah..

Al-Qaida = General Mahmoud Ahmad = ungodly bushite liars

/ / Or, instead, maybe you'll idly watch some innocent person
willfully be sent to prison by liars in your demonized name,
to defend the ungodly evils of war criminal traitor, our Mr.
Bush Jr. in foolish disguises. Your call Bud. \ \

bushite talk about random killing of godly persons
http://www.youtube.com/watch?v=OHvtIL_TRGE

"You can basically kill anyone you want"

/ / Just a "few bad apples"? I don't think so, this is much
more widespread from what those soldiers were saying, and
SANCTIONED. \ \

Look, a bushite would kill an American child too. When or
will Americans become American? Death to the bushite, death
to the enemies of Man. Again, national bushite broadcaster,
George Norry stated he'd go ballistic against any American
soldier who refused to murder for the neocon as traitors, and
"America" STILL refuses to speak in their own defense for
dying. Death to the bushite, death to the enemies of Freedom
for America.

/ / "as the bullets began to fly, the blood sprayed from
between her eyes, and then I laughed maniacally." [, then were
heard the cheers of godless bushite dumfuk traitors obscening
to God and Man as the unholy enemy.] \ \

http://youtube.com/results?search_query=%22hadji+girl%22&search=Search

Look, listen to soldiers who sing about the joys of murdering
innocent young girls, see their faces in the videos
celebrating the murder of girls LOVED by GOD and ME, and
question: Why won't you as an American assist Christ in the
glorious hunt. Nothing better in this world than to bill a
murderous bushite who claims it's lawless to this suffering
Universe, ruled criminally by the demon antichrist enemy of
ALL HUMAN LIVES. All religions want US to defend GOD - please
help me take on all challengers. We want a fight to death
with that dishonorable pro child killer bush bitch nazi
"Marine" in a cage match to earn world title of greatest
fighters. Pump it up, Johnny's coming Home to end the reign
of bushite tyranny by taking on demonic enemies of Our
children, me, or US. Death to the bushite, death to the
enemies of GOD. I promise to put on one hell of a good show.
HELP ME!

-

I'm a Good Man
"Al-Qaida" = "General Mahmoud Ahmad"

Why will you not as a member of Humanity, make the call
to the Coast to Coast radio network of demon evil nazi
savages who deny your legitimate concern be addressed freely?
Hate God and Love do you? Couldn't care less could you
for the giving lives of ignorant Americans as an American?
George Norry isn't as stupid as he wishes you believe him
to be, when he supports lawless carnage against the
innocent, to help escape those truly responsible for 911.

26,000 total Tickets sold - 14,302 votes tabulated
http://disc.server.com/discussion.cgi?id=149495;article=112801;show_parent=1

/ / Now think about that for a minute. 26,000 people purchase tickets
to go to a Straw Poll event, and yet we are to believe that 12,000 of
those people couldnt even care less about the voting part? Just what
were they there for? I don't buy it. This is not believable. An
Investigation is needed here. \ \

I said that years ago, but the bushmob isn't listening, because,
hey, happy George Norry don't care, and CBC, CNN, and FOXNEWS
isn't taking our calls either man.

American soldier: Your enemy is TRULY LIAR happy George Norry.
The demon knows of Ahmad, and forbids any guest from uttering
such understandings in defense of the DYING dumfuk grunt nazi -

Good riddance? Do you care that your country men are dying for the criminal zionist neocon as traitors? Support my demand for US to be heard GOD DAMN YOU. ...or die.

-

Bush "Iran has openly declared that it seeks nuclear weapons." www.thecarpetbaggerreport.com/archives/12477.html

Look, CNN, CBC, and FOXNEWS, who know the bushmob did 911, is saying nothing further! The demon enemy will LIE America into another war against GOD, and they'll only give you a happy wave off to see Your child die for the zionist neocon.

-

Pro-mass murderer war criminal Kristol once again, speaking freely to Jon Stewart unchallenged internationally on Our TVs as "Two Jews" stated..

"We don't believe in original sin."

Colbert half an hour later, "Are you calling Jesus a liar?"

Now, that's funny..

See? Jon Stewart isn't Jewish, for he's not black, and he speaks no words in defense of the innocent robbed and murdered in his "Jewish" name. A Zionist! He wants to sound our public voice silent where a Hitler or Kristol marches innocent others into gas chambers by calling ourselves terrorists without a thread of evidence to thieve from as unworthy. Few know, Hitler was a staunch Zionist too. The excuse would be, but G-D is worse.. because, as the "Two [atheist] Jews", they can commit no sin against Christ by trumpeting demon evil lies as if, we have no stronger indivisible arguments present in OUR defense ever for Just causes. AND, he's near the best our American national TV media has to offer!

Did you see Jon Stewart whore himself to Albright TOO!, the physco nazi witch who holds no regret in the murder of more than 500,000 CHILDREN? I believe, Jon Stewart suffers from the ignorance of Celebrity more so, than a genuine hatred for Humanity.. as that is the fault of most TVed Americans. Nothing more greater than getting on the boob tube, to really make your mark on this fleeting world as they sell their life away for nothing but the privilege to be recognized at a gala swarray.. fed on the victimized innocent of Humanity left robbed as worthless their grand stage. His show is often quite bright however, and leastly, reminds people, that CNN, CBC, and FOXNEWS isn't the be all and end all of respect for US caring viewers.

but looksee.. EVIL is real though -

THINK of how Truly evil a person would be to lie for CNN
on this issue.. a "Jew"? would do this?..
A "Jew"?

/ / The inflammatory words MEMRI blasted the US media with
were when the young caller "Sanable" was supposed to have said
"we will annihilate the Jews" were not even mentioned by the
caller or by anyone else in that clip. \ \

SEE! A ZIONIST SAID, "we will annihilate the Jews"

http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=25994

/ / When hundreds of millions are calling for the
extermination of the Jews of Israel this is more than a lie;
it is a blood libel. \ \ This is like satanic neo-nazi EVIL no?

No? eh... No? eh?eh?eh? ... no? huh? heh. No?. huh..

See? Zionists are nazi betrayers to GOD ALMIGHTLY, for they
believe we do not have any power great being Loving for
others. You WILL see how GREAT we destroy the bushite, then
you'll know what joy love for god as innocence is. And then
You'll know for sure, how WE truly are as Just and Free.
And, kinda scary Being all godly and such..

I am,

Johnny Wizard

-

The "Shock and Awe" Gallery
http://www.marchforjustice.com/shock&awe.php

Demon evil enemy neocon George Norry is a naked traitor to History:

"..Show me proof that there are real demons"

You, George Norry are a demon because you purposefully
broadcast to my America the need for neoconned soldiers to die
for the lawless demon antichrist, knowing full well, you work
'happy' to escape the 911 perpetrators of American
Wrath, like General Ahmad, with your truly evil demonism about
Life, and betrayal to freedom for US humans.. George Norry is
'the evil spirits' he says you can never find. Evidence.

What?

There is no found honor in a thiefs paradise of neocon plunder
my friends, no honor.

-

Elected Governments All Over The World

British MP Galloway and Richard Perle on TV together!!
http://youtube.com/watch?v=nu4GBnxi3wc

Galloway "These are the people who have overthrown elected governments all over the world. and he [Richard Perle] comes on your program to prattle about democracy. These people don't want democracy, they want slave governments. If it's a slave dictatorship - that's fine. If it's a slave elected government - that's also fine. The only thing that matters is that the government is a slave government. That is why they will never invade Egypt. They will never invade Saudi Arabia. They only invade countries, or threaten to invade countries, who stand against them and who refuse to be slaves to them. That is why they hated Iraq, that's why they hate Iran. That is why they hate Syria. Of all the faults of all the three regimes in these three countries - they were never slaves to the United States, and that's why they were attacked. [...^] In Iran, 17 million people voted for the president, Ahmadinejad, and 10 million voted for his opponent Rafsanjani. Those 27 million are determined to exercise their right to nuclear power. The response of Bush and Perle is to threaten them with invasion. These are the people who murdered Salvador Allende, the elected president of Chile. These are the people who have overthrown elected governments all over the world."

http://www.thetruthaboutgeorge.com/

Perl of wisdum 'yeah so? Peenackers steal the rights of freedom from people for stolen profits - we rob Americans of their freedom, as is their pocket books, and their wasted effort, all easily conned to be sacrificed for death by false conclusions trumped up by a naked false accuser who will accuse yous lost blindly as the innocent sucker - er.. I mean suckers, Your Mr. Bush Jr., is a demon evil whos attack is not televised for defending yourselves over. Truth and Justice, we own. See?, peenackers are filthy rich from conning your, given life away, right before your eyes. What are we going to do about what is given, bust the bad guys for blatant treason against Cops and the Universe? I mean really.'

The Iraq War Exposed
http://www.netctr.com/iraqwar.html

Neocons are frankly, just dumb don't you know. Don't forget though, their unwavering Public commitment to answer with murder as enslavement of Your rights, through committing criminal acts in our demonized innocent name is real. Johnny Wizard needs his own international live radio program. Any others of all knowing sentience as wisdom being smarter than whoever, even willing to start too a conversation over these matters of justice for freedom ad-infinitum!?

What?

-

WeAreChange.org

Have you seen this research yet? Quite astounding the ability
of Americans committed to working for good. It's too bad we
don't have like organizations world wide, committed to gathering
important info to serve the interests of the public body.
Someone should buy out CNN with the facts to save the lives
of our country mens. Or, we don't, and more needlessly die for
their personal contempt for the value of YOUR '"poor'" life.

-

911 Leaders Saying They Are Jesus
http://rss.nfowars.net/20070802_Thu_Alex.mp3

Jason Bermas "I just want to let people know, that if this is
a hit piece that involves, you know, saying that we're all
blaming the Jews, or the Zionists, or something ridiculous,
where we go after an ethnic group, [Jason Bermas suggests
"Jews" = "Zionists"?] 'we' can not be associated with
ANTI-SEMITISM, space beams, utter kookery.

Alex Jones "Or Jesus! they have 911 leaders saying they are
Jesus now. They have people saying it's space beams from
Pluto. And folks, I've tracked these people, they all were
formally in intelligence, or connected to the Bushes, the
space beam thing came from a almost cabinet member level Bush
member, and folks this is a setup to poison our movement."

Now??

I've given my phone number several times to Alex Jones, of
which he's not as of yet, invited me on as official guest, for
fears he can find no arguments against US I presume. 911
financier Ahmad = al Qaida, and we have molten iron on video
flowing like water. Demon Bush Jr. gave US zero, while
closing criminal investigations immediately after the
terrorist offense of no questions!, no questions! Case
closed. But no, the American media rarely if never mention
these facts, while insisting Bush's deathly war criminalling
is as only a puppet, look away! look away!, leaving without
challenge on the, teen like naivety of wearechange.org's
consistence that "we", who demand justice for 911, who might
also hold the opinion that zionist behavior does not blindly
equal being Jewish, should not be allowed to speak Justly for
our public challenge, because bushite Amerika has no defense
for censorship against ANY of our judicial wanting, as
documented positions on behalf of the suffering to death
victimized public. Why? Because we are Just. Well, I try to
be anyway. (I've spoken as written for YEARS, with NO ONE

WORLD WIDE countering in the public realm, but for the strangely odd insult. Bushite do exist, don't get god wrong, but dumb evil bushite brood in darkness with censorship like all zionists do, selling to be 'godly' honorable men, when in truth, they'd murder anyone of US for a stolen nickel given to a neocon. I, as open line talk radio producer, win every time, always, forever, never fail. [er.. yet..] Why? Because I treat YOU fairly. America should do the same. We are all in this together. Zionists like robbing then killing defenseless innocent Christians, and Jews, while just lying that they don't without scened factual TV perception. Demon 911 WITCH, zionist Condi 'okayed' the dropping of more than SEVEN MILLION land-mines on Lebanon, purposefully done to indiscriminately murder ourselves for generations. Jason might foolishly call you an "anti-Semite" in fear for speaking such not understood truths. And importantly, not because they can publicly disagree so in open debate, so sides to not allow US to rise in acknowledgement to bring about Justice as demanded, for ALL as ANY. (Gee, who's the neocon now eh? (we're all sinners.))

If Americans really want 911 Justice:

Help US out by putting the video of molten iron flowing like water out there in the minds of any who have doubts, tell them hypno mugger Bush, gave US zero to substantiate his public falsehoods, and tell US about Ahmad as more than a passing fact that means little of nothing, then, WE, The People, will believe this has more to do with Justice for Humanity, than the American suffering movie goer ego being, "leading the free world", by voicing no public concerns on the criminality of the bushmob shysters. Left happying in the George Norry, as a TRAITOR to a dying America not hearing. An enemy of Liberty to the, tried to be free soldier, who is led TO DIE still un-wittingly by lie for the misfortuned neocon bounty of global tyranny through coast to coast story lining. Look, the peenackers will tell you freakishly, that they work to lie to us all, to take advantage of a plain to view weakness. I swear. The neocon wants to con your kid to die for a war lied into with as our stolen goods. We lose as crime victims, while they win free accountability because, (well... I'll just let you finish that one liner sucker punch..)

www.newamericancentury.org

Jason Bermas "I just want to point out that we're going to encourage the people to look at the evidence for themselves."

-

Ron Paul Loves Ron Paul!
http://youtube.com/watch?v=eAvt7BdvJiM

"If you happen to be working for a big company, or the government, you get health benefits dirt cheap.[?] But if your trying to make it on your own, and you don't have insurance, you might be charged two or three time more than the government will pay!"

Almost. PBS showed a man who fell from a ladder, broke a rib, and was bankrupt from his near $250,000+ bill for, for private "free market" health care. Money demanded that doesn't go to the doctors, nurses, or "public" hospitals. So what is Ron Paul saying about Ron Paul? I'd wager, he doesn't know himself, and fears like FOXNEWS from open debate of those who try to teach US to walk through his own argument, (or follow the money (al-Qaida=Ahmad)) and find the fault of all proud blind Libertarians. Look, don't you want the best service possible for the dollars expended? Why give your BASIC health care treatment dollars to a do nothing shareholder, or hedge fund CEOer for procedures, who's success is not made better by needlessly increasing the costs for nothing but selfish sicko greed by bribe payers. Again, rarely are those that "earn" billions in public health care, care givers, but takers. Someone ask Dr. Ron Paul, or Ross Perot, why those with leverage, are able to negotiate better deals through intelligent design, leaving others as single payers, (poor unrepresented pension people,) to flip their expenses? Do we want to publicly sanction screwing over the poor with ignorance, to feed the pay no taxes either, talentless as lowly, highest ranking rich? I suppose if it means radiation treatments.. anti-psychotics or, the play time of genetically altered vaccine strains of true quackery, as has to be done trustingly religious on someone for our money. Money lost as investment on privilege in the market equation of lowering the human capital available to maximize the de-profiting of our shares for nothing but money grubbers. Again, Americans pay TWICE as much as Canadians per-capita, where for those dollars Canadians get full coverage, while Americans are then expected to go out and buy insurance now. TWICE. (Did you know that DO NOTHING hedge fund managers can "earn" as much as 1.7 billion per year in salaries by nickel and dooming everything? And, it's only an elite small few who are 'lawed' to do so? Now, who would want that in a free to be me democracy?)

traffic light for commies, traffic light for commies

A dying waged - by the painfully wealthy status-quo ignoramuses "this is the first step to socialized medicine!!" ahhh!!! caring doctors with calculators are connecting for better prices to improve care.. We'll take less and they'll be free to think.. FOR THEMSELVES! AHHH!!! bare ass and run for cover!! embarrass for. a caring Doctor with math skills and Law is a comin' round, play smart stupid. "What do we do again"?, play smart stupid. . (`_`)

To fix this we must decide what this issue that encompasses the "Health Care Industry", is passing ourselves away off as. Politicians who promote pushing the power of pill popping to purchase your placated peace of mind is perturbed.,

Do Republicans mean to bring health care suffering out of control with no market values, because truly they have little of no skills when it comes to fixing their own buffoonery? Hmm... unless they count to hide the bean all together, fixing the game intentionally to have US lose by remote controlling stupidity! 300 channels, and nobody's taking our call from the space cased file of, "what's this freedom war against Life for again"? Look, is mercury as a medicine good or bad do you think?, let's ask someone for Christ's sake. Or for Deb, Henry, Bill, Beth, Mark, Carol or Tony. Johnny Wizard, our everyday normal magic man of folklore, opens up the stage to ask all the people together, "Are we Man or machine to take this all lying down quietly"? We need to talk about what a King like me, is doing in a place like this, under appreciated, and left alone without my home, dying for a break in radio programming, as President of the company that started the sands running, Shareware Earth Co., a god-like production of miracle and wonder!! You just participate, and you won't even believe how good we could have it, Rejoice, for Johnny Jesus has come down for diplomatic talks. Give away! Give away!

Again, CNN, CBC, and FOXNEWS, (who advertise their listening) suggest G.W. Bush and Co. have publicly acted nothing warranting immediate arrest, or have openly supported the great Kucinich's plan for Impeachment, and consequently, are leveraging America into this mess 'because' we were portrayed as sold to the U.N. for freedom as Iraqi's Grand Strategy. BOGUS! Nothing about the PLANNING of killing people indiscriminately for financial criminal gains as bonafide terrorists, for we had unrestricted access prior to dropping bombs for mangy LIAR neocons. ORHA. I have yet heard FOXNEWS complain in pains of liar BUSH personally being the al-Qaida cause responsible, (like Alex Jones sells foolishly falsely also) More than a million INNOCENT people have been murdered directly by the criminal action of the broken Bush Rule, UN-CONSTITUTIONAL! Don't they know of what You speak? Now???

Make it so,

President and CEO of Shareware Earth Co.
King Johnny Wizard

Christ is Person ! ! !

A reminder: Peres, the Devil demon LIAR, sounds as sweet as any little old man could, but for the fact that he LIES about targeting innocent godly people for murder! While playing

ignorance, as if, he doesn't faith G-D as a real Jew would from Israel. Zionists are atheists who lie as neocons who sacrifice all for ill gotten money stolen from US as the blind foolished already with G-D from the Ol? Testament, all on how this Life suspends storied belief as Divine, to say finally, out loud, "hey wait a minute, who's in charge here?", is really something of a miracle. At least when I say it.

Justice to the bushite, Justice to the enemies of America, so called out the Son to God as King of men:

BELIEVE!

Like, so in walks this, out of work time Lord who thinks to converse to the masses about the most basic of reasons to save the lives of innocent others, leaving him convinced, he really needed an audience for this fable to rise as profitable venture. So, it was followed to make it out there in this real world, is to care for Justice measured. All done so to bring greater hope for a better future as all would follow, boy, were they surprised!

Johnny Wizard has arrived..

Spare me some money won't you please for this art of tragedy?

P.S. I'm still hoping that Coast to Coast will bill me godman co-host, all to openly address these freedom for all operations, with Justice ruling our way over the irrational tyrannies practiced by others happily blinded. Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

Intelcenter.com = alqaida videos you can get nowhere else!

It is important to also realize, this intecenter terror bringer does nothing to sell the arrest of the actual perpetrators of 911 by supporting our Policed requirement to form actual evidenced conclusions in our the land of the make believe. Now, who personally are these pro-bushite anti-American terror scripters, and what is it going to take to find an informed citizenry out in these here parts, to make the proper conclusions by phone calling for furthering our infos around to channels of command of the big ringers in the sky. I'm sure we's a be furious over these facts of high treason in America if we were allowed to freely say as much on our radios and TVs. Al-Qaida = General Mahmoud Ahmad

That's what I'm talking about.

over and out

-

/ / A group of wounded civilians were also brought to a hospital in neighboring Kandahar. Journalists were barred from filming or talking to them inside the wards. \ \

Freedom from what do bushite murder indiscriminately?

/ / Iowa GOP is STILL planning to use the easily rigged Diebold computers to "count" the vote at the Straw poll! \ \

THIS IS TREASON. But, look, teen soldiers are commanded to be bushite nazi savages, who cowardly refuse to defend America from Mr. al-Qaida, General Ahmad, all to thieve further from the undefended American public.

The Arts - an Inside Job

Look, CNN, CBC, and FOXNEWS is lying to US. They know the EVIL bushmob did 911, and have decided to kill your kids for more rewards, instead of defending the innocent. They hold the true value of YOUR LIFE in contempt. Demand justice to defend our freedoms why don't You?

[AMERICAN PAID FOR] Israelis Kill 34 [godly innocent], Injure 86 [godly innocent], Grab 220 [godly innocent] - [nazi corporate TV amerka] World Snores http://www.imemc.org/article/49685

-

MY DEMANDS

/ / eight million Iraqis require immediate emergency aid \ \

I, as the Son of Man, DEMAND, America order millions of gallons of clean drinking water to be shipped immediately to Iraq to save the lives of US, the Human species. Please, help US make this a reality. Today. Please.

PLEASE HELP US

-

THEY GANG RAPED A FOURTEEN YEAR OLD WHILE CARRYING LOADED WEAPONRY

AFTER RAPING THE CHILD IN FRONT OF HER FAMILY - THEY SLOWLY MURDERED EVERY SINGLE ONE AS INNOCENT GOD LOVING HUMANS

- but -

BUSHITE AMERKA CLAIMS THIS DOESN'T WARRANT THE DEATH SENTENCE?

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People.

General Johnny would teach MY soldiers to immediately arrest to kill for such criminality. In fact, I'd likely even throw

in some bonus cash, an a Freedom medal from all lovers of Liberty. Did you know, many bushite sing a song about killing innocent young girls for pleasure? Did you know that also, an "American" radio host likes playing that same song as recorded on "American" airwaves? Fight back for God, or die from self contempt my friends, fight back for life and love.

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People. All to help 'escape' the neocon ENEMIES of America - they also support "officially" destroying Our public infrastructure, thieving humanitarian aid, while incarcerating innocent people to collectively be punished by the TRULY Satanic enemies of GOD. Ten "CIA" bushite enemies have been found to have kidnapped near one thousand innocent Americans to be tortured to death, in tyrannical nations friendly under American funding by Bush unquestioningly. Fight back for your neighbor, fight back for America, fight back for YOURSELF. Or, don't.

See the bushite, you bill it for Christ, You bill it for America, You bill it for them, you bill it for US.

Murdering bushite gang rapists try escaping true accountability

http://womensspace.wordpress.com/2006/07/09/rape-of-the-hadji-girl-part-3-five-more-us-soldiers-charged-abir-hamzah-was-14-years-old/

/ / Why did the Army, within three hours, return to tell neighbors that this was the work of insurgents apparently without any investigation? \ \

See? in Johnny's world, that "the Army" person would have been the FIRST questioned, then likely arrested. But look, it hasn't even been acknowledged as evil doing in progress. (Every time you read, "The Army says..", become aware.)

It should be noted, ungodly bushite enemy commanders call every car bomb in Iraq, al-Qaida, without even pretending to do freedom operations for YOUR protections, as just another dead body in the rubble. (Likely caused by Aegis for cash profit.) So then, look my friends, Amerka refuses to demand justice to save the lives of their very own sons and daughters. And when, WE, Humanity, beg them to answer our calls for accountability, they refuse but for to LIE, stating publicly, "God" would grant robbing from innocent others, to enrich their great unholy tyrannical demon liar. They know easily that the bushmob did 911, and they like it. No, they crave it. The chance of murdering their own "loves" to enslave the human race for the antichrist, sounds great, just as long as they can get themselves in on the take.

/ / Idiot General Says Dead U.S. Troops Best Reason To Keep War Going And Kill More U.S. Troops

[Option B: More Dead U.S. Generals And Fewer Dead U.S.
Troops ?] \ \

If the sacrifice of soldiers lives is going to mean anything,
it going to mean how long it took, Americans to care for
themselves as really worth something. When, or if that day
should come, it will be the day where Iraqis victims are seen,
as just you or me. Today, there is nothing more i wish, than
to hear bushite nazi savage thieves for the neocon die
rightly, before the innocent they target for murder. All in
an attempt to 'escape' those truly responsible for the crimes
of 911 a bushite whore practices, as an enemy to Christ and
America.

Just look at that my friends of Earth just look at that.
Americans speak only contempt for the value of human life.
Every day, INNOCENT Iraqis die by the criminal actions of the
demonic neocon enemy forces of EVIL, and our deaths as the god
loving mean nothing. A small few die in a bridge ACCIDENT,
and every corporate channel devotes the entire day's news as
it. Allawi confesses to killing children for "CIA" money, and
there, as with the soldiers who braggingly, beat innocent
children to death for sexual pleasure, bomb people
indiscriminately, or steal all the humanitarian aid, don't
command your slightest concern as impartial paying for it TV
viewers. They say, US people who aren't "Americans", do not
deserve due process, the freedoms they claim to own
exclusively, of which WE, are granted nothing of. See?, by
not using evidence to from your guilty verdicts, how can it be
therefore possible, to know, you've arrested, tried, then
executed a mass murdering NEOCON war criminal? I don't think
Americans could possibly be more disrespectful to God and
country, Johnny and Justice right now, do You?

http://existentialistcowboy.blogspot.com/2007/06/911-culprits-why-towers-really-fell.html

/ / We know that a crime was committed on 911. George W.
Bush, of course, quashed all investigations before they could
begin. Since when are crimes not investigated? [...] It is
not too late, however, to begin such an investigation. There
is no statute of limitations on mass murder. \ \

We, as Humanity, have to rise against the neocon LIAR enemies
who forsake the value of Human life. Death to the bushite,
death to the enemies of America's America.

/ / Army Secretary Pete Geren asked a military review panel to
decide whether Lt. Gen. Philip Kensinger, who led Army
special forces operations in Afghanistan after the Sept. 11
attacks, should also have his rank reduced. \ \

A bushite demon CAUGHT aiding and abetting the crime of FIRST
DEGREE MURDER of a trying to be Patriot Soldier, is made to

fear in bushite amerka, he might face a reduction in rank!
MURDER~!

/ / Congressman Dennis Kucinich, a member of the House
oversight and government reform committee, which has been
investigating war contractors. "Theres no democratic control
and theres no intention to have democratic control here." \ \

Right. The demonic lawless actions of Aegis posing as
al-Qaida killing police officers undermine freedom for Iraqis
and Americans, alone with ALL the rest of US. All criminally
gotten assets of lawless mercenaries will be hunted by every
police service; those that complain as traitors to Freedom as
Justice, WE, the real Patriot warriors, committed to defensive
measures, will be rewarded to bill for. IF! Johnny is
recognized a Mythical King with money to spend better than a
neocon saboteur. Your call... Reminder: The neocons in YOUR
power, were never elected, nor, was Bush the demon enemy of
all Human Life. A demon that says if you disagree with his
blind blanket statements against innocent Life, YOUR a
terrorist. At least with GOD, we'd be only killing criminals
we couldn't otherwise defend ourselves from with evidenced
conclusion through practiced Law judged fairly.

http://www.guardian.co.uk/Iraq/Story/0,,2138917,00.html

/ / TheSpyWhoBilledMe.com regularly breaks news on the
clandestine world of private contractors and US
intelligence, recently established that Washington
spends $42bn (#21bn) annually on private intelligence
contractors \ \

do the math - do the math - do the math - do the math

42 billion. 42 thousand million. Or, hiring maybe twenty
or thirty bushite LIAR enemies, who blindly giving Americans
pay not only billion dollar saleries, but also with their
forsaken lives as unworthy of real protections. CNN, CBC,
and FOXNEWS knows the bushmob did 911.

So, million dollar saleries? I doubt. Likely a neocon enemy
or two robbing from an undefended America. Remember, Peter
Power wants US to believe ALL of Scotland Yard would murder
Brits for stolen bucks. Frankly chaps, I just refuse to
believe such bullocks.

Be me man,

King Johnny Wizard

-

The Ground Truth
http://www.informationclearinghouse.info/article15319.htm

The part where pro-bush "American" soldiers drive over children to kill them for fun, all because they say our Humanity let's those responsible escape retribution for being Satanically evil as enemies to Christ, left me angered beyond words. While CNN, CBC, and FOXNEWS couldn't care less for those children, but will tell us, these 9 accident victims must rule, so far, two full days of wall to wall coverage. "Pro-Western" Allawi blowing up school buses for "CIA" money? Who cares? Really who cares in TV America for defending OUR children's lives I'm saying? Get me in the news my brothers and sisters, and I'll make the best of it. Just do it. Fear not for my life loves, fear for your life left to silently die in contempt for Humans being.

Thanx much.

-

"He never would have called me 'sniveling,"
http://www.democraticunderground.com/discuss/duboard.php?az=view_all&address=389x1466466

/ / "He never would have called me 'sniveling,"' O'Neal said. "I don't remember ever speaking to this chaplain, and I find this characterization of Pat really upsetting. He never once degraded me. He's the only person I ever worked for who didn't degrade anyone. He wasn't that sort of person."

The chaplain's name is blacked out in the documents. \ \

-

Jeeze, nobody tell Chris what CNN is reporting

MSNBC'S CHRIS MATTHEWS :

" So, the longer we stay there.. do the number of people in al-Qaida grow or become lesser? Aren't there more al-Qaida every year?... Because if we stay there four more years.."

Jeeze, nobody tell Chris what CNN is reporting, where the murder of innocent people outside of Baghdad makes the neocon soldiers appear as Heroes, all because they can blindly blame the CRIME on al-Qaida without even the slightest inquiry. Catch this Revelation, among many others, in one of many miraculous Mr. America, Johnny Wizard Podcasts. Get your copy before they're all gone!!

-

"I just brought TERROR to someone else, under the "American" flag, and that is just not what I joined the "American" Army to do." - dying needlessly for the enemy of GOD antichrist

responsible personally for the treasons of 911 with his zionist neocon partners of EVIL.

-

/ / President Shimon Peres has called on the world to unite against Iran and to force it to abandon its nuclear weapons program. \ \

Let Jews of the World rise to demand Peres "The Devil", be put to death for alleging a FALSEHOOD to murder Humanity for our stolen religious values. Peres is the actual Devil. No, seriously. I am as surprised as anyone.. No, seriously.

Signed,

Poor Jew Johnny, the richly Magnificent!

/ / DCI said the children confessed to the charges brought against them after extended periods of interrogation, which occurred before their court appearance. The report includes personal testimonies from children that expose physical and sexual abuse at the hands of the Israeli army and brutal treatment during lengthy periods of interrogation. At the end of the interrogation process the children were told to sign papers, despite not knowing what they were signing. \ \

Realize: American tax payers fund this unquestioningly.

-

http://www.talkleft.com/search?string=haditha

All military "Judges" must be arrested for TREASON, tried on the decisions they've made as unqualified. And on those decisions unjustified, as on the charges of murder, THEY, will be put to Public Judgment for a death sentence gloriously for freedom and country, I will be assistant Prosecutor, who will speak facts, unlike bushite, who calls every "foreign fighter" al-Qaida (except the REAL General Mahmoud Ahmad) - and bombing victims "SUSPECTED" women-loving-child-schooling-Taliban. Death to the bushite my friends, death to the bushite enemies. These demon nazi fukers believe that those who bomb cities indiscriminately, wouldn't be put to death for the defense of our communities in Christ. I, Christ, intend to change that by example. Americans will pay $25,000 a head for every nazi bomber, or those who fly in the Apache, captured, tried, and put to death as the Satanic bushite enemies of Creation. Kill a bushite today why dont YOU lover of GOD as Just Causes to save Our dying Universes? Those who victimize ourselves as the innocence of Humanity, are going to answer to US

scientifically. Death to the bushite, death to the enemies of America.

-

The King of America - Citizens Face Full Asset Seizure

http://www.rense.com/general77/asset.htm

/ / "(ii) to have materially assisted, sponsored, or provided financial, material, logistical, or technical support for, or goods or services in support of, such an act or acts of violence or any person whose property and interests in property are blocked pursuant to this order; \ \

So, those who don't support the return of all stolen monies from Iraq, who continue to undermine Humanity's chances for Justice in Iraq, (like every neocon LIAR and foxnews broadcaster, lawless mercenary antichrist disciple, or Haliburton shareholder,) needs their assets seized, and tried publicly for treason as war criminals. Every war profiteer holding more a one hundred thousand dollars will be hunted by the will of Humanity. so says - The Son to God as Man to men.

Bush To Veto Ban On Mercury In Vaccines
http://thimerosal.worldwidewarning.net/www/archives/59

/ / "Under the current administration, mercury has been and will continue to be knowingly injected into the youngest of American citizens. The controversial mercury-containing preservative thimerosal has been linked by thousands of parents as being the cause of their children's mercury poisoning and autism." \ \

Please, I beg you as the Son of Man, to fight back against those who threaten the lives of innocent American children, by forbidding defenses for US, the People. As recognized King of my forsaken World, this wouldn't happen I'm telling you. Support my rise to tax every American ten cents to start up my company of accountability. Running on free open line communications where ANYONE CAN CALL US, and call me a Jerk, just don't expect I wont fairly defend myself. Live broadcasts out in the fields, trumping evil demons by the power of the word. These individuals responsible for criminally victimizing American children, need to be arrested from continuing their action against our families. Support US please, to work on Just causes for the betterment of the human species, Or don't and die unworthy you bunch of bushite nazi savages.

We Have A Problem Here

Look, Bush closed investigations on 911 immediately, then started firstly on Iraq, for war mongering thieves, with General Ahmad escaping un-accosted for the neocon enemies. Not relevant? Your Constitution is laying undefended, a National act that can not be done by any other terrorist group but those who claim your freedom rights denied by bushite command. Not treasonous? Look Condi, the demon 911 nazi witch PERSONALLY assisted in dropping more than seven million land-mines on Lebanon indiscriminately in Your terrorized dying names. Hate Life and God as yourself do You?

Don't anyone be deceived that the neocon enemies minimally assisted these crimes by refusing to allow US pursue the evil doers by following the actual crime scene leads, but we lack REAL leadership skills that are naturally required to see molten Iron flowing like water from the 911 towers on YouTube. Oh golly gee, who is that theatrical man from Canada with all the answers on Justice for Peace with Freedom Ruling Supreme? with atheists and everything? A brilliant man given next to no chance at receiving acknowledgment in Bushite media amerikan impires.?

Ray McGovern on 911 broadcast nation-wide on the coast to coast radio network "What we need here is an investigation. There are answers out there, but no one has pursued the answers." Similarly, there are questions that we isn't [allowed] figuring.

"No one has pursued the answers"? Come on Ray, don't tell US, you have no internet access, or haven't seen the video of molten iron flowing like water... blahblahblah

http://www.peaceandjustice.it/impeach/

/ / Executive members of the American Israel Public Affairs Committee lobbied Congress to pass Iran sanctions bills. \ \

These DEMONS need to be arrested, tried, and EXECUTED for TREASON. There is no evidence against Iran to substantiate their DEMON LIES to murder millions of People for the pleasures of the sadistic zionist enemies of Human Life, enemies of GOD as LOVE. Just because repuglicons like Liebermann, take bribes to murder US folks as the innocent, doesn't legitimize their treasonous conduct against YOU, my freedom loving dying brothers and sisters. Stand up for Jew Boy Johnny why dont You.

Who as America will bother to care they die by naked zionist criminal command? Johnny Wizard has been screaming for help to America, begging them to pick up their phones leastly, to air concern for the survival of the Nation, for YEARS! to publicly challenge happy happy, joy joy pro-child killer demon enemy George Norry and bullshitter no-national thief of Life

Art Bell, and they've near completely refused while laughing and singing by who cares for you zionist news command. They, as America's Coast to Coast voices, would rather richly die YOU sacrificed for CRIMINAL zionist Israel, (Israel, where the government leaves actual Jews to die in the streets starving as garbage dumps, to make it look good for MORE giving American charitable donations to disappear elsewhere) before saving the lives of THEIR VERY OWN. Americans don't seem to care they die by their own unwillingness to communicate openly for Justice. I ask you again, to spare me a few dollars so I can feed myself. I am actually, near starving, and never in my most feared nightmares, thought this world, with our communication technology, would leave me without any financial assistance. I seriously need to eat. Please help me, by supporting our cause to not starve to death. If you appreciate my words in defense of the once great Human race, donate a few dollars to this cause. Justice and Freedom for all, especially God as Just, and worthy our praise

Peace.

FEMA covered up toxic danger in trailers given to Katrina victims
http://www.wsws.org/articles/2007/jul2007/fema-j21.shtml

I'll tell YOU again, CBC, CNN, and FOXNEWS knows the bushmob did 911, and lie to you entertainingly to sacrifice even more of US to the demon antichrist forces of evil.. While I ABSOLUTELY destroy bushite with joy for God and the defense of love.

/ / Support me, or fail to recognize true wisdom when it speaks to you of need for desperate change to save your dying selves. No evidence against an accused is US being truly abused.

"These are not terrorists, they are not al-Qeada, they are ordinary innocent men, women and children." \ \

-

TRAITORS TO LIFE

"I told him, there's women and kids in that room," Lance Cpl. Humberto M. Mendoza said of Lance Cpl. Stephen B. Tatum. Tatum's response was, "Well, shoot them,"

If Americans don't proudly put to death Tatum, on behalf of the Family that lost their son, their Marine, Johnny will formally conclude, Bushite america is an ungodly evil nazi fascist state of intolerance and hate to US, the Great Human Race. Bushite amerka does not own Freedom, nor do they own our rights to be Just. Join me in demanding the Public execution of the satanic demon liar Tatum, on his Public

insistence that murdering innocent families to thieve from for the neocon, is a crime not warranting the death sentence enforced by any family man. Death to the bushite. death to the enemies of man. The neocons will be arrested, tried, and executed for the crimes of 911 as traitors to Life.

Bush Outlaws War Protest - Citizens Face Full Asset Seizure
http://www.rense.com/general77/asset.htm

"Who cares? to listen to a dying unheard America",
as the growing richer ungodly neocon enemy traitors shrill.

-

Death to the bushite instead of the innocent loved in God

/ / IntelCenter issued a tacit warning that the footage may be re-hashed when they released the "new" tape to the media, but they failed to mention the fact that they released portions of the exact same clips in October 2003. \ \ amazingly - I witnessed blurred-out faces of those they claimed al-Qaida in another instance just recently. (Then, look at the dog fight vids that CNN and CBC refuse to show the dog haters faces in..)

I say American taxing payer folks, flip me some dollars, and I'll pay out rewards - after a moderate lunch - all to take these IntelCenter AL-QAIDA! - AL-QAIDA! - AL-QAIDA! straight to public trial, then public execution for high treason - like holy fuk mon let's get real here People. Or don't and we die further for bin Laden's fear of cameras. Offer a 500,000,000 dollar reward for Zawahererri's crew to get the rest of this done quick like. I wanna rock! Death to the neocon enemy LIARS, death to those who WAR - WAR - WAR innocent Humanity for the continuing bushmob's escape plan from nowhere. See? Heaven or Hell? YOU DECIDE.

Don't EVER forget, the private company Aegis has been officially found dressing up as AL-QAIDA! - AL-QAIDA! - AL-QAIDA! to murder pro-western forces in Iraq, while desecrating Elvis. Elvis Presley. If you don't love Elvis, there is something seriously wrong with America. Now yous messing with a real son-of-bitch. HeY!, question: why don't Americans kill a bushite for Yourself bud? - because Bushites insist "we're" willingly being led by the antichrist enemy of all human life as Satanic LIARS who intend to cheat ourselves of freedom through self respect. Pro-neocon-media enemies are nazi savages, and I don't like it..How about you?

Death to the bushite instead of the innocent loved in God

-

Time is Up

Al-Qaida Kagan "Al-Qaida, their whole strategy revolves around generating sectarian violence, because that is how they embed themselves within local communities "

What?? For friendship?

What is the demon TRAITOR to HUMANITY in America saying about the reasons he embeds an Iraqi under 50 odd divergent NEOCON labels? Wouldnt most Al-Qaida take great joy in killing a bushite nazi grunt like any real Family man would also? These LIAR dumfuk grunts who cheer "whore yeah", routinely, can barely read or write, so, how possibly does this FOXNEWS expert, expect such ungodly antichrist forces to delineate Al-Qaida from the local communities they PROVABLY indiscriminately bomb as Satanic?

Kristol and Kagan: Put Everything Behind Escalation So We Can Bomb Iran and Syria

Kristol and Kagan MUST be put to death for treason against America, treason against Life, treason against GOD. They both have continued to Publicly advocate murdering more innocent peoples indiscriminately they call, "Al-Qaida", all to rob further monies from an undefended America. It is easily learned by any as all, the victims of bushite tyranny are exclusively, US, The People, guilty of nothing but our shared love of GOD. Remember forever: there was NO JUSIFIED REASON for bombing PEACEFUL Samara, NONE! that bombers confess was done as ordered by Allawi INDISCRIMINATELY, all for getting killed Marines sent in later for more stolen cash from America. P2OG. [hundreds of bushited Marines died rightly almost immediately - (wow eh?)] A Satanic action, Kistol and Kagan, both blame without thought to question on "Al-Qaida".

The action of Satanic bushite bombers targeting Samara as war criminals is FULLY documented.

Death to the bushite neocon LIARS, death to the enemies of Freedom for Humanity. My beloved friends of GOD, please, when you see the mute bushite, kill it for Christ, kill it for Love, kill it to defend your loved family. (Any soldier who doesn't proudly talk of how it hunts those British soldiers who kidnapped barefoot children and victimized them on video, is a soldier worth destroying NOW to defend GOD and Life from needless death.) I HATE the REAL demon antichrist Christ says.

Kagan "You rarely know in the middle of a war, what the outcome will be."

Johnny Wizard the Creator "I win."

-

/ / The US has also been backing some pro-western politicians like Iyad Allawi \ \

Do you know who Allawi is? Allawi confesses to blowing up school buses filled with children for "CIA" money. NOT THEORY. HE ADMITS IT AS AN ACTUAL SATANIC DEMON! Allawi, the truly insane mad man, confesses to having ordered the murder of doctors and nurses that treated wounded god loving women and children from Fallujah. It was these DOCUMENTED acts that had him thrown out of 'the CBC, CNN, and FOXNEWS TV expert scene as workable', all for fears that US humans might actually wake the fuk up on WHO is Our True Enemies here. All three, pro-private-bank zionist news stations are well aware that the bushmob did 911, but lie to YOU as forsakenly dying for their growing riches and world wide broadcast fame.

CBC National Newz - July 11th 'tens of thousands have died in Iraq since the war against truth started.'

Anyway, these two Allawi incidences are fully documented, look it up, then demand the "The US" pro-western politician person quoted as supporting Allawi - be found guilty of CRIMES AGAINST HUMANITY, Demand publicly, having the neocon zionists EXECUTED by America, for America, as America. A Just America that defends America from criminal madness. Or don't. Death to the bushite, death to the enemies of Man I say.

-

ABCNEWS.com : FBI Called off Terror Investigations

A question Johnny Wizard has for America: Tell me, is this not a treasonous act - for Bush to close criminal investigations, immediately after the terrorist crimes of 911? Shouldn't the demon enemy be put to arrest for that godless act alone in this forsaken dying world? A world left instead suffering further the tyrannies of the war criminal ENEMY of all Human Life?

A refresher: the neocon will tell you openly, they live to lie to the Public for cheating and stealing by murder of US as proxied, innocent peoples purposefully enslaved by a made ignorantly entranced TV audience that is repeatedly reminded, we have no power worth respecting.

CNN, CBC, and FOXNEWS aren't taking are calls presently, but just lie and tell US they do. Look to see, almost all political internet traffic condemns Bush straight to hell well he rightly belongs, but the polls still say no - WE, seeking for Just cause, are the minority.. just roll over and die for the neocon betrayers to god and country, life and loving.

-

George Bush "The same folks that are bombing innocent
people in Iraq were the ones who attacked us in America
on September the 11th"

George Bush 'Iraq has nothing to do with 911, you bunch
of nazi dumfuk grunting LOSERS. Whore yeah - praise Satan
- die America die. I mean... I love Jesus'

So it was as I thought too: the direct co-operation of
the joint chiefs of staff assisting General Ahmad, in
committing the murder of thousands in America on 911
for the neocon TRAITORS, as the same 'escaping' enemies
today, responsible for 'secretly' ordering these
indiscriminate terror attack bombings against YOUR
Humanity for their continuing stolen pleasures as
Satanic.

-

/ / U.S. Marines are said to have killed as many as eight
unarmed Iraqi prisoners when U.S. forces attacked Fallujah
in November of 2004. \ \

HA! Trying to ignore the murder of more than 200,000 People
as if OUR lives have no real meaning. WE KNOW they murdered
everyone they could in around between 15-55, but went ahead
gunning for infants and the elderly too under Sattler. Look
it up. Death to the demonic bushite LIARS, death to the
enemies of Man, so says the Son to God as Man to men -
Kill the dishonorable bushite enemy and be Loved by all as
Savior.

-

DEMON MURDERER PETER POWER TRIES TO LIE HIS SOCKS OFF
ABOUT HOW HE MURDERS LONDONERS AS A FOR REAL TERRORIST
RECRUITER

[letter written as signed by Peter Power to MSNBC et al.]

/ /It is confirmed that a short number of 'walk through'
scenarios planed [sic] well in advance had commenced
that morning for a private company in London (as part
of a wider project that remains confidential) and that
two scenarios related directly to terrorist bombs at
the same time as the ones that actually detonated with
such tragic results. \ \

Little Peter Power is threatening literally BILLIONS
of US there. So.. what we a going to do my partners
in living? Die or survive? Your call...

-

Petraeus quietly urged his commanders to "get the word out"

Homeland Security Committee Chairman Bennie G. Thompson

/ / Thompson continues by asking Chertoff to further explain what measures the country should take based on his instincts, "What cities should be asking their law enforcement to work double shifts because of your "gut feeling?" Are the American people supposed to purchase duct tape and plastic sheeting because of your 'gut feeling?'" \ \

Homeland Security Committee Chairman Bennie G. Thompson

NOTE: Americans are literally paying billions for Chertoff's THREAT of "gut feeling". Billions, while the neocon walk away from MURDERING Americans on 911 with the bushite on America's Coast to Coast radio network, claiming they don't know you know, nor, ever will. They'll tell you, blame the shadows in the New World Order, but don't rely on evidence to form your conclusions on who PERSONALLY is responsible for criminal actions against YOUR rights to be free as alive. Evil is real my friend, evil is real. Death to the bushite, death to the enemy LIARS of human kind. Death to the enemies of Love and God. Death to the enemies of Life.

"A dead Iraqi is just another dead Iraqi... You know, so what?"

These demons are murdering god loving people as enemies to Humanity with the nazi assistance of corporate news america. Will YOU please, support my rise to speak publicly challenging anyone who disagrees with me, GEORGE WALKER BUSH needs to be arrested immediately for 911. Peter Power needs to be arrested for the London bombings. Sattler, Blount, and Russell need to be arrested, tried and put to death for WAR CRIMES against Iraq, along with those responsible for other indiscriminate targetings against innocent PEOPLES for the zionist neocon god betrayers hidden in shadows as the un-known "Joint Chiefs of Staff" demon enemies.

http://mediamatters.org/items/200702260008

/ / Wash. Post parroted White House claim that Iraq war was authorized by U.N. Security Council \ \

Treason charges must be sought against zionist reporters who LIE with such blatant disregard for your freedom in America.

-

The fascist control bushite, don't like You to think independently for Yourself, for we independents out here make them look as stupid as they are. Thank you very much for that not so secret info.

-

The Other War: Iraq Vets Bear Witness
Chris Hedges and Laila al-Arian, The Nation

/ / Many said that these acts were perpetrated by a minority.
But they nevertheless described such acts as common and said
they often go unreported - and almost always go unpunished. \ \

/ / In addition to this sadistic and prolonged torture of the
innocent,
according to Gush Shalom, (Gush Shalom is a Jewish peace movement-
true Judaism is opposed to Zionism) \ \

Moore vs. Greed
http://www.crooksandliars.com/Media/Download/19156/1/TSR-Moore-Wolfie.wmv

Moore: "Why dont you [at CNN, CBC, and FOXNEWS] tell
the truth to the American people?"

Because as zionists, THEY hate a liberating people who want to
TRULY make their lives better by understanding Justice is Freedom.

-

http://www.liveleak.com/view?i=456_1177473318

/ / An [BUSHITE ENEMY] American soldier boasts of having tortured
[INNOCENT] Iraqis and making a 15 years old Iraqi girl commit
suicide after she had been raped. \ \

Tell US, who wouldn't take great pride in warring this boastful enemy
of Humanity? Or, are you like CNN, CBC, and FOXNEWS would suggest, it
is heroic - for all are heroic who DIE for the neocon?

-

/ / It is strange that the 'Secret Organization of Al
Qaeda in Europe,' the group that is allegedly
responsible, would have escaped notice (to say nothing
of their odd, 'double secret probation' type of name). \ \

Bushite are EVIL to all, as enemies to Human kind.
During Katrina, the bushites responsible for protecting
America, slaughtered everyone's confiscated pets for joy
and happiness. Three schools filled with hundreds of
dogs, cats, snakes and bats. There was no need to kill
everyone's beloved pet, but as the bushite will FREELY
tell YOU, it was fun to serve demonically as the
antichrist enemies of God and love. demand Justice for
God, demand Justice for Johnny.

/ / The mere fact that one can deduce a motive for a
person or a group does not mean that they perpetrated
the act...and it hardly suffices as proof of anything.\ \

Just try telling that to 'why work to make life better'
CBC, CNN, or FOXNEWS censors. Look at me!! They refuse

to acknowledge my documented info as REALLY important
to your continued ACTUAL survival.

Who fuking cares right? Certainly not the enemies
of America at the Coast to Coast radio network, who would
kill Americans for the rich neocons without question. It's
JUST American kids getting conned to die as bad guys.

-

DEMON LIAR George W. Bush "The larger point is, and the
fundamental question is, did Saddam Hussein have a
weapons program? And the answer is, absolutely. And we
gave him a chance to allow the inspectors in, and he
wouldn't let them in."

-

Afghan civilians caught

'Up to 80 civilians dead' after US air strikes in Afghanistan
http://observer.guardian.co.uk/world/story/0%2C%2C2115846%2C00.html

/ / Witnesses claim a village in British-run Helmand was
bombed for three hours \ \

BUSHITE, THE ENEMY

It is not just a Muslim who sees the bushite as an enemy to
Humanity. These lawless savages have been acting without
accountability to anyone, because they are largely enemies of
America, who cowardly run from responsibility in America to
defend their own brothers and sisters from the neocon, and die
instead as/with rapists, torturers, and THIEVES.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in
crime"

/ / How can those who want accountability be termed
anti-Iraqi? only through cowardly liars, is an American
told America's not going to hunt down those who stole in
their names as neoCONNED for dying. \ \

/ / Israeli officials have told us that the Finance Ministry
is budgeting basic social services at a percentage of their
known costs \ \ EVIL BEYOND WORDS. KILLING JEWS FOR MONEY.
We can really be something greater, while a murderous bushite
thief, a LIAR, can hardly read or write Liberty without
flinching from self contempt.

Jesus man, do I truly hate these zionist nazi thieving LIARS
on our magic TV shows who con our kids to die as bad guys.
How about You?

These naked LIAR enemies who bank to thieve more from Iraq,
Afghanistan and America, must be brought down by Humanity's
ultimate triumph over tyranny through Law. A just law, where
those accused without any evidence are Innocent, and WORTHY
yOur defenses.

-

http://www.msnbc.msn.com/id/19461815/

/ / This paints the congress into a corner, because when Bush
and Cheney refuse to comply with these subpoenas, congress will
either have to impeach, or admit we are a dictatorship. \ \

-

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to
testify to Congress because Congress, in fact, doesn't have
oversight abilities."

IT LOOKS like they are going to attempt making the move of
BLATANTLY TREASONOUS war criminals acting to measurably now
destroy yOur Freedoms in godless America. The Satanic
neocon's 'faith', is in that YOU as an American, will watch
the same corporate drivel that offers next to nothing to
empower YOURSELF to speak Justly for a dying America. Instead
of demanding 24 hour, wall to wall news coverage, of war
criminals going down one by one by the will of Man to Justice,
CNN, CBC, and FOXNEWS will broadcast your blind 'belief' that
you are only a impartial viewer, who doesn't really care about
dying right in front of yourself for the zionist's riches, and
great worldly power of tyranny through lawless nazi bushite
censorship.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in
crime"

Jesus man, do I truly hate these zionist nazi thieving LIARS
on our magic TV shows who con our kids to die as bad guys.
How about You?

/ / If Bush and his PNAC buds are innocent, then Investigate
911! What have innocent people to fear from a fair, complete
and real investigation? \ \

They are guilty, so, of course, the demon Bush enemy,
OBSTRUCTED JUSTICE FOR AMERICA.

I hear the national radio program Coast to Coast is still
feeding us neocon lies. Why don't you make the call for
Johnny.. believe in yourself for a change why don't you?,
buddies??... I am Your god king. King Johnny I am. Champion
of Universal Life! Not enough? Who cares?, to allow US speak
on our broad casts as legitimate? Worried I'm going to love
Life as truly honorable, and Greater than those who openly lie
to our soldiers to have them unjustly die for no better good
or reason understood? Let us make life better than the neocon
envision, and support our rise to popular acclaim by allowing
US to speak openly for public challenge in defense of America.

Death to the neocon soldier, death to the enemies of Man.

-
True US Bush Iraq-Afghan Wars Deaths At 21,000
http://www.rense.com/general77/true.htm

"In the last four years of war in Afghanistan and Iraq, the
unreported death toll of American military personnel is in
excess of 20,000 (20,871)"

It's in cowardice that 'Americans' don't speak out for
the lost 'loves' of their dumber than dumb sons.

-

Thinking of vacationing in occupied ungodly neocon aipac
israel? Check out the criminal zionist's 'best' selling
point...

ISRAEL PEDDLING WHORES TO ATTRACT TOURISTS
http://desertpeace.blogspot.com/2007/06/israel-peddling-flesh-to-attract.html

[The freely self confessed child murderers of the IDF, tell US
as demon liars, they're "Jews". Anyone in Israel KNOWS this
factually to be so. For, the zionist forbid 'by law', to
allow military service from anyone in Israel who disagree that
God would will the thieving and murder of the completely
innocent in GOD accepting without question. Now why would YOU
want that?]

The nazi IDF does what Canada's dope pusher O'Conner suggests
we accept. Demon enemy bushite in Afghanistan murder children
without real understanding 'by accident', [no evidence is
shown to ANYONE, just treasonous demon evil bushite necon
spewing, "red handed"] lies after lies, while, the Taliban, we
are told, are so much worse, because they would murder
"ANYONE." Make sense? No. Remember: (The bush regime has
been found funding Al-Qaida in Iran to commit terrorist acts
against COWARDLY soldiers without free minds to speak in their
own defenses.)

/ / The group is demanding his impeachment not only for his
crimes against humanity but for lying to the American people
about his worship of Satan. \ \

It almost makes me laugh, and then, I push to remind, we are
so very far from where civilized is dreamed to reside. Look,
think of US as actors, (because that is who we are,) and
support my rise to proclaim by the will of a suffering for
real human kind. Believe in US, as if your life depends on
it, because it does my friends, because it does. Live free or
die unwillingly.

cause I am just,

King Johnny Wizard
President and CEO

-

/ / Cheney's office has refused to provide his staff with details regarding classified documents or submit to a routine inspection as required by presidential order, \ \

It seems Cheney wants to go it completely alone as an escaping war criminal in America eh?

Demon G. W. Bush "Our responsibility to history is already clear: to answer these attacks waged against us by stealth, deceit and murder and rid the world of evil."

"Deceit" and "murder" to rid our world of justly what dum-uk enemies?

-

Bin Laden may have arranged family's US exit: FBI docs

-

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

/ / "They can try to have their votes of no confidence," the president said, "but it's not going to determine - make the determination - who serves in my government."

MY government? Now that's entitlement. And you thought George Bush didn't have a vision for America \ \

Hitler, the mad man, wasn't as insane as our demon enemy George Bush Jr. is.

/ / The [BUSHITE ENEMY] US has said it would refuse any request by Italy to extradite the accused [satanic bushite torturers of completely INNOCENT PEOPLE]. \ \

Christ, The Son of Man, begs the godly men of Earth, to judicially bill on sight, any neocon soldier who supports the carnage waged in Afghanistan as cop killing dope pushers. They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism, persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Lawless dope pushing cop killers have got to go down dead screaming, instead of the innocent - YOU and me they target for MURDER. Death to the dishonorable bushite THIEVES, death to the enemy neocon LIARS of GOD and man.

We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Kill a bushite LIAR, why don't you my brothers and sisters of the faith in something greater than bushite godless tyranny?

Brig. General David Fraser - former nazi commander of NATO who 'okayed' the bombing of defenseless innocent Afghan women and children for the Satanic enemies of Man, stated on CBC, he liked killing police officers, along with innocent women and children, (deliberately targeted for the pleasures of the demon antichrist) because, Afghanistan's children hope to learn. See? The bushite 'will' murder all our children and teachers on hope that we will never learn the Taliban, led by "Omar the Just", were loyal to Christ as REAL American Freedom, when publicly demanding evidence to form your conclusions. Thus is why the ENEMY to LIFE neocon state on YOUR TV and radio, WE must never be allowed to speak openly with the Taliban regarding the FACTS. Because if we did, neocon pension thievers would be hunted down in the streets for public trial, and then gloriously put to death by Christian values committed to TRUE freedom from lawless godless zionist LIAR tyrannies against Mankind - YOU included.

George Norry and Art Bell are the most evil of bushite, who as betrayers of the Human race, deny soldiers to know: General Ahmad funded Atta. They will both support the murder of Your American Son or Daughter for further zionist evils, before allowing true open line communications, to defend ourselves from the lawless demon enemies of Man. Do something about it, or don't. Let TRUTH set US free.

Instead of making an easy phone call today for your dying brothers and sisters, die as Satanic bad guy enemies of Life on Earth, sacrificed in cowardice to the real demon antichrist, and see if we, the true, strong, and free, care. The Son of Man SCREAMS before coming home to GOD'S America: We are coming to destroy Satanically lawless bushite enemies, all for the love of God, we shall succeed my friends, we shall succeed. I will not willingly live in a forsaken world with LIAR zionist war criminals conning US to believe, God is not Great, True, Strong and Just.

Die bushite die!

-

/ / A manifest showed the goods [BUSHITE HEROIN] were to be shipped from Kabul to Dubai and then on to Canada. \ \

"We have nothing to do with poppy eradication. We stay away from [pro bushite heroin to kill YOUR kid with] it as far as we can," Maj. Steve Graham of the Royal Canadian Dragoons

-

To Kill a Bushite, is to be Heroic

To further murder as these ungodly bushite liars do today as our suffering Mankind, is to blindly swear public allegiance to the for real DEMONIC antichrist THIEVES. Bushite enemies are evil nazi dumfuk scum, liars who cowardly watch America in her weakness be high jacked, and squeak nothing for Just words in our REAL defense for dying.

http://japan.indymedia.org/usermedia/audio/12/johnny-rocks.mp3

AMERICA'S Mr. O'Really responding to accusations that FOX NEWS refuses to cover the war in Iraq on behalf of concerned, AS DYING, American families, [and forsakes Christ as demon betrayers to the paying victim audience] Stated:

"Do you care if another bomb went off in Tikrit?
Does it mean anything? NO! It doesn't mean anything."

Why should WE continue to silently die unjustly victimized?, for the bushite's contempt of Mankind censored?, the Eternal Son of Man to GOD forever answers correctly.

Kill a bushite as the Love of Justice for Humanity

The Son of Man BEGS all honorable men to defend Life

from bushite enemies of GOD who murder, rape and steal from
innocence through lawlessness as thieves of everyone. Please
kill the bushite for the love of women and children. kill
the bushite for the love of GOD. Please, defend ourselves
further hardships by supporting immediate war crime trials
to begin against all neocon traitors who LIE OPENLY to
kill America's America as enemies to truth, as enemies to
Christ.

Charles Goyette Interviews Scott Horton
http://dissentradio.com/charles/aw061107scotthorton.mp3

/ / Look, do you understand what these [TV politico] people
are saying?

These people, one right after another, are up here talking
about a nuclear strike! [more bushite DEMON mass death and
suffering against Life] On a country that hasn't threatened
US?, hasn't harmed US?, has no capability to attack US? Do
YOU understand the madness we have descended to? \ \

'Kill Anyone Still Alive': American Special Ops
http://www.atlanticfreepress.com/content/view/1784/81/

Can you not as a American Man, destroy bushite brayers to defend
innocent life? Americans could not care less presently for
the value of Human life. Americans do nothing to defend
their lives, but officially plan to murder more for the Satanic
demon antichrist in silence. Out of millions, how many even
bother to make a phone call to talk radio against the neocon.
how many? Five or six? Seriously.. How many? I know bushites
are demon liars for the neocon, but is it really impossible for
"Americans" to try speaking?, in the face of murdering millions
more forsaken by enemy mortal, pro child killer George Norry?
George Norry too nice of a guy to even bother question the value
of American children? The THIEF Art Bell's voice too soothing
to care that neocons own pirated America, and on everything she
stands whoring as WAR CRIMINALS to the FOR REAL antichrist?

Death to the lawless bushite, death to the enemies of Mankind

http://pr.indymedia.org/uploads/2007/01/law_of_the_land_-_we_rule.mp3

God is Great

Again, George W. bush did 911 with General Ahmad, but CBC
zionists, actual treasonous LIARS, actually smile to dying

Canadian soldiers with only true contempt. CBC kills Canadian kids, with their intentional demon lies, trying to subvert Justice for God and Johnny. In fact, yesterday, they did a special, all on how "God is NOT Great", giving that bush bitch demon LIAR, all the space to pontificate it's hatred for Wisdom, Science, and GOD, with only nods and smiles from the 'illiterate' hord. Remember: A zionist KNOWS it's an enemy of Humanity when it supports dropping seven million land minds to murder indiscriminately OUR CHILDREN for decades, or stealing a Christians Home because they say God says Jews would do such ungodly acts. Blame innocent Jews the holocaust denying zionist shout, of which not one, is a Jew. Like me.

To Kill a Bushite, is to be Heroic

Pro child killer George Norry, enemy of the American soldier, still blabs about how more must die unjustly for bin Laden with LIES, knowing full well, video of steel flowing like water from the WTC exists, and that General Ahmad funded Atta. George Norry is a traitor to the FBI, who further plans more to die sacrificed under the censorship of the tyrant antichrist. Who cares I ask about America truly dying as neoCONNED, for George Norry has millions to not take your calls for protection, and honestly, 'Americans' couldn't care much less for Our Humanity's future. Live free by defending liberty by killing pro lawless pro torture pro fascist bushite enemies my friend, live free by defending Yourself and GOD.

/ / The U.S. State Department recently issued a report calling Sudan a "strong partner in the war on terror." \ \

The high jacking Bush regime is supporting financially a TYRANNICAL 'government' that openly practices Genocide, as just the sort of "American" partner to assist in determining which further murder victims are terrorists. While the same demon administration confesses to FUNDING middle eastern al-Qeada to commit TERRORIST acts in Iran, as demon evil tyranny against the sleeping Sheeple. Again, it is fully confessed that the Satanic bushmob is pro terror now. Death to the enemies of Freedom, death to the bushite betrayers of Life instead of YOU my innocent friends. Instead of US.

/ / US 'used forced [SLAVE] labour to build Iraq embassy' \ \

Kill a bushite LIAR and be loved by God as Life is True.

DOWN WITH EVIL, UP WITH FREEDOM.

-

Love to God Gives US Strength

The Son of Man begs the Men of Earth to defend Ourselves from the unholy forces of our tyrannical enemies. Death to the ungodly bushite thieving LIARS, death to the ungodly enemies of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of Just causes. The THIEVING satanic bushite forces, speak only contempt for GOD on our demandings of the public execution of the boastful terrorists, like the bushite who video taped the murderous assault of OUR kidnapped bare footed children, or murdered Iraqis while desecrating ELVIS, done all to please the "escaping" satanic demon antichrist zionist, Our Mr. bush Jr., who with his private business partner, General Ahmad, actually committed the ungodly treasons of 911 in a land of blind men sleeping., according to the eternally Honorable FBI anyway.

To Kill a Bushite, is to be Heroic

To further murder as these ungodly bushite liars do today as our suffering Mankind, is to blindly swear public allegiance to the for real DEMONIC antichrist THIEVES. Bushite enemies are evil nazi dumfuk scum, liars who cowardly watch America in her weakness be high jacked, and squeak nothing for Just words in our REAL defense for dying. Play pretending their actually real men, because to really be so, requires real strength. Not bush bitch Marines "WHORES YEAH!" strength, where they cowardly can't figure to defend America from ungodly war criminals. War criminals who deliberately set them up with Satanic 'black magic' to be killed in criminal actions. P2OG. But see?, the bushite fodder, can't care enough for Life to read, because it already knows like the zionist, it's an ungodly coward and a thief, as siding to lying and censorship, this will out work for evil doers in the long run without any consequences to themselves as Our sworn eternal enemy.

Your Servant,

King Johnny Wizard
President and CEO

-

Why should WE continue to silently die unjustly victimized?, for the bushite's contempt of Mankind censored?, the Eternal Son of Man to GOD forever answers correctly. We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt. Bushite tyranny is a dead end road paved with missed opportunity. change your evil ways in other words, and join the living side that's light to know what we are, in deed, looking at here under the dying spoils of bushite, "we pay" misfortune. To hell with Satanic demon devil worship by the President of the United States, We, the People answer,

for now anyway, we have some really serious business just
presently, and we really don't need to be any more reminded
about Mr. Bush's satanic Devil, demon whoreship, of, "Molech",
a religion practiced to deceive America into sacrificing our
kids for cash with YOUR blood.... Tricked. Tricked. Tricked.

Hillary "[DEMON] Bush pulled out the inspectors."
[DEMON] Bush declared, "and he wouldn't let them in."

In Hell

Firstly, the White house doctored the NIE in an act of HIGH
TREASON.

Two:

CNN with Hillary acknowledges that the demon Mr. Bush pulled inspectors out of Iraq, but then... how is this not HELL to pay?

/ / Bush declared, "and he wouldn't let them in. And, therefore, after a reasonable request, we decided to remove him from power." \ \ HE LIED. Not the 'NWO', George Walker Bush, who Alex Jones tells US to look away, because he's only a puppet. Should not Bush be held accountable to the criminal actions he is PERSONALLY responsible for Christ asks YOU?

Arkansas GOP head: We need more 'attacks on American soil'
http://rawstory.com/news/2007/Arkansas_GOP_head_We_need_more_0603.html

Look, bushite DO exist as enemies of the Human.

800,000 Christians protected under Saddam, now killed under Bush
http://www.uruknet.de/?p=m33389&hd=&size=1&l=e

Look, bushite DO exist as enemies of the Human.

-

Neocon Soldier

Bushites who war as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

The Haditha perpetrators, if convicted, are looking at serving, maybe, a couple of years, for freely confessing to the targeting MURDER, of innocent women, men, and infants.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man. - The Son of Man, as the Man of Men,

Johnny Wizard

-

PEOPLE

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

Demon bush told us Saddam wouldn't let inspectors in, and that's why he irrationally started this war against God conflict. Impeach him, then have him PUNISHED for high treason against a further dying as truly unheard from America

- for that lie alone - we ALL could/should stand together as equals demanding re-dress for the innocent murder victims who've suffered for such contempt, and belligerence for the basic precepts of freedom as Justice, or G-D as Johnny.

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and South African death squad goons, all to war Love for the neocon god haters. Who, as peenacking atheists, as their very own documents stress, would murder anyone of US for a stolen nickel.

Our Mr. Bush Jnr. "The war is for you or for us [neoCONS] to win. If we [neoCONS] win it, it means your defeat and disgrace forever."

Die bushite die.

King Johnny Wizard
President and CEO

-

Kucinich for President!
http://www.democracynow.org/index.pl?issue=20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as sometimes, is terrified of those who seek the requirements to defend freedom directly, as more specific. (Example: NWO isn't the name of the specific guy who financed 911 to murder America.) So, as a consequence, he gets near ridiculous with labels applicable to generalizations only dummies could believe blindly. With Kucinich campaigning on ACCOUNTABILITY, Alex Jones looks quite foolish. But, he's still trying. Thank god for that. Thank god for that. Talk radio in America should take open line calls on our ideas about how to actually plan to defeat these, found factually to be, traitors to God and Country.

MSNBC Poll: Over 400,000 (88%) Say Bush Should Be Impeached
http://prisonplanet.com/articles/may2007/210507_b_Impeached.htm

See? Canadians who TRUST CBC would never know by Paul Hunter.

-

Bush Successful at Permanent Legalization of Torture
http://www.prisonplanet.com/articles/march2006/070306Torture.htm

/ / The truth is that the Bush Administration has used the McCain anti-torture bill to codify a policy of torture that is now embedded in our legal system for perpetuity. \ \

WE'D be hunting down those bushite liars who
torture innocent people to death for their satanic pleasures.
For, you know it does warrant the Death Sentence in America,

right? (You can thank Reagan for that...)

/ / In a move that hardly indicates that he was a terrorist plotting to attack a US government installation Tatar then went to the Philadelphia police department to complain that he was being pressured by someone into getting a map of Fort Dix and that he thought this had something to do with a terrorist plot. \ \

Didn't see this on our TV news either did You?

-

/ / On CBS' "Face the Nation," she claimed that intelligence errors before the war were "worldwide" even though the International Atomic Energy Agency's Mohamed ElBaradei publicly stated there was "no evidence" of an Iraqi nuclear program \ \

That from the 911 witch, who forbade a stop to hostilities IN AMERICA'S NAME against the innocent in Lebanon. Nazi Israel ADMITS to the targeting MURDER of any innocent persons who drive in a truck. Perhaps Americans. Who cares? Not CBC or CNN they'll tell you consistently absent from the crimes scene.

-

Pill popping American GI teens are becoming.. CRACKHEADS!

http://www.zmag.org/ZMag/articles/march02levine.htm

/ / Dexedrine affect the same neurotransmitters as cocaine; \ \

American grunts get FREE all the Dexedrine they can shoot

Do you know how a crackhead finds itself? Lost by indifference to the ultimate, only goal, more dope. Freedom Fighter? or crackhead WHORE, who hopes to find a dollar 'somewhere' to stave off it's crackmaster, the "American People", led by the un-elected demon dictator, our criminal Mr. bush Jr., as the true enemies of all Mankind. Bushites are on serious dope to be so dumb as cowardly accomplices to a traitor of themselves, that they would die as, before actually defending God's America - that they gave an Oath to.

I guess a soldier's word doesn't count for much in bushville.

The bushmob did 911 as traitors to God and Country, don't you know anything worth living for? my dying unjustly brothers and sisters? My friends, please fear not wisdom communicated by a REAL Man, for, we explain ourselves to the best of YOUR ability to listen simply. G. W. Bush used no evidence to form America's "conclusion" on who did US wrong on 911. So, Please, stop forsaking yourself, for, we're going nowhere. Support Johnny's call to demand open debate without censorship from the magic radio and TV execs, who hide in darkness, pretending to be our friends, while refusing intelligent dialog to answer any of our big troubles easily. Why? because largely, they're powerless without beating us down as giving 'Christ like' VICTIM so much - with their irrational ignorance for our survivals by the fittest. The fittest Ideas that rule this Universe, are the simplest, most easy to understand, but I digress about GOD'S greatness, for we know,. the corporate media elites as our voice, "Couldn't Care Less".

CBC just did a report about all the great heroin coming in from Afghanistan, that will still cause crime, and be illegal, (and maybe give you life in prison as an American,) but brought in with the help of the demonically evil bushite thieving murderous military, by the likely ton full to attack our direct family left un-protected, BY YOU PERSONALLY. And guess what? THEY, our media masters, couldn't care less if they actually tried to be our good guys. Reminder: the god guys is good, the demon liar antichrist demon enemies who thieve from Life with censorship is bad. If they hide ourselves too far, they loose all around, up and down. So get to it. Or don't. Your choice. Life lived Now, or damnable death by cowardly design brought forthwith under your own power to do nothing under such terrible costs against our suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. If they'd only allow US to have open communications, all our worlds would be better living for it.

Demand Coast to Coast hosts allow America to defend America.

I want air time with the one and only real man in these here parts, Mr. Johnny America, our glorious make believe creator of all we perceive religiously, self realized. He's a genius!

-

No evidence against an accused is US being truly abused

http://melbourne.indymedia.org/uploads/johnny-rocks.mp3
http://alacant.indymedia.org/usermedia/audio/12/johnny-rocks.mp3

Help me gain access to speak freely for open challenge against Hannity, and of America's Coast to Coast Radio network hosts, who deliberately deny you to contend, we're really, one hell of a great bunch of People persons with rights God damn them.

Death to the zionist bushite enemy forces

/ / After it was revealed by the Plaid Cymru MP Adam Price that British trained policemen had tortured prisoners to death with drills, we discovered, through the New York Times (!!), that American intelligence officers had been working alongside them at the Jamiyat police station \ \

Death to the zionist bushite enemy forces, death to the ungodly enemies of Man who torture innocent people to death for fun - expecting Johnny's America will not raise a word in defense for the Human race, or our guns to defend our loyal brothers to the cause of Justice. Death to the bushite, death to God's enemies who lie cheat and steal from Humanity to assist in the escape of those responsible for 911.

BASELESS?

/ / Prime Minister Stephen Harper "We will conclude a formal agreement so that we never again face these baseless allegations," he said. Thirty Afghan detainees have claimed they were beaten, whipped, given electric shocks and denied food once they were transferred to Afghan security forces by the Canadian military \ \

These demons who war for ZIONIST censorship are a bunch a dope pushing cop killers, who murder innocent people they call 'Taliban' better known as in Arabic - students.

-

Proudly kill the bushite who would drop from the sky,SEVEN MILLION landmines on our cities to kill our children for decades indiscriminately, while offering our Humanity to God no apologies. Proudly kill the bushite savages all to desperately survive ourselves creating a better world through fair, free market communications. To warring for Liberty as true Freedom wills, is for Justice understood as measured, not just made up out of nowhere for the pleasures of those truly Satanic. So spoke the King of being the wisdom we here revealed by statement of timeless fact. Good will triumph over evil. That's that.

-

Tenent "Lets everybody tell the truth."

It seems Tenent wants to inform us he actually meant when saying "slam dunk" - that, selling the war to the American Joe, without establishing any real facts would be easier than anything against the powerless as media unrepresented!

Bushite War LIFE Itself - and - They Couldn't Care Less

'Alpha company patrols the poppy fields.'
20070420_taliban28.mp3 (pbs broadcast)

"About the poppy harvest, currently gathering pace all around them, they couldn't care less." Instead they kill unarmed innocent people indiscriminately as enemies to ALL HUMAN LIFE.

They Couldn't Care Less

The 82 Airborne, in assisting in defending the world wide distribution and production of heroin, tells of murdering innocent farmers, that would never raise a gun in anger, are those they openly confess to target for first degree murder as labeled the, second tier Taliban. That's when not defending American Pension thiever ENRON'S pipeline managed under their extremist Muslim fundamentalist regime of intolerance for public communications, as the continuing thieving of 80 percent the Humanitarian Aid given by Canada to feed the STARVING, and school our children of the impoverished Afghanistan, as so reported. Eighty percent. 80. 80 percent

stolen. I'm telling YOU: CBC couldn't care less about what Canadian soldiers are actually dying as COWARDS for: "Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime" CBC national radio management needs to be arrested in Canada for high TREASON. Please, be a Patriot, and demand these zionists allow open communication with the facts to save the lives of Canadians soldiers they hold in contempt to die as the bad guys committed to no better good.

Occupation Forces support Afghan Narcotics Trade
http://www.globalresearch.ca/index.php?context=viewArticle&code=20070604&articleId=5514

-

/ / [...] the [New York Times] piece details the torture of [Innocent People] Sunni prisoners at one of the new American-Iraqi "security stations" \ \

Torture is a crime against God and Humanity. So, likewise, joyously, with pride, destroy the neocon traitors of Justice - for the true Love you have as Freedom willed - is as granted. Don't buy their demon lies by blind blanket false assertions, against YOUR Humanity's Innocence in tyrannical bondage, all done in to fool you believing, we have no rights to be heard in our presence - here existing freely. Therefore, to survive US all for something better, halt the 'escaping' murderous bushite thieves for God and America. SOLDIERS: Instead of dying for nothing, my wannabe Patriot Brothers, try joining Liberty's cause, which is our cause truly. Is it because corporate TV zionist money whores, are cowardly and ignorant, as evil hypno muggers, in MY dying for real America, that YOU refuse to speak Now in your Humanity's begging further defense?, on evidence being the only requirement to establish a person's guilt or innocence? for ungodly terrorist activities committed in our name by bushite bombers from the neo-conned AIR FORCE, who, as rotted juveniles, cheeringly bomb us People indiscriminately leaving a Church as something TRULY SATANIC? To dare, in our presence, continue threatening harm against an innocent child of wonder, not yet even born to God's suffering world? Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

War and the Police State: Complicity of the American People
http://www.globalresearch.ca/index.php?context=viewArticle&code=THO20070421&articleId=5454

/ / On September 11, 2001, corporate media and the government
elite launched an aggressive political and media campaign upon
and against the American people. \ \

-

Loyal bushie McCain as bona-fide nazi savage "Bomb bomb bomb Iran.."

Reporter 'Mr. McCain, you demon liar nazi fu-ker, don't you
think your being insensitive to innocent god loving Iranians?'

Pro-Torture of INNOCENT PEOPLE McCain "Insensitive to what?
The Iranians? My response is lighten up and get a life."

Johnny America Lyrics: "Can't an American PROUDLY kill TRAITOR
pro-torture Zionist McCain for the Love of living Life Justly,
as Freedom was Country?"

Investigating the Investigation
http://www.alternet.org/story.html?StoryID=17816

/ / After playing a tape of Cheney's statement, Russert asked
Daschle, "Did the vice president call you and urge you not to
investigate the events of Sept. 11?" \ \

PRO-TORTURE Gonzales "I quite frankly don't like the idea of
the Judiciary deciding who is on my staff." [at Justice]

PRO-TORTURE Gonzales "I did not make decisions about who
should or should not be asked to resign." [in mid-term]

As US State Attorneys?, whom have the most serious of American
Justice Department Motions of Defense for REAL Freedom?, he's
not concerned directly with?, nor would "like" democratic
Peoples to be allowed to care either?. IF he gets HIS way he
says - as minding for the criminal master. True, Americans
are generally, extremely cowardly as Bush's freely giving
PAYERS, led for more ungodly sacrifices in fascistic silence,
but this continuing charade of incompetence gathering against
our entire Humanity, is going way beyond acceptable to
everyone concerning. Johnny Wizard conceivers and otherwise
non-believers state together:

The Iraq war against Christ has no true justifiable cause.
Torture is against the law warranting immediate death sentences
The Zionist AIR FORCE bomb people indiscriminately as Satanic
The bushmob stole all the Development Funds for Iraq
The bushmob are stealing ALL of Iraq's oil
The bushmob stole 100s of billions from censored AMERICANS,

while George W. Bush personally stole 50 billion from America
in the first four months of stealing the initial election.

/ / "I grabbed her
little sister and put her in front of me . . as the bullets
began to fly, the blood sprayed from between her eyes, and
then I laughed maniacally." [, then were heard the cheers of
godless bushite dumfuk traitors obscening to God and Man as
the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously
kill this lawless bushite enemy and his demonic ilk, for our
love of girls everywhere? Or, how about the UNARRESTED
soldiers we witnessed on video beat shoeless children
pratically to death while laughing and cheering? Or like
those that speak zero defenses for Haditha's confessed MASS
MURDERING irrational women and child killers? The REAL demons
CONFESS to going into a house, WITHOUT reasoned approach, and
slaughtering an entire INNOCENT family.. for nothing but
their lifeless SATANIC pleasures. The 'cause'? "The [mass
murdered unarmed innocent neighbor's] back door was open.."
To, for God, gloriously, with love, kill these unarrested
murderous continuing ungodly bushite nazis, is to war the TRUE
enemies of Humanity to save the lives of our precious loved
ones.

-

So, the demon liar bush tells US, the terrorists would rather
travel to Iraq to kill Americans indiscriminately, than come
directly to America from wherever instead, to kill anyone who
silently supports the indiscriminate murder of our humanity.

Not as tyrants have we come, but as liberators
- Adolf Hitler, 1938 -

http://blogcritics.org/archives/2005/09/27/214145.php

/ / Why would [subhuman bushite] guards torture a man they
considered innocent? \ \ Because they are openly enemies to
Christ. I say, kill it for America when you can, God bless.

http://www.foreignaffairs.org/20060301faessay85202/paul-r-pillar/intelligence-policy-and-the-war-in-iraq.html

/ / "As the national intelligence officer for the Middle East,
I was in charge of coordinating all of the intelligence
community's assessments regarding Iraq," Pillar writes. "The
first request I received from any administration policy-maker
for any such assessment was not until a year into the war." \ \

Bushite will kill America

/ / At 9:32 he saw and heard a bomb destroy the offices of the Pentagon auditors. 40 military officers investigating the missing money were killed. The CTC was destroyed too. You can read more here:

http://johnmccarthy90066.tripod.com/id206.html \ \

-

Do you expect yourself to fail trying?

It's all up to You my friend, it's all up to you.

Onward Christian Soldier.

IDEA: Let's get our show up and running, by allowing open public investigations To be conducted internationally, with open line challenges, so we can publicly isolate each and every bushmobster personally responsible for 911, and then, all of everything else still left outstanding murdering ourselves. Whadoyahsay??

-

'We were torturing people for no reason'
http://www.iht.com/articles/2007/03/28/opinion/edmckelvey.php

..but for a bushite's Satanic pleasure,
death to the tyrant thieving bushite sadists,
death to GOD'S ENEMIES who war freedom in America to help escape
Our Mr. bush Jr. for the crimes HE DID with Ahmad on 911

-

http://www.commondreams.org/headlines05/1128-01.htm

Do we have a problem here in any way?

/ / A spokesman for Aegis Defence Services, said: "There is nothing to indicate that these film clips are in any way connected to Aegis." \ \

Not now according to CNN, bushite enemy Tim Spicer, and the Pentagon. This UN-NAMED spokesperson WILL be tried for aiding the crimes of first degree murder with it's lying racist nazi filth, who like getting away murdering black guys for fun and profit in iraq, paid for by A cowardly DYING AMERICA.

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun, paid for by the silent American tax payer. Americans refuses to bother making a simple phone call to Coast to Coast to raise some concern. THEY don't. They refuse to hunt bushite down in their streets for death to defend the innocent held indefinitely against GOD'S will. Death to the bushite, death to Johnny's godless, lawless, fascist enemies of FREEDOM.

Look, CNN, CBC, and FOx News know the bushmob did 911, but will smile while watching your son or daughter sent out to die CONNED by their demonic hatred for US freely communicated. How do I know this? I made the effort of making the phone calls.

"Al-Qaida" = "General Mahmoud Ahmad"

Defend freedom, and the FBI, by demanding Coast to Coast radio hosts allow free communications, absent their personal contempt for preserving freedom to be our America. George Norry WILL kill Your American child for the contempt he truly holds for our lives here. He says he only supports murdering Arab children for the neocon, but when your not looking in his 'shadows', he'll kill your child too, don't doubt it for a second.

"Al-Qaida" = "General Mahmoud Ahmad"

US Attorney's Firing may be [IS] Connected to CIA Corruption Probe
http://www.theolympian.com/101/story/71116.html

/ / On May 11, 2006, Kyle Sampson, then Gonzales' chief of staff, sent an e-mail to deputy White House counsel William Kelley, asking Kelley to call to discuss "the real problem we have right now with Carol Lam [...] \ \

-

pleasure of the president

US Attorneys don't serve "the pleasure of the president", they serve freedom lovers dedicated to defending America from willful criminality. But, americans are too stupidly weak to demand Coast to Coast hosts allow open communications on America's highest of concerns. Bushite america would rather, in silence, thieve from God as our Humanity, than serve the

protections of Justice as ourselves.

/ / According to the Islamic understanding of power, the Mujahideen don't compete for the positions in the leadership. \ \

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. The tribal strategy of Afghan fighters, where Allah is Oonerroh, seems to be not the only thing missing from the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top top top leader. Only "second" to Omar the Just. (Apparently an individual this current bushite incantation of "Dadullah" is totally un-familiar of.) Omar, the Just, whom Dadullah claims he receives his Top Secret nobody can see'im orders. In other winds: Bill a bushite for God and America, an all day long you'll have good faith in a world freeing ourselves of godless dumfuk tyranny implemented by the horribly foolish, as deeply ignorant of Allah, bushite demon liars for the traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering?

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm

telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

"Al-Qaida" = "General Mahmoud Ahmad" = "bush's ungodly partners in crime"

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for

clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys

secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

/ / The Mujahideen aren't students of power and don't compete for power like others do. We are students of truth and work for establishing this truth and for this cause we sacrifice our power \ \

-

http://www.godlikeproductions.com/bbs/message.php?messageid=355789

/ / Timothy Griffin, Karl Rove's assistant, the President's pick as US Attorney for the Eastern District of Arkansas. Griffin, according to BBC Television, was the hidden hand behind a scheme to wipe out the voting rights of 70,000 citizens prior to the 2004 election. \ \ Timothy needs to be arrested for high treason, for fixing an election, or instead, what? we'll make him a State US Attorney in bushville?

kill all of them

/ / In his testimony on Wednesday, Pfc. Bradley Mason of Company C said that on May 8, the night before the raid, Colonel Steele told soldiers to ``kill all of them.'' Three other soldiers gave similar testimony. \ \

I would offer rewards for more soldiers to come forward. Why? because there truly is, no honor among thieves. Every bushite soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People

running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American Soldiers to recognize such demonic behaviors in combat as worthy of immediate frag to defend the lives of truly fellow honorable soldiers. Soldiers ACTually, committed to freedom from godless satanic dumfuk tyranny of the antichrist demon, Mr. evil personified, the UN-ELECTED 911 TERRORIST, George Walker Bush and CO..

-

US officer "upset" Iraqi suspects taken alive, court hears
http://www.telegraph.co.uk/news/main.jhtml?xml=/news/2007/03/14/wsoldier114.xml

/ / they had been told to kill all military-aged males, a court was told Tuesday. \ \

Come on now, who wouldn't take great joy in destroying any and all such ungodly bushite hatred for Humanity in this light of day, eh? In fact,why don't American Congessmen, who believe in defending Liberty, campaign JUST that? Why not??? Is it because they're LIARS?

Like Coast to Coast's fun guy, he ain't taking our screams, George "pro Arab child Killer" Norry??

Rapists and torturers must not be allowed to rule our pirated authority through defending the further 'escape' of the bushmob for 911.

/ / As a result, the Defense Department put up a Web site in 2005 designed to clarify [to the dumfuk bushite demon liars] that sexual assault is illegal [...] \ \

Let's save some lives, what do you say guys?

Or, are we going to go further with this: George W. Bush: "If the absence of violence is victory, no one will ever win."

YOU

"If the absence of violence is victory, no one will ever win."
http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering answers to any question on the science of God as is pertains to Justice measured, but this is just who I am to be conscious man. So, if we can get over the shock of me being so especially normal, maybe we can then realize, I have some

simple good old ideas that transcend through time by rational understanding communicable between any two people. I am not a "miracle worker" to all those I advise to not eat Aspartame because it's a poison that also makes your body crave un-needed carbs, that will likely convert to more unless fat. So, it slowly kills you, while making you fatter than you need be along the dead end journey faithing in "the system". So, why do some do it religiously? Who cares (for now) but to say, our governments are failing US miserably. I spoke personally with one of the head scientists in Canada at "Health Food and Safety", and he told me the scientific analysis done by reputable scientists I found freely available repeatedly on the internet years ago, was completely true. (It breaks down to formaldehyde, and methanol (a slow lethal poison), among other shockers. Poison. P-o-i-s-o-n-s in our food stuffs. Poisons.) However, he could take no action to defend Canadians "officially" because we, Canadians, have our corporate interest news departments completely refusing to defend ourselves from corporate exploitation anywhere, and as natural consequence, we, as the dying world, would together unrepresented, probably lose a law suit from mutant Monsanto through the self inflicted bounds of OUR censored WTO program. - instituted through the top secretly mastered puppet people persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while entertaining. Weekend TV in North America totally sucks. Now, why do YOU think that is brother? The more powerless they make US, the more money the neocon zionists can murder Humanity for, thinking they might just get away from this if we continue to take no action in defense of anyone as God would will. Let me be Your servant King, by backing me up some here. We need some dollars to eat, and I need it now before we starve to deaths.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 10,000 security contractors for Bush are officially deemed lawlessly unaccountable to anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency water provision money

Look: Sattler OPENLY committed the worst war crimes of all Humanity's history

Support my cause, which is your cause.

Senior Military analyst, Rob Riggle "In the field John, the soldiers are out there, every day, risking their lives, for a common Ideal: that none of the President's decisions be questioned."

This is more true than a bushite would admit before murdering a honorable father to rape his young child, like Lcpl Boudreaux freely confesses. Boudreaux will tell you, openly, you have to murder the Arab father of the Arab child your planning to rape, because if you don't, that Father will spend the rest of this life, hunting you down in the streets to rip

you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that
Father's intent to bare on lancing Boudreaux, and any other
who would sing in it's ungodly defense.

Zionist american media celebs do tell, everyday, soldiers for
the neocon are all Heroes.

Please, my brothers, join me in hunting each and every bushite
present in this video down for death. For a Love of God that
will never end, until we have seen each and every responsible
child killing bushite present brought to true Justice extreme.

/ / British Soldiers beat unarmed Children

Men pick military as sentence
http://www.centredaily.com/118/story/29432.html

Great, more criminal heros to victimize Humanity for.

-

Giuliani told ABC's Peter Jennings on September 11, 2001

'..and I was operating in there [75 Barkley St.], when I was
told that the World Trade Center Towers were going to collapse.'

WTC TOWERS? "WERE"?

Civilization's ancient Founder Hammurabi,
suggested just to openly publicly have executed those who lay
capital allegations without any evidence, while working to
close outstanding criminal investigations. A made CRIME
within ourselves Hammurabi claimed, and by thinking such ways,
brought birth of 'Civilized' to an untamed till then, chaotic
confusion. Old becomes again anew, because Americans are weak
as polluted, and too cowardly to defend the rights of US
innocent. Let's change that. Support my climb to
international controversy, with my unchallenged claims of
direct accountability being sought, for the 911's neocon war
terror plot.

'A military judge ruled last week that Watada cannot base his defense on the war's legality.'

Telling US what?, that it is a crime to not commit a crime? It isn't only high treason against America the ungodly bushite are guilty of, but of a madness held by those truly Satanic..

/ / 'Why are you taking pictures? You don't have permission."' [...] the [bush whore] American, speaking through a translator, warned him that he did not want to see any AP photos published anywhere.\ \

No bushite was found gloriously killed for country, yet, they, the godless bushite enemy, continued to shoot innocent People indiscriminately for a distance of six miles, while likely, secretly masturbating each other as bushite liars do always.

The pro-bush irrational military said only eight innocent un-armed Afghans were counted as murdered deliberately, by those who believe our Mankind, can not ever find themselves accountable, without zionist controlled, corporate news permission. See? The military counts mankind as zionist, but I am a man of real men, committed to defend our world from all enemies, foreign, or domestic. Unlike a bushite traitor to God and America, who's word, as Oath, means as much to them, as we do. Ungodly as they are loveless, the bushite, is Life's enemy.

See my friends, this is why I, as the Son of Man beg and plead for all able bodied men, to kill treasonous bushite on sight, for every time you love God by defending the innocent from murder, (the innocent whom any pro-bush corporate professional hold in total self contempt,) you save REAL peoples lives, and you defend God's good name to love God as ourselves committed to true Liberty. Bushites are enemies of freedom, enemies of God, and worthy of death, before allowed to further bomb people indiscriminately like the commanders of NATO order day after day without risking instant frag because, bushites are blind cowardly thieving nazi fascist savages, brain damaged, who believe as satanic demon whores of Molech, they can con all of US including me forever, just like dare dubya. Dumfuks.

God is Great!

-

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

Former FBI Director Calls For New OKC Bombing Investigation

/ / The FBI man in charge of collecting evidence from the government building destroyed by the Oklahoma bomb has called for the case to be reopened. \ \

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege. Coast to Coast radio hosts need to be publicly challenged for debate they deny US knowing of together naturally speaking. Great example of our Problem: CBC National Radio, in Canada. When a caller phones during the very rare moments we're taking public words, have a pre-broadcast rig-a-ma-role question session, you'll have with not only the OFF-AIR screener, where he'll probe you for controversy, but after the first process of noting in book form your disclosed intel, will notify you that; IF your independent thought is granted by the "Producer" (- who reviews everyone - rules are rules -) Our national station will phone you back this afternoon, so stay tooned, to line you up with your baking gingerbread creds. They never ever dido! The more Brilliant you are, (like the highly charged as extremely charismatically charming, wild man ruler, Johnny America - the media phenomenoner) the higher probability they'll find POSSIBLE concern, on their do nothing for your taxed attitudes..!. Why take chances someone might show a greater living responsibility to a real suffering God as our left corporately forsaken Country?.?.?. A dying Humanity.

Look, seriously, my friends, we have all the answers to our problems.

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege of equal standing.

Get it done brother.

Help me gain access to speak freely for open challenge against Hannity, and of America's Coast to Coast Radio network hosts, who deliberately deny you to contend, we're really, one hell of a great bunch of People persons with rights God damn them.

Let's do this.

-

/ / KBR's Tiger Team stayed at the five-star Kuwait Kempinski Hotel, where its members ran up a bill of more than $1 million. This outraged the army, whose troops were sleeping in tents at a cost of $1.39 a day. The army asked the Tiger Team to move into tents. It refused. \ \

See? KBR is now privately running hospital care for the dumfuk grunts, so, what would you expect but rat infestations? Oh, you never truly thought... what being a "Liberal" or "Conservative" victim is. Are you pro Liberty, or pro tyranny is the question riddled really.

-

"For every fatal shooting, there were roughly three non-fatal
shootings. And, folks, this is unacceptable in America. It's
just unacceptable. And we're going to do something about it."

- President George W. Bush

Kill a bushite and God will love you for defending US,
the innocent in war time.

http://mediamatters.org/items/200702260008

/ / Wash. Post parroted White House claim that Iraq war was
authorized by U.N. Security Council \ \

Seriously, the propagandists responsible, need to REALLY, be
put to death after found out through US public court
proceeding. NO ONE would disagree that Iraq is a war crime,
where more than a MILLION INNOCENT PEOPLE have been raped,
tortured, or murdered by dumfuk bushite grunts. If YOU
actually think about it, all of everyone would gladly kill an
unholy bushite terrorist, before allowing it to murder
families running for our lives as loving Church goers.

-

Death to our Enemies

My friends, People are dying because the, Israel=Jew, magic
radio and TV crews, wont broadcast THE TRUTHS of our publicly
available findings. Police findings. People are dying
needlessly, illegally, irrationally like meaning really
stupidly on Bush's behalf, for they claim, we don't want to be
'embarrassing ourselves' with MY wisdom, You people seem to
not be there for God when the chips are way down, and truth is
plain to see.. 911 was an inside job, and CBC with CNN don't
want to tell us about it, but will watch our LOVED children
lied to, to go out and die further for a causeless war of
criminality unparalleled in it's wickedness.

http://arkansas.indymedia.org/usermedia/audio/4/us-vs-them.mp3

http://www.crooksandliars.com/Media/Download/14453/1/Greenwald-Colmes-Gaffney2.mp3
http://www.crooksandliars.com/Media/Download/14453/1/Greenwald-Colmes-Gaffney3.mp3

promoted through the tyranny of censorship

Corporate News America's Terror Expert, Gaffney, who publicly
advocates the rape and murder of the innocent in Iraq to
thieve from for the 'escaping' neocons, (as the truly
UNGODLY,) stated these words about why American Soldiers
continue to lawlessly DIE sacrificed for no better good or
reason understood, as total willing dumfuks under deep
hypnosis:

"It is not George Bush, it is not the Neocons"

"," = swinging pocket watch

Don't let these neocon zionist bastards doe this to US.

Any Commander that doesn't support the arrest of those
responsible for 911 and the subseqent neocon war crimes of
Iraq, is a traitor to God and Country.

How much much God take as taken, before you people get on over
this criminally empowered war monger Congress of an unelected
lawless dictator demon, and call them out on the turning talk
commercial radios, all to finally truly defend ourselves with
a good media plan for results.

Make the call, be a man.

-

Sir Ken, head of the Crown Prosecution Service

"The fight against terrorism on the streets of [..] is not a war. It is the prevention of crime, the enforcement of our laws and the winning of justice for those damaged by their infringement."

You got that right. So, join US in demanding the quick trials, and public executions of known bushite enemies who murdered Americans on 911 with general Ahmad, and who with Peter Powers, murdered the innocent in Britain for more stolen goods against God. And anyone in the air force as bushite bombers should be a great joy for US all to hunt for prosecuting too. The bushite dumfuk is an enemy to our lives, with it's blatant naked contempt for the innocent, who like the demon liar THEIVES at CJOB, George Norry, or Hannity, will forbid ANY human defenses of the lawless dictate of the IRRATIONAL tyrannical demon antichrist, all so to victimize more of You as the censored forsaken.

REPENT. [from the Greek, meaning to think.]

The TRUE Son of Man Johnny Wizard Exists Born to this Eternal World to end permanently demonic bushite enemies of Creation. Help Life out by destroying cowardly America's greatest threat to the Species, the greatest threat against Humanity's Freedom to be Loved by God. Corporate nazi zionist bushlores at CBC, CNN, and criminal thieving from the desperately poor in Winnipeg CJOBers forbid open communications, and I can't 'take over', because then I'd be defeating my own, power to the Peoples argument. So, it really is up to YOU, yes you there... reader. Who.. really..? YOU, here, now. Life begs, takes a stand for your fellow man, and demand our voices heard for the defense of the entire human race. And be quick about it. Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who attempted to murder the American Congressmen who thought going into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by

tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand why we are innocent until proven otherwise?, is really something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he played no part whatsoever in 911, then later, offered himself for arrest, confident he would be acquitted. Not corporately newsworthy though, so, few even know why their American child was later died in the terrorists act of corporate contempt for US living Freedom with something greater as real Justice wills

-

Again, my friends, Art Bell and George Norry have thousands of bushite dumfuk in America that will phone them to tell US how greatly they are to have no care for dying freedoms in America. While when the humans call, Art Bell for example, between breaks, when privately screening his calls, just hangs up on anyone he fears might articulate things like Ahmad funded 911's Atta, according to the FBI, in defense of America. I say, we at LEAST, talk about putting them both to death for treasons against Your Life dying teen soldier, wannabe Patriot. Make sense?

Unhinged and unfit for office
http://www.dailykos.com/storyonly/2007/2/15/105017/202

Protestor's sign:
"killing innocent people is the problem not the solution."

(snpd)

My friends, People are dying because the magic radio and TV wont broadcast our publicly available findings. Police findings. People are dying needlessly, illegally, irrationally like meaning really stupidly on Bush's behalf,

for they claim, we don't want to be 'embarrassing ourselves',
leaving our forsaken Johnny Wizard's Wild Wow World of Wonder
Wording Wees!.. mostly just appreciated by myself as sole
surprised spectator, because you people seem to not be there
for God when the chips are down, and truth is plain to see..
911 was an inside job, and CBC with CNN don't want to tell us
about it, but will watch our LOVED children lied to, to go out
and die further for a causeless war of criminality
unparalleled in it's wickedness.

Do you expect yourself to fail trying?

It's all up to You my friend, it's all up to you.

Onward Christian Soldier.

-

THE "IRANIAN" 81MM MORTAR WEB PAGE IS A FAKE!

/ /the traceroute traces the IP not to a business, but
to a university! \ \

-

Wuterich "shoot first and ask questions later"

Wuterich "shoot [defenseless innocent women and children]
first and ask questions [from the corporate zionist pro-kill
anyone for a stolen nickel propagandists like demon enemy
AIPAC Hannity, George Norry, or, censors his calls for neocon
war criminals traitor Art Bell] later"

http://www.globalpolicy.org/security/issues/iraq/occupation/report/atrocities.htm

/ / commanders may give orders to ``shoot first and ask
questions later.'' \ \

This is why the Son of Man through God begs the Peoples of
Humanity to kill on sight, the enemy bushite betrayers to
Life. Ourselves, the innocent. These soulless grunts don't
destroy such deserving commanders, Like Blount, Sattler,
Russell, Wuterich, Pantano or even Kimmitt, and instead, as in
Fallujah, murder every woman and child present, while stealing
all our given monies for desperate life saving help. Anyone
in the Air Force deserves to be justly put down, for, I've
NEVER seen any legitimate bombing campaign, but for to kill
People indiscriminately like NATO regularly does with
radio-active toxic waste, while then sending in the dumfuk
Marines, or the 'from the coast' Canadians, who of course,
rightly get killed on the ground in retaliation for such blind
evil stupidity. Please, I beg, help Iraqis, and kill the
bushite thieves to defend our forsaken God. American
children, help me my loves. Please don't allow the bushmob to

escape for the treasons against America on 911, for, bushites
are OPENLY traitors, as the TRUE enemies of evidenced Justice,
as the Freedom to do our own things loving God on our own.
Besides, most bushites aren't even registered American
citizens. Bushites need to be hunted down for destruction -
by the Loyal Christian American Patriot Soldier, the ones who
war to win against those who torture US innocent to death as
the ungodly Satanic LIAR enemies. Save the Humans, kill a
bushite false accusing traitor of American Freedom To-day, and
become a real Man in the presence of Johnny America, an actual
Man of Men, Lord of Lords, and King of Kings.

McCain is insane
http://www.codemonkeyramblings.com/2007/02/they_say_that_insanity_is.php

McCain speaks NOTHING to demand the
execution of hiding as 'British' soldiers who on prized video
tape, beat to death young barefoot children for erotic fun,
nor on mercury vaccines not banned minus "The President" in
name. BANNED.

Sorry everybody, but that's the way it's gotta be for my Life
to have meaning terms.] Long story short: Females Rule, and
wiseguy Johnny is Freedom King for this moment Being.

Please help God.

We have to overhaul how all our national news Podcasts are
assimilated through corporate nazi zionist censorship. Art
Bell and George Norry are enemies to ALL american teen troops
put in harms way to die as bad guy irrationally for the neocon
God betrayers. Why? because they purposefully lie to have
YOU die as innocent murder victim. Death to the bushite,
death to God's enemies.

Be a friend if not an enemy,
Your buddy,

King Johnny

-

How is a Zionist Jewish?, I, the King of the Jews Messiah ask
my fellow brothers and sisters everywhere. How? FOUR million
land mines in Lebanon a godly act is it? Jew only roads not
Aparthied, nor stealing a Christian's Home I suppose..? How?

An Oath Every Soldier Swears To God With

/ / she told The Nation. "If I contribute to the Army's
prosecution of Lieutenant Watada on speech-related charges, I
will have colluded in suppression of speech. What could be
more hostile to the ideas of a free press than that?" \ \

Again a Patriot Soldier whose only crime is that he refuses to commit a crime in Your name. Do something about it. You defend this Patriot American Citizen as if Your America depends upon it. The "Judge" who publicly forbids to hear Watada's freedom defense, an Oath every Soldier swears to God with, is a "Judge" who needs to be privately arrested for treason against YOURSELF. Support my call to demand our voices heard for Just causes, or go die silently to the grave prisonized in a military dictatorship your 'neighbor' will say quietly of, (under his bushite breath,) good riddance to caring where my pusher's overdue payment goes to??. who the kcuf are you?? ... Eiiiaaahh! Jesus kills bushite for breakfast.

- On yet another, praise be with US, Alex Jones News Podcast -

Bob Watada: "He did his own research, and he found that there was not only deception, but clearly lying by the commander. Now if YOUR boss lied to you, and put YOU out on the line, so that you can get KILLED, what would you do?"

A Public Letter to the "American" Coast to Coast Radio Network:

1. We, as the People, demand you allow US, the human species to openly discuss the public evidence on who funded the terrorist acts of 911 according to the FBI. And full disclosure on the science of building Seven.

2. That the Iraq war never had, nor ever will have a justification.

3. Also, that mercury tainted vaccines are deadly stupid. Mercury is scientifically understood, without question, (no doubt) to be a neural-toxin

You must wake up to life's demand for you to defend our dying lives my friend. Please? Make the call, be a man to defend our women. Be a man to protect our children.

Support our call to be heard my brother.

That's all.

-

Iran prepares first nuke strike
http://www.menewsline.com/stories/2007/january/01_15_2.html

See?, demons exist!

More settlers videos: "We killed Jesus, we are proud of it!"
http://www.uruknet.de/?p=m30420&hd=&size=1&l=e

Remind the Son of Man to hunt them down for better good as we together are, why don't You see? I'm Your brother!

-

/ / State Department spokesman on 24 January, "that Iranian agents are involved in these networks and that they are working with individuals and groups in Iraq and are being sent there by the Iranian government." \ \

We all know Iran has been trying to help Iraqis openly, so then, what does such willful contempt for your life grant this 'spokesman'? Or, how about when Bush stated Iranians in Iraq deserved to be murdered? (Later, the demon re-worded himself in attempt to conceal HIS true evil identity.)

Remember the Bathists actually warred to kill and won against al-CIA-duh forces that were caught hiding in Kurdish territory. Killed "bin Laden"/bushite forces! Now, bushite tell US Sunni is in kahoots with Laden. (In otherwords, Kill a cowardly enemy of Life bushite for America to defend Iraqis as a godly act.) Death to the bushite, death to our enemies.

/ / Tariq Aziz, the Christian Iraqi Deputy Prime Minister said in mid September that Baghdad had provided assistance [to kill bushite "al-qaeda"]\ \

-

Great words from the lawyer of the thieving bushite child killers of Haditha

/ / "There were Harriers dropping 500lb bombs on buildings. If they're dropping 500lb bombs without knocking on the door first, how can you argue the troops on the ground did anything wrong?" \ \

5000lbs of radio-active toxic waste that will murder for years more like, while after, then striking again to get the god helpers and screaming children, then even, as in Fallujah, going house to house to murder every one, young and old as the truly Satanic. Just obeying lawless orders to thieve from Humanity as bushite for neocon zionist traitors of G-D doesn't fly in the big book. When anyone kills a bushite, all humanity benefits truly from the defense. You defend a real suffering God by ending a soulless bushite threat against our species.

Bill Sattler.

-

http://www.informationliberation.com/?id=19646

/ / to think that these could have been just dumb ideas or incompetence. \ \

Bushite TRAITORS got rid of the ORHA plan.

-

Exit strategy to save the lives of dying Americans:

War bushite LIAR zionist repuglicons who did God wrong on 911

War bushite who LIE to American Sons and Daughters to not hunt
those who stole billions with ear-marks, Social Security,
no-bid contracts, Iraqi oil, ect.

War those who stole the Iraq Development Fund, and the
emergency monies left to save the lives of our dying children

War bushite who feed soldiers radio-active toxic waste as harmless

War bushite who support torturing the innocent to death

War bushite who sing about the joys of murdering Iraqi children

War bushite who beat to death barefoot Iraqi children

War bushite who jokingly beat lamed dogs for fun

War bushite who claim they are lawlessly un-accountable as liars.

War bushite in the air force who target bombing innocent People
like in Fallujah or Somalia with land mines and mini nukes

The godless as lawless bushite is the enemy to America, kill
it proudly for freedom, as an undying love for a real God and
Humanity.

-

/ / she told The Nation. "If I contribute to the Army's
prosecution of Lieutenant Watada on speech-related charges, I
will have colluded in suppression of speech. What could be
more hostile to the ideas of a free press than that?" \ \

Again, a Patriot Soldier whos only crime is that he refuses
to commit a crime in Your name. Do something about it.

Real Americans are those of US as humanity that believe
in liberty as Justice for all. Demon bushite nazi
whores, don't like those principles of freedom through
evidentiary findings though, for their false deity,
George W. bush Jr, wouldn't be stealing from the honest
hard working blokes who live for a better day that way.

/ / Four US oil companies, namely Conoco, Chevron, Amoco and
Philips have concessions in nearly two thirds of Somalia.
This quartet of oil conglomerates was granted these contracts
in the final days of Somalia's deposed dictator, Siad Barre.
The US first military engagement in Somalia was fully
supported by Conoco. \ \

In the new world, these soulless bomber bushite of the air force, responsible for blatant first degree acts of murder against the innocent, would be hunted down by Humans, tried, then executed gloriously in the defense of our living justly.

-

/ / Al-Maliki has promised he will no longer block action against the Mahdi Army militia \ \

So, is the block head saying American soldiers so far have died for lawless tyranny? Kill a bushite, to protect the lives of us as innocent victims in other words, right?

-

How Bush misled the world

http://www.theage.com.au/handheld/articles/2004/02/05/1075853996640.html

/ / Once the document was declassified after the war it became known that it contained 40 caveats - including 15 uses of "probably", all of which had been removed from the previously published version. Tenet further ingratiated himself by remaining silent about the OSP. "That's totally unacceptable for a CIA director," said Thielman. \ \

Thielman meant "totally unacceptable" as in HIGH TREASON. Could it be any higher? Deliberately caught misleading whore-dumb Congress to wage his immoral neocon 'escape' with a unjustified criminal brutality against God as all of our Humanity. A great deal more than a million innocent people have been victims to the 'targeted' Zionist killings of the irrational bushite enemy. Lawless enemies to Creation, spreading their toxic waste who thieve, rape and murder without reprimand from corporate news america, shall, I pray daily, die justly in vengeances by the will of a real undying Love for our victimized innocent family. Justice for Humanity.

Please, help US.

Let US demand open radio communications on the mathimatical facts to save our own selves further victimhood to their personal contempt for the true value of YOUR life. Thanks.

Can you help us speak this outrage to your local media outlets?

thanks again bud.

AFFIDAVIT

AFFIDAVIT OF JOHNNY WIZARD

I, Johnny Wizard, in the city of Winnipeg, Province of Manitoba
MAKE OATH AND SAY:

1.

Pakistani ISI Director General Ahmad orders an aide to wire
transfer about $100,000 to hijacker Atta. Ahmad later resigns
after the transfer is disclosed in India and confirmed by the
FBI. [Dawn, 10/8/01, Times of India, 10/9/01, Wall Street
Journal, 10/10/01, AFP, 10/10/01]

2.

On March 3, 2002, MSNBC's Jim Miklaszewski reported that he
had received anonymously, top secret presidential war strategy
documents dated September 9th, 2001, originating from
Condolezza's office, outlining a strategy to invade
Afghanistan premised on blaming bin Laden a terrorist, but
providing no evidence

3.

RTI News - US rejects Taliban bin Laden evidence calls
21 September 2001 17:41

The White House has rejected requests from Afghanistan's
ruling Taliban for proof that Osama bin Laden was responsible
for last week's attacks.

The US Government said there would be no negotiations.

4.

[This following document was the official damning account]

Responsibility for the terrorist atrocities in the United States
4 October 2001
http://www.pm.gov.uk/output/page3554.asp

[This Internet Domain is Britain's Prime Minister's]

"This document does not purport to provide a prosecutable case
against Usama Bin Laden in a court of law."

The document doesn't hold ANY case, as that was the strategy.... See?

5.

Investigating the Investigation

http://www.alternet.org/story.html?StoryID=17816
"Did the vice president call you and urge you not to
investigate the events of Sept. 11?" Daschle flatly
contradicted Cheney: "Yes, he did, Tim,"

6.

ABCNEWS.com : FBI Called off Terror Investigations
http://abcnews.go.com/sections/primetime/DailyNews/FBI_whistleblowers021219.html

Two veteran FBI investigators say they were ordered to stop
investigations into a suspected terror cell linked to Osama
bin Laden's al Qaeda network and the Sept. 11 attacks...

`You Will Not Open Criminal Investigations'

7.

October 9 2001 - The Times of India

"While the Pakistani Inter Services Public Relations claimed

that former ISI [the "Pakistani CIA"] director-general Lt-Gen
Mahmud Ahmad sought retirement after being superseded on
Monday, the truth is more shocking.

8.

No evidence was brought against Laden for nine eleven, none. [So according to Bush's official top secret Presidential directives] While Laden himself claimed he played no part in 911. Still, to save the lives of third worlders on the brink of starvation,

9.

former FBI deputy director and murder victim John O'Neill

"the main obstacles to investigating Islamic terrorism were

U.S. oil corporate interests and the role played by Saudi Arabia."

10.

Alex Jones interviewing Former German Defense Minister Andreas Von Buelow

"Bush signed W199I months before 911 ordering the FBI not to stop Al-Qaeda. They threatened to arrest FBI agent Robert Wright if he tells us what he knows."

11.

Mr. Bush was quoted somewhere regarding Mr. Laden's guilt of complete innocence with "We don't need any evidence, we know he's guilty."

12.

www.govexec.com/column/forwardTodaysColumn.cfm?sectionID=14

" [FBI's] Edmonds concluded that documents clearly showed that the Sept. 11 hijackers were in the country and plotting to use airplanes as missiles. She said documents also included information relating to their financial activities. "

13.

The honorable Argentinean oil company Bridas' relationship can not be understated as the Bush Administration's primary motive on criminal invasion of Afghanistan to save his biggest corporate backers, the American pension thieving Enron.

[snpd]

33.

Blix nor Elbaradei, nor Kofi, suggested, implied, or stated, that Iraq had failed to comply with the newest U.N. resolution: 1441.

HANS BLIX: "And at this juncture, we are able to perform professional no-notice inspections all over Iraq and to increase aerial surveillance..."

With complete, one hundred percent access to go where ever the Bush Administration pleased without delay, left a situation of an unjust war only detrimental to an ability to bring about any good or better thing. American soldiers are being sacrificed for no better good or reason understood, for if progress will ever be made, it will be when they work to bring about a political situation that was there in Iraq before the Bush Administration starting murdering innocent people for nothing . Well, not completely, for Bremer shipped 19 billion to Greenspan early on, then, hundreds of millions were sent back.

34.

Professor Steven E. Jones, a tenured BYU professor, went public several weeks ago after releasing a 19 page academic paper, essentially showing how the laws of physics do not support the WTC's freefall[...]

35.

"To be truthful about it, there was no way we could have got the public consent to have suddenly launched a campaign on Afghanistan but for what happened on September 11..."

Tony Blair Speaking To House of Commons Liaison Committee

36.

The Washington Post, 23 September 2001.

At American urging, Ahmed traveled ... to Kandahar, Afghanistan.

-

Since I am representing myself on these particular criminal matters, snpd I would request legal assistance from the Court in these following areas.

1. National Security Issues

<BIG SNP>

> masses.

The naivete of this statement This decision wasn't made by the masses. It was made by broadcasters. Broadcasters seeking to control content local market citizens have access to--one of two Holy Grails of broadcasting since the invention of the medium. (The other is subscription radio--watch your etherspace for this development.)

If this decision was actually made by the masses, it may be a different story. And it may be less caustic going down. But it wasn't. Make no mistake, this decision was made by broadcasters, seeking to limit choices.

What you fail to realize, here, too, is that there is another interference problem with HD....when a station out of your market interferes with your LOCAL station. That's not a DX situation...and it's happening now, today, this minute. I'm experiencing it personally. And it's been reported in the trades from DC to LA. It's been in editorial columns in local papers.

It's a real issue.

And imagine the results at night.

Then there is the issue of shortfalls in the HD pattern in the local market. Reports of 60% coverage and less have been coming in for a while, now. Leaving non HD reception areas subject to the same noise, interference, and unpleasant artifacts, as well as poorer audio.

The facts, as they are coming in, appear that HD, especially on AM, is not living up to the promise, and will be the final nail in the coffin of MW broadcasting. Allowing the spectrum to finally be closed, auctioned off, and content moved to FM where it has a chance of commercial viability.

But this is not about what the masses want. Of even care about. If it were, there would be no end of commercially available HD receivers and they would be flying off shelves by the tens of millions.

The masses simply do not care. And as the months drag on, they appear to care even less.

One thing I've been saying since the HD radio noise began, is that for HD to take off with the public, there would have to be an FCC mandate that HD be included in all receivers, or that a cutoff date be made for analog radio. The same way as television.

September 14th, there will be something equally as effective, as AM HD begins to reach into the hours of greatest propagation. The only way to filter out the crap that's skipping into the local market, will be through a digital receiver. We should know within 30 days, if the increased trash on the bands will have a measureable effect on the public's listening, HD adoption, or both.

But the only ones who appear to care about HD radio, at least as of today, are the broadcasters, and the purveyors/licensees of the hardware and firmware that make HD (more or less) happen.

Big (Corporate) Brother making decisions for the mass.

And look at all those defending his actions.

Orwell has to be laughing his dry, wrinkly ass off.

"September 14th, there will be something equally as effective, as AM
HD begins to reach into the hours of greatest propagation. The only
way
to filter out the crap that's skipping into the local market, will be
through a digital receiver. We should know within 30 days, if the
increased trash on the bands will have a measureable effect on the
public's listening, HD adoption, or both."

No doubt, consumers will continure to shun HD Rsdio - they will have
no clue, nor care about what is happening.

Did you notice that WTWP has had their IBUZZ exciter off for days ?
Now, I can hear WTRI without buzzing again !

Yeah, I've heard the buzz on some of the DC stations, but thought is
was probably due to some noise source local to my neighborhood.
There's lots of stray noise on the AM band these days, so I simply
ignored the buzz as best I could. If a station was (or stations were)
responsible for this, shame on the engineers running the equipment.

Total bullshit - no one is listening: Yea, that is why iBiquity is
looking at other aternatives for revenue:

Our Tejano network is generating revenue and considerable listener response.
We are just in the first months of this, and the results are encouraging. We
get lots of calls from people who report that they have bought radios to
listen, and our morning talent gets as many calls from the HD markets as he
does from the one market where he is on a "regular" FM.

Charklie,

It is always good form when you are posting something
For Sale / For Auction here on "Rec.Radio.Shortwave"
to also cross-post it on "Rec.Radio.Swap" .
http://groups.google.com/group/rec.radio.swap/

sort of covers both bases ~ RHF

DD - The Engineers are doing the best that they can with
the IBOC Transmission Scheme; which uses reduced
Analog Bandwidth and Extended Digital Side Bands.

It is the IBOC Technology that is the Problem especially
when you are using an Analog AM/MW Radio to listen to
and Analog Signal coming from an "HD" {IBOC} AM/MW
Radio Station that also has an "HD" {IBOC} AM/MW
Radio Station on both Adjacent Channels : one 10 kHz
above; and one 10 kHz below. You will notice the Digital
Hash. When this happens and it will for many AM/MW
Radio Listeners in the future. Your 'choices' are :
1 - Tune to a different AM/MW Radio Station
2 - Change to FM Radio Listening.
3 - Buy an "HD" {IBOC} Radio and then Listen to your
Favorite AM/MW Radio Station in "HD".
The AM/MW Radio Stations using the IBOC Technology
'hope' that you will do # 3.

FWIW - A couple of the posts that I have read else where
have basically said that when the Poster had the Digial
Hash problem with their favorite AM/MW Radio Station;
and went out and bought a "HD" Radio; the "HD" Radio
reception was as good as and usually better sounding
than the 'old' Analog AM/MW Radio Station prior to IBOC.
- - - Sounds like back to Square-One at a higher cost.

For the common {average} AM/MW Radio Listener :
at Home; in their Car; or at Work in an Office. Who
lives in an Urban Area with good Signal Levels : IBOC
as a Mass Media Technology may provide a better

Radio Listening Experience.

But for those AM/MW Radio Listeners in the Suburbs
and Rural Areas with limited Listening Choices and
weak Signal Levels : IBOC as a Mass Media Technology
may prove to be a Radio Listening Experience they
find lacking.

FM "HD" Radio and the FM Radio Band Plan are a
different matter. For the common {average} FM Radio
Listener : IBOC and "HD" FM Radio should provide
them a better Radio Listening Experience in all areas :
Urban; Suburban and Rural as IBOC is fully adopted
and the HD Signal Level is increased to fill-in the
Gaps of the Digital Broadcast Signal Coverage.

that's my assessment ~ RHF
.

RHF:
HD radio is going to have to do much better than present to get me to listen to it.
As I told Eduardo I went to the local Radio Shack for a demo, and receiver couldn't decode it. That was the Rhapsody $100 set. The stations were the local 1kw stations (1400 and 1450 KHZ) and all that was shown is the blinking Blue light. The transmitters are localed about 5 and 10 miles from the Radio Shack location.
Now I regularly decode the Radio New Zealand DRM signal with few drop outs using my TEN TEC 320D, as well as the Sackville relay in CANADA which includes Radio Netherlands, Canada, Vatican radio, and TPD Radio which is sent out in 20KHZ stereo! This is at my QTH in Tucson using my home made 25 foot inverted vee.
However, DXing from 5 miles away is not a good sign. Plus there are no truly portable HD radios for sale yet. I do most of my listening while hiking or biking. I use a Sony radio to also receive sw while on the go also. I won't be tether to my home or car for local radio. I go to satellite radio first.
I have stopped regularly listening 1400 and 1450 because in analog there signal sound terrible due to the 5kHz bandwidth. It reminds me of listening to the telephone music while you are put on hold. In my car (JEEP) I have a Infinity Gold AM stereo and FM stereo and the 1400 station used to sound great in AM stereo, but since they switched to HD I can here the HASH and reduced sound, and have stopped listening. I can't tell any difference on the FM, but I don't have to DX FM to receive it.

"When this happens and it will for many AM/MW Radio Listeners in the future"

Won't last for long - AM-HD is DOA:

If it's local pickup the potential buyer can check the radiio out. He if he no likeee, he no have to buyeee.

$600 for an R8B? I'd be picking it up if I could and more than likely double my money on eBay.

Isn't the firm he works for an Ibiquity investor? As with many things, one must follow the money.

I seem to have noticed that to some extent on WLS 890 out of Chicago. Perhaps Mr. Maus, who is closer in can give us his experience with that.

Perhaps his internet provider has access to news groups for him to use.

I only use Google groups as a "back door" when my internet provider drops
the ball from time to time.

Wow! Homey can get China being rebroadcasted from Canada. You must
have some killer gear.

BTW: 9-11 happened because Bush wanted a new Pearl Harbor and sat on
his hands.

The investment was less in cost than the last new studio we built in LA...
one single studio (out of 16)... so the issue is not the investment, which
is minor. The issue is moving terrestrial, free, radio into the digital era.

"IBiquity Digital's Make-or-Break Point Approaches" February 2005

"If we had this conversation seven years ago and you were to tell me
that in 2004 this company would still be private and raising funds,
I'd probably have keeled over, said Thomas Uhlman, a managing partner
at iBiquity's largest shareholder, New Venture Partners LLC"

Of course, Univison is an investor/supporter of this HD Radio farce,
and that is why Eduardo shills 24/7 for HD radio - he knows that the
radio-geeks need to be convinced first:

"Worldwide Radio Wrestling!"

"The number of Spanish-language households in Austin [that] have
bought an HD receiver has to be close to zero." (It's worth noting
that Border Media Partners doesn't have Web sites for its stations,
either, so maybe it's not the best gauge of cutting-edge technology.
Spanish-language giant Univision is supporting the launch.)"

That's most likely because you're trying to squeese "hi-fi" into +/- 5
khz worth of bandwith.
It's why your audio's going to sound like a crunched up Real-Audio
stream.

I think you're missing what I'm suggesting....I don't think you
want to overhaul your programming to target older demos. But I do think
it would be wise to include them. For a music station, that wouldn't be
much more than a few carefully selected songs, and a delivery that
acknowledges the listeners with some miles on them. For talk, it may be
no more than simply taking a few mature calls.

When Michael Packer was programmer of WLS, a memo went out that
there were to be no callers who didn't sound under 35. Well,
c'mon...you're talking political content, local controversy and Chicago
related issues, you're going to have people over 35 listening. Still,
they weeded out the calls. A copy of the memo hit Feder's desk at the
Sun-Times and the fit hit the shan. Now it was a public matter, and
there was no end to the reaction.

Now, I know what he was going for. But the fact remains that
there is a segment of the audience, a sizable segment, at that, that was
simply excluded from participation. All it would have taken is a few
calls from older demos. Nothing dramatic. But a good call is a good
call, if it happens to be from an older listener, without changing the
content of the conversation...why make the exclusion if you don't have to.

When Kipper took over, things changed. There is a balance
again. And I'm sure there's a proportion of demographic representation
on the calls, but there's clearly no hard cut-off, and upper demos are
served.

When LeeAnn Lewis was GM of KMBQ, she mandated that no disk jockeys put callers on the air younger than 25. That didn't, ultimately, serve, her, either. One of the hottest things for a parent to do was to put their kid on the phone to the radio station. Getting their kid on the air was a high for them. Cutting that off, also cut off a lot of response from their target demo, 25-49, because that's where the young parents were. The station fell, rapidly, from grace.

Serving out-of-target demos need not be something that requires dramatic, or even significant program content changes. A little fringe attention. Widening the niche, as it were. Sometimes, acknowledgement is all it takes.

Older demos, especially, don't suddenly start listening to Tommy Dorsey (one of my all time favorites, btw) just because they hit middle age. And they don't get locked into The Grateful Dead just because they lived through the Dead's heyday. Older demos are like everyone else, just more experienced. They still sample new music. They still see new movies. They still laugh at contemporary commentary. Not acknowledging that is shortsighted in the extreme.

My G/F and I listen to Tommy Dorsey in the car. Along with Pink Floyd, Gary Puckett and the Union Gap, Psapp, Rilo Kiley and dozens of others. I also listen to Classical, and traditional jazz. She also enjoys standards redone by Robert Downey, light classics and today's hot hits. So the iPods get quite the eclectic workout. We both get today's humor. We both follow today's street. We're both politically active.

And we both spend discretionary income on products advertised by local radio stations. Stations that prefer to ignore us.

Similarly, my friends and colleagues have not stopped living because we hit 55.

And to service us at Radio takes so little. And requires no significant change in content. Just because we hit 55 doesn't mean we overhaul our tastes, start carrying mothballs, or dress like Aunt Pat's couch.

Presenting that to your stations should be simple. Presenting it to your advertisers might even be unnecessary.

Again, even in that scenario, I've done work that directly contravenes this station. I"ve seen it done every day. Even with big agencies, even with media buying services.

In which case, the agency would have influence, and you would
have, through the agency depending on your salesmanship, relationship,
or choice of drinking buddies, influence, as well. Some of the most
important changes in media buys, when I was with Cook Inlet, took place
during the prayer meetings in the Chapel at the bottom of the Hancock.
Two or three sacraments is all it took to get the ecumenicals started.
You had the Sales and General Mangler from the station, you had reps
from two or three agencies, and you had a LOT of tequila. Seeds were
planted (in more ways than would be polite to mention here) and things
got changed.

It happens every day.

>> We got on their buys. Through ups and downs, through manglement

We did. And we expanded buys targeted below 34 to include up to
55.

We did it all the time. And we commanded premium rates for it
to boot.

>> When the station hit #1, it was converting at 200%+ Sometimes

> the demo.

Sometimes true, sometimes, not so. But we always converted
high, and we always got them to buy demos that they specifically hadn't
considered. Salesmanship, and relationships. They go a long way toward
changing things.

> changing power.

It was definitely a rare event, to be sure. And I don't know
that it's happened since. But more than a personal victory, it was quite
the object lesson that you don't just accept what you're handed. There
are always new ways of solving seemingly insurmountable problems that
achieve the desired goals based on old fashioned results.

I know it may be a surprise, to you, but I'm not the kind of
guy who 'fits-in.' I"m not a joiner. And my social circle is very small.
Most of the time, people at work just ignored me. Even the GM forgot I
was there sometimes. But when it came to getting something done that
'couldn't be done,' I was the first one they called. And the given
credit for the win...but that's another story. The reason I lasted so
long through so many PD's, so may GM's and so many sales manglers, is
because I saw solutions that traditional thinking didn't recognize. But
the results produced were traditional results. Usually a bit over the top.

So, what I'm saying is not to abandon your thinking, or abandon
your targets, goals and strategies, but rather, just to expand the
niche, a bit, to include more creative strategies at attacking issues
that are supposed to be unassailable. Create new avenues to include a
wider base of listeners, and a wider target for advertisers. Don't just
take the numbers you're handed and go away. Create a strategy for
getting those numbers, and widening them. Line your pockets with the
extra cash.

There was a movie with Robert Preston,...late 50's, may have
been Kraft Television Theatre, but don't quote me...Preston was a buggy
whip salesman and the automobile had just been invented. With
predictable results for his company. He tried to find new work, but
there was none. Young turks had captured the sales market, and he was a
dinosaur. More importantly, he was associated all over his circuit with
obsolete buggy whips.

In one memorable scene, he was pitching himself to a young
sales mangler who just turned him down flat as too old, too obsolete,
too irrelevant. In a moment of pique, his frustration led him to one of
the most important soliloquies in modern times....in which, and again,
don't quote me, he said these words, among others, "Have you ever in a
farmer's field, helping him to pull a heifer out of a calf that was too
young to have it? Have you ever gotten down knee deep in mud to help him

fix a broke plowshare? Sales isn't about numbers, figures and reports, it's about relationships....because what you're really selling is yourself."

It went on for about 2 minutes...but you get the idea. Well, the young turk doing the hiring, said, "I disagree."

But the speech had gathered the attention of office staff, including the young turk's father, who said, "I don't." And Preston was hired into the new business as a salesman.

The rest of the story wasn't so happy. But that moment, that exchange made quite a point, and that is: Sales is not about your product. PURCHASE is about your product. SALES is about selling yourself.

That moment also made quite the point that sometimes, being respectful of the business decorum is precisely the most ineffective thing to do.

Now, this movie is fiction. It's based on real experiences, but it's fiction. But it does demonstrate a concept that's all to often forgotten in today's business climate, where the only things that matter are numbers, spreadsheets, and research. And that concept is that, before you get to the money, the numbers, the profits, business is about the relationship. You have to have one to do business.

And that's true of any business. Of any sales position. Of any Mangler's position. Even the guy behind the microphone at the radio station. You have to establish a relationship. You can do it as a matter of numbers, spreadsheets and research, or you can do some real selling....selling yourself. Your station, your station's personality...you can cultivate a real relationship with your listeners, and your clients.

And in that context, widening the niche becomes not only possible, but necessary. And the benefits are long term. Because, once you've sold yourself, you've created a recession resistant relationship that will weather downturns. Ratings, market forces, economy. And you'll weather it through the loyalty built by providing results, and solutions to seemingly unsolvable problems to your clients.

But more importantly, you can now create changes in thinking, and you can do it from every source. Media directors, producers, writers, sales, representatives, all can be parts of solutions, instead of automatons living and dying by scenarios handed to them by third and fourth party number crunchers.

If you can do this, you create a win-win-win-win. Everyone gets served from listeners to the station, the agency, and the client. And above all, you.

Rather than living and dying by numbers over which you have no control, you can live and die by your own knowledge and experience, and

use those numbers as tools, not lifelines.

That's why the relationship is SO important. With the correct
relationship, you access clients with willing assistance of the agency.
Because you've sold the agency on the benefits of your creative solutions.

It happens every day.

Once again, research is a snapshot of conditions as they exist

> consumer products.

Correlations between snapshots based on limited observation
and assumptions that serve the correlations. Often they're accurate and
can infer motivations. But they cannot actually determin what motivates
a buyer.

Correlation is not causality. And it's causality that drives
action. Getting buyers, listeners, or investors to take action requires
that you trigger motivations. Correlation cannot determine that.

If you want younger people to move to AM to give a realistic
valid sampling of HD, you have to determine what's REALLY keeping them
from it. Correlation only says that they should, or they may. Causality
says they'll be motivated to.

Big difference. Arrived at differently than correlation.

> them before, and then they stay. No format change, no competitive influence.
> FM is acceptable, FM sounds better. AM does not meet those criteria.

You missed my point...taking an AM station to FM puts that
content before listeners who have never listened, in a place where there
was another station before. It's a new station to the listeners. May be
the same format, same content, same station, but it's still new to
listeners who never listened to AM. So, yes, new listeners come and
they stay. Because, 1) there's a new station, on the band where they're

already listening, 2) they like the content.

Content drives listening, and no change in audio quality
alone will change the listening habits of a listener if they don't like
the content.

AND, you've hit the nail on the head. FM is acceptable.
Yes, it does sound better. But that's not the entire issue of
acceptability. We're into our second generation of listeners who for
whom Radio IS FM. AM is not acceptable because 'nobody listens,' 'my mom
listens to....' and other reasons I don't need to repeat. The issue is
exactly acceptability. Sound is a part of that. But it's not a
motivator. If it were, every Walkman would be AM Stereo, FM Dolby and
Quad with FMX.

They aren't. Because audio isn't the issue. It's not the
audio, it's perception of unacceptability.

If you want younger demos to talk radio, move it to FM. That
works. But AM HD won't get you there, because they simply will not give
band or anything on it a fair sample.

And especially not with all the interstation hash.
>

Excuse me there was a typo, there....it should have read,
who doesn't listen to AM? the same people who didn't buy an Alero, even
though it was a cleaner more stylish line, with better performance and
more comprehensive features.

It was an Olds. Not interested.

AM sounds crappy, and did way before NRSC and
> such. Whether we blame the receiver manufacturers or the change to FM does
> not matter. When the same listeners like the same programming on FM, but
> shun it on AM, it means the band is old, decrepit and it sounds bad.

No, it means that the band is old, decrepit and sounds bad,
but they shun it because it's not FM. Changing the audio will not
change the perception that AM is not FM. They're not listening to AM
because it's AM...they're not even getting to the audio quality. Because
they're not sampling it. And they won't. It's a foregone conclusion that
AM is undesirable. Most importantly, like Oldsmobile, because it's a
link to age. Changing the audio won't change that perception.

>
>> Research infers that younger demos will listen to AM if the audio

> any significant savings. And most have very little discretionary income.

And it's also where you see the retirees driving
Escalades. Business owners vacationing in Italy. Executives spending
$12,000 on a watch. It's where you seed big screen plasmas in three or
four rooms of a 9000 sq ft home. It's where you see airline pilots
living in $450,000 condos in the city. It's where you see airline
stewardesses living across the hall from them.

There are scary lower income listeners in the lower demos,
too. Welfare moms who can't afford heat in the winter, young couples
with just enough income to pay the rent, but live on Ramen and Wal-mart
bread. C'mon David, you're smarter than this.

>> Radio stations pitch clients every day. Every day. That's what

> ratio, because we did not spend on lost causes.

No one is saying it's easy. But it's about the
relationship, and picking your direct client carefully.

>>> There is no money in 55+. No single radio station, and no group can
>>> change a client's attitude if the client is going to say, "I can not get
>>> a decent ROI on that demo" or "my product was designed for 18-34 year

>>> olds and I hope we don't get Oldsmobiled."

No one is saying to change the niche. Only widening the
niche. Inclusion rather than exclusion. It's all about relationships.

>>

Call the RAB, they'll dig up a copy of the spots for
you. They were highly visual.

Appetite appeal is so critical to come
> campaigns that radio, if use, supports recall at POP, not sales.

No question. But that's not the only application of
radio. And again, widenening the niche. Widening the thinking.

And building relationships. It's not impossible.

>> Mel Karmazin said, and repeatedly, I might add, that revenues

> CHR gets 0.7 or 0.8 to one because advertisers don't want the teens. And so
> on.
>>

That's not what he was saying. What Karmazin was saying
was that revenue is dependent on demand for your product. Ratings can be
related to that, but not necessarily. If you want to create demand,
field more sales people. Let them compete with each other to get
sponsors on the air. Use a sliding rate card. Drive up the rates.
Waiting for orders to come in based on ratings is one way to do it. But
you live by the book you die by the book. Creating demand on your own
produces results that are recession and ratings proof. WUSN, Chicago
remained sold out even after a 50% slide in ratings when Country Music
slid off the grid. And they held their rates. WDZ, Decatur had fewer
listeners than the police radios, and was sold out. At top market rates.
KWKH, Shreveport didn't show up in the book for years, and held top
market rates, and was sold out 10 months out of the year.

Ratings are one thing. Effective sales are another.

>> Again, perceptions. If you accept them, they become what you
>> believe to be realities. They do not become realities themselves. If
>> you're not succeeding at selling this, then change you pitch.

As I responded to dxAss, the investment in iBiquity was less than the cost
of a single studio at our LA facilities. In the overall picture, one can
consider these "broadcaster investments" as support for a single-source AM
and FM solution to the qustion of how to "go digital" on terrestrial radio.
>

Actually, the Jonny Ram&#65533;rez show on one of our HD2 channels in Austin, and originated in San Antonio, gets lots of calls form that market, and there is both advertiser and consumer interest. Since the Tejano fan has no other

choice in Austin, and the music is part of a distinct lifestyle, the early response has been considerable.

Which goes back to what you and I have been discussing....content
drives listening.

It's the content, not the digital audio that's attracting your
numbers for that channel.

"How to identify a Mexican"

"Mexicans are stupid. Mexicans are shiftless and dirty. They come from
a dirty nation called Mexico. Most Mexicans make and distribute what
they call Chicle or what Americans call 'gum'. Due to the flooded
Chicle market, many Mexicans try to enter the U.S. They frequently
resort to crime to pay for their numerous offspring. They also make
tortillas. And Tamales."

"Mexicans from Northern Mexico listen to obnoxious mariachi tunes at
the highest possible volume. For those ignorant of this particular
genre of music, it can be identified for its use of the accordion, a
falsetto sreeching "aii aii" and blaring trumpets. Southern Mexicans
listen to obnoxious Mexican Polka tunes at the highest possible
volumes. Regardless of what region of Mexico they are from, Mexicans
tend to listen to their music at volumes that make you want to kill
them."

http://www.encyclopediaofstupid.com/stupid/index.php/Mexican

Ah, so this explains the overwhelming interest in HD Radio!

- Wow! Homey can get China being rebroadcasted from Canada.
- You must have some killer gear.

David - Actually 9580 kHz @ 01:20 UTC was -Via- Habana, Cuba
-EiBi- 9580 0100-0200 CHN China Radio Int. E NAm /CUB

My Gear is 'good' but not Great and it does not Kill.

Two Signals & Two Sources : What was 'interesting to me
was that I had Two equally 'good' Listenable Shortwave Radio
Signals rebroadcasting China Radio International (CRI) :

1 -Via- Habana, Cuba on 9580 kHz @ 01:20 UTC
-EiBi- 9580 0100-0200 CHN China Radio Int. E NAm /CUB

2 -Via- Sackville, NB Canada on 9790 kHz @ 01:50 UTC
-EiBi- 9790 0100-0200 CHN China Radio Int. E NAm /CAN

Plus there were 'aimed' at the East Coast of North America
and I was receiving them well on the West Coast.

OBTW - The Chinese "Mando-Pop" Music did sound nice.

the fun and joy of shortwave listening
- you hear what you hear ~ RHF

Well, as if I did not know, we have a clear indication that you are also a racist.

>"Mexicans from Northern Mexico listen to obnoxious mariachi tunes at
>the highest possible volume.

Mariachi music is from west central Mexico, not the north.

>For those ignorant of this particular
>genre of music, it can be identified for its use of the accordion, a
>falsetto sreeching "aii aii" and blaring trumpets.

Mariachi music has no accordeons in it.

>Southern Mexicans
>listen to obnoxious Mexican Polka tunes at the highest possible
>volumes.

Norte□an music, which does have accordeons, comes from, as the name indicates, northern Mexico.

> Regardless of what region of Mexico they are from, Mexicans

>them."

Actually, based on radio listening, a huge segment of the audience in Mexico (more than half) listens to pop and music in English from the US.

You got everything ass-backwards here.

I am listening to http://www.clearchannelmusic.com/formatlab:

Tejano Channel (CH 804) Tex-Mex music blending Mexican influences
with Popular Folk Music.
Undies Indie Rock (CH 714) Its underground, and independent. Indie

and college rock.
etc...

Jerry Del Colliano is absolutely correct:

"HD Hypocrisy"

"Here's a few more reasons why only iBiquity and a few clueless radio group heads could make a big thing out of HD radio tagging... The very damn radio stations that broadcast in HD offer no programming worth listening to. HD Radio is a virtual sewer of formats owners don't want on their terrestrial frequencies and other assorted garbage that no one sane would listen to -- let alone spend money for new radios -- tagging or not."

http://insidemusicmedia.blogspot.com/2007/09/hd-hypocrisy.html

This shit at FormatLab is total garbage!

Another Dirty Little Secret of the AM/MW "HD" Radio
Marketing Scheme :

Take a perfectly Good Old Analog AM/MW Radio Audio Signal.
- - - Not Great -but- It is OK to Listen to.

Good Old AM/MW Radio - Crunch-it-Up {Reduced Bandwidth}
so that the Analog Audio Sounds Worse.

Offer "HD" AM/MW Radio as a Better Sounding "Digital" Alternative.

AM/MW Radio : It wasn't Broken -but- If You Break It
- You Can Fix It and Make Money Off of It.
- and Call It "HD" AM/MW Radio.

life exists and radio listening happens

You made this statement:

"Word has it that iBiquity is experiencing so much
financial mayhem that they've stopped all projects, both current and
future, and are regrouping or possibily worse."

Again, please provide support for your statement that they are
experiencing so much financial mayhem that they are stopping all
projects...etc.

That's 9590 kHz.

Also, 7240 and 5995 are better, at that time. (West Coast, North America).

[snip]

And even if HD radio completely fails, IBOC could still stagger on. They'll also try IBOC pay radio and consider any other sort of IBOC digital data transmission.

The economics for all the other digital options might be just as bad as they are for IBOC-AM, but it will take years to sort all of this out.

[snip]

Well, kinda sorta. Wideband high fidelity AM radios hear the noise, and it's annoying. The noise is also on narrower band radios, and I think that's due to IF asymmetry.

I hear the noise on about a quarter of my radios, although I don't have a representive sample of radios.

By the way, HD radio doesn't have any particular definition. HD radio is just a meaningless marketing catchphrase.

It actually stands for, or stood for, "Hybrid Digital" signifying
compatibility, and the vanguard for a transition to all-digital service.

Recently, the definition for HD has been dropped, in favor of
letting public free association use the TV definition: 'high definition'.

Clever, deceptive, and typical of this program.

4022. The Wind Cries "Cuhulin"

Newsgroup: rec.radio.shortwave

After all the jacks are in their boxes
And the clowns have all gone to bed
You can hear happiness staggering on down the street
Footsteps dressed in red
And the wind whispers "Cuhulin"

A broom is drearily sweeping
Up the broken pieces of yesterdays life
Somewhere a queen is weeping
Somewhere a king has no wife
And the wind, it cries "Cuhulin"

The traffic lights, they turn, uh, blue tomorrow
And shine their emptiness down on my bed
The tiny island sags down stream
cause the life that lived is,
Is dead
And the wind screams "Cuhulin"

Uh-will the wind ever remember
The names it has blow in the past?
And with this crutch, its old age, and its wisdom
It whispers no, this will be the last
And the wind cries "Cuhulin"

4023. AM Ibocs not on the air (was Re: HD Hypocrisy)

Newsgroup: rec.radio.shortwave

Source record: 123656

Univision Radio's WADO 1280's IBOC has been off for a few months now.....wonder if they're just waiting for Sept. 14 to roll around and then run the sucker 24/7.

Would seem like a logical move instead of turning on/shutting down at sunrise/sunset.

Another one whose IBOC has gone off is WNYC-AM 82. I think it's been like that for a couple weeks.

Meanwhile WOR 710 trucks on with its IBOC signal. But then again, they're lucky to have a brand new transmitter plant (and towers), so everything was designed with IBOC factored in.

Oh, I forgot these:

Other findings: Investment and development in WiMax systems will
continue in 2007, accelerating out-of-home use of Internet radio. "The
negative potential of the new copyright royalty fees on the growth of
Internet radio is difficult to project at this time."

Automotive companies are seeing demand for Internet-capable in-car
systems and are moving forward with plans to install Internet-capable
boxes in 2007 and '08 models, Bridge reported.

"Though initial exposure to this technology will be focused on new
cars coming out of Detroit and Japan, plans are unfolding rapidly for
after-market installations. This out-of-home and office use coupled
with already significant use numbers at home and office are exerting
upward pressure on growth for Internet radio listening," which
includes both Internet-only audio as well as radio simulcasts.

Ha! Ha!

"Satellite Radio's move to OEM-driven model?"

"I will not comment on whether or not this headline is true. But if it is true, what do you think it suggests about the probability that radio listeners will buy a radio - any radio - at retail? Or are they much more likely to, as I like to say, buy something that contains a radio - like, say, a car - and get the radio for free? Now, what does this tell you about the near-term future of HD radio, which has a very small footprint in the OEM world, and any footprint it currently does have is strictly as an option? (Satellite, for all its woes, has a comparatively strong OEM footprint - and is increasingly available as a standard item). What does it tell you about the value of radios in Wal-Marts and Radio Shacks (satellite or HD)? What does it tell you about the value of the HD promos your station is running every hour? I'm not trying to obsess on this topic. I'm only trying to put out a few intelligent words to counter the hundreds of thousands of dollars iBiquity spends to convince you that myth is reality, consumers are idiots, and "hope" is something other than a four-letter word."

> Mexican is not a race.

Check a dictionary, fool. "Race " is correctly used to describe groups, such
as ethnic or national ones, as well as skin color. In this case, it is a
group of people with a common feature.

Oxford Concise:

race2

n noun

1 each of the major divisions of humankind, having distinct physical
characteristics. •racial origin or distinction. •an ethnic group. •a group
descended from a common ancestor.

2 a group of people or things with a common feature.

3 Biology a distinct population within a species; a subspecies.

ORIGIN

C16: via French from Italian razza, of unknown ultimate origin.

USAGE

In recent years, the associations of race with the ideologies and theories that grew out of the work of 19th-century anthropologists and physiologists has led to the use of the word race itself becoming problematic. Although still used in general contexts, it is now often replaced by other words which are less emotionally charged, such as people(s) or community.

A few thoughts as nighttime IBOC operation looms later this week...

Digital transmission has some advantages, but the hybrid digital system is a lousy fit for the AM band. Aside from the cost of conversion for the broadcasters, there are indirect costs associated with damage to analog services, both for the IBOC players and for those staying on the sidelines. The broadcasters have never had a clear idea of these indirect costs, since iBiquity, the NAB, and other IBOC proponents have always downplayed the problems. Now the rubber starts to hit the road, and to understand what they've gotten into, the broadcasters need to get feedback from their audience... lots of it. Come 9/14, let the interference complaints flow, but keep a few things in mind: It should be obvious, but it bears repeating: you are reporting interference in the context of being a radio listener, not a DX'er. Keep it polite and to the point, and omit the anti-IBOC diatribes.

Complaints should go to the station being interfered with, not the station(s) causing the interference. There are a few exceptions, however. If you feel that an IBOC station's own digital emissions have degraded their analog signal quality, you should let them know. Or, if you have reason to believe that their IBOC equipment is malfunctioning, you should contact them, but make sure you're on firm ground before you do so.

Keep in mind that interference complaints are more likely to be taken seriously if they affect reception in or near protected contours. The first question to ask yourself is whether the reception is by skywave or groundwave. Only the Class A stations on the "clear" channels have protected skywave service, so complaints about interference to skywave signals will likely fall on deaf ears unless one of those stations is on the receiving end of the interference. If in doubt, you can check a station's class using sites such as fccinfo.com or radio-locator.com. Of course, some of the large market Class A's have little or no interest in skywave service, WOR being a prime example. At the other end of the spectrum are stations such as WSM that still have big skywave audiences, and thus should be more receptive to interference reports.

Some folks argue that AM skywave service is going the way of the dodo anyway. Perhaps they're right, but IBOC definitely does not just affect skywave reception. We all need to take a close look at IBOC interference to our local and semi-local stations that are receivable by groundwave at night. The difficulty here is to assess whether your location is in a station's nighttime protected contour, which is

defined by something called the Nighttime Interference Free (NIF) contour.

NIF contours are based upon calculations, but unfortunately, they are not generally documented anywhere that is accessible to the general public, nor is there any free software available to do the calculations. My advice: don't worry about this arcane stuff. If you get normally get good groundwave reception of a station at night, and it becomes significantly degraded after nighttime IBOC starts, then you should report it to them. Let them decide whether your reception problems merit any action on their part.

If you want to get a very rough idea of a station's nighttime groundwave coverage, you can try looking it up on the radio-locator site. The red contour line is an approximation of the 2.5 mV/m contour. Except for the Class A stations, most stations will have a NIF contour that is somewhat smaller than this (in some cases, a LOT smaller). But don't get too hung up on the contours at this point... if you had decent reception before IBOC, and it goes seriously downhill after nighttime IBOC starts, then it's worthwhile reporting it.

Remember also that a recording could be worth a thousand words. A short audio clip of the interference could be a valuable addendum to your interference report. If you're keen, and have some inkling of which local stations might be interfered with, it would be worthwhile to make some recordings this week, so that you have some "before" and "after" comparisons available. The stations themselves should be doing this, but I doubt that many will!

Lastly, it should be noted that not all of the current AM IBOC stations (223 at last count) will begin 24/7 IBOC operation on Sept. 14. Some will have issues to sort out with automation, bandwidth of their night array, and so forth (and some of them, fortunately, are daytimers :-). The stations that do not have to change facilities at night are the most likely to keep it rolling through the night on 9/14. So, it will be important to keep track of which stations are actually running it at night, and to that end, I've added a column to the table on my AM IBOC page (http://topazdesigns.com/iboc/station-list.html) to show nighttime status. I encourage everyone to report the status of the IBOC stations they can hear, either on these lists or, if you prefer, directly to me.

Let the beta test begin!

Mexican is not a race. It is a nationality.

Pull your head out of you fake Hispanic ass, 'tard boy.

That you would bother to track down and paste all of this text from a
dictionary into your post on rec.radio.shortwave is pathetic. Quite
aside from the fact that it doesn't support your case, it speaks
volumes about you, your character, and your stunted development.
Bummer.

I'll be OK as I'm out of the nighttime pattern of all the directional
locals (I've been testing in the morning). KGO and KKOH should be OK
here, but will be severely compromised in the big city of Los Angeles,
where KGO has many listeners.

I picked one of these up and it's a nice knob. Nice, heavy metal.
Feels good. What I really need now--and should have thought of
previously--is a nice felt washer to put behind the knob. This should
improve the action of the knob a lot.

Does anyone know of a good source for something like this?

Track down? The definition is on click away... I have the CD version of
several of the Oxford dictionaries on my computer for reference, as well as
Encarta and the Larousse and the DRAE Spanish volumes.

The post is relevant since dxAss, in his perpetual stupor or state of ignorance, stated that "Mexican" is not a race. By the contemporary definition of the word "race" which I left, above, he is wrong.

KGO has no listeners in LA. I averaged the last 4 ratings books for LA, and
KGO has a 0.0. It has a cume of 5.5 thousand, all of which were away from
home listening (which probably means people driving while out of LA.)

It's a definition perhaps made by folks such as yourself who attempt to label most anyone who disagrees with your sorry, stinking, traitorous, liberal ideas as being 'racist'.

Mexican is not a race, 'tardo. It's a nationality.

Yeah, but your calculations are always rushed and half-assed because
you're busy trying to fill orders for colloidal silver.

The fact that you would go to the trouble to defend your tracking down
and posting of the definition is even more pathetic. Wow. If you
"dictionary" fails to draw a viable distinction between race and
nationality, that's not DxAce's problem.

BAJ,
.
Practical Shortwave Listener (SWL) Antenna Theory
"How To" (DIY) Books = Hand-On Antenna Learning
Shortwave Listener (SWL) Antenna Reading List
.
Here are a few Do-It-Yourself (DIY) Antenna Books to
Read, Learn from and Gain Understanding of Antennas:
.
"Build Your Own Shortwave Antennas"
- - - by Andrew Yoder
.
"Easy-Up Antennas for Radio Listeners and Hams"
- - - by Edward M. Knoll
.
"Joe Carr's Receiving Antenna Handbook"

- - - by Joe Carr
.
"Practical Antenna Handbook"
- - - by Joe Carr
.
"The Shortwave Listener's Antenna Handbook"
- - - by Robert J. Traister
.
"Simple, Low-Cost Wire Antennas"
- - - by William Orr
.
"Wire Antennas"
- - - by Orr and Cowan
.
"25 Simple Indoor and Window Aerials" by E.M. Noll
"Easy Up Antennas for Radio Listeners and Hams" by Ed Noll
.
PLUS: Any "Antenna" Book published by the
= = = American Radio Relay League (ARRL)
.
Now there is a YAHOO! eGroup "SWL Antennas and
AM & FM Antennas" that focuses on the SWL Antenna.

BAJ - Free Shortwave Listener (SWL) Antenna Tech-Notes
-by- Joe Carr and something extra . . .

For One and All,
.
Joe Carr's "Tech Notes" and much more . . .
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/2220
.
FREE SWL ANTENNA TECH NOTES : -by- Joe Carr
The "Noted Author", Joseph J. Carr, has created
a series of Short Articles on Topics of Interest to
the Shortwave Listener (SWL) about Antennas.
TECH-NOTES => http://www.dxing.com/tnotes.htm
Presented by Universal-Radio Research in PDF File Format.
.
TN - Title = Pages
01 - Directional or Omnidirectional Antenna ? = Pages 7
02 - What is a "Good Ground" ? = Pages 6
03 - Connecting Your Receiver to the Antenna = Pages 6
04 - Installing Coaxial Connectors = Pages 4
05 - Connecting the Transmission Line to the Antenna = Pages 5
07 - Filter, Attenuator, Preamplifier, Preselector
--- or Barefoot ? = Pages 10
08 - Small Loop Antennas = Pages 7
09 - Using the Small Loop Antenna = Pages 8
.
NOTICE - I Am Not Offering These Books For Sale
ITIOFD - I Am Not Associated With Universal-Radio.Com
-Note- The Original Questions was about Good Sources of
Information on Antenna Theory -and- IMHO These Books Are.
.
* "Joe Carr's Receiving Antenna Handbook" - by Joseph Carr
This Guide to High Performance Antennas is written
in Joe's clear, easy to understand, friendly style.
Arguably the best book devoted to Receiving Antennas
for longwave through Shortwave. An excellent book for
```

the Shortwave Listener who likes to experiment with
different Antennas. = Pages 189
http://www.universal-radio.com/catalog/books/3113.html
.
MORE - Joe Carr Shortwave (SWL) Antenna Books :
.
* Joe Carr's Loop Antenna Handbook - by Joseph Carr K4IPV.
http://www.universal-radio.com/catalog/books/0016.html
Here is a comprehensive, but readable guide to
understanding and building Loop Antennas for
Longwave, Medium Wave, Shortwave and VHF. Loop
Antennas can be very effective, even if you have
limited space and a tight budget. Many diagrams and
illustrations. Chapters include: Loop Theory and
Construction, Loop Projects, Quad Loop Beams, Small
Loop Theory and Projects, Special Loops for Shortwave
Bands, Loopstick Antennas, Radio Direction Finding,
Small Loop Preamplifiers and Commercial Products.
Pages = 133
.
* The Practical Antenna Handbook - by Joseph J. Carr
http://www.universal-radio.com/catalog/books/0224.html
This noted author provides a broad and understandable
course on all types of antennas. Categories include:
dipoles, verticals, multi-band wire, long-wire
directional, hidden, phased verticals, beams, shortwave,
VHF/UHF, marine, microwave, mobile antennas and grounding.
This book is designed for radio and electronic technicians,
hams, shortwave listeners, CBers and radio professionals.
This huge new Fourth Edition includes a computer CD.
Pages = 609
.

Not according to every dictionary I have consulted. "Race" can be both the distinction of color or a people with a commonality. The most infamous example would be Hitler's "master race" which was not "white" but Aryan and very specific in terms of Nazi thinking. Jews are often referred to as a race, yet they may even be Black like the Ethiopian Jews... but they are a race based on a specific commonality.

In Spanish, the term "raza" is not quite identical to the English "race" and in Mexico generally means, using the closest English equivalents, either "brotherhood" or "the people." "Raza" also means "breed" as in a variety of dog, horse, cow, etc.

The "motto" you posted is not Mexican... it is Chicano. Chicanos are not Mexican.

Fine. In that case all of those people west of the Mississippi
constitute a race, as do those whose last name begins with the letter
"E".

I agree. I'd gotten used to having Cuhulin around and I enjoyed hearing about his dog, his wimmins and his trips to the Goodwill store. I hope there's some way for him to open a new google account so we can all witness the return of Cuhulin.

Steve

The simple fact of the matter is that U.S.A. imports from Communist China constitute less that 9% of all U.S.A. imports.

What exactly is "tons" of jobs? I haven't come across that expression in economics or accounting. Please quote the factual numbers. Everything else is pure Neo-Liberal Socialist propaganda.

Gee, I wonder where all those "Viva la Raza" bumper stickers and T-shirts came from.

And why would radio stations in Houston, LA, San Francisco and a number of other markets call themselves "La Raza" if the term did not identify a specific group of people...

And the National Council of La Raza, a major Hispanic advocacy group. Explain that one.

Nope..If memory serves, the lyrics go:

Hey Joe, where you goin' with that dog in your hand?
Hey Joe, I said where you goin' with that dog in your hand?
Alright. I'm goin down to trade cuhulin for Goodwill stuff,
you know I caught her fetchin' 'round in Cuhulin land
Yeah,! I'm goin' down to sell him my old lady,
you know I caught her fetchin' 'round with another man.
Huh! And that ain't too cool.

No thanks to screwbay, now you can't touch an RF-2200... at least I can't on a disability income. Damned collectors ruin it for the little guy. <rage>

I wouldn't be so quick to jump on a Tecsun, remember the Grundig 800 was made by Tecsun and the quality problems that had.

Out of curiosity I opened up my RP-2100 and it has more cold solder joints than I could count. Nice radio but very poor workmanship... I pretty much think it'll die after a couple years and I'll be resoldering everything. From a solder joint perspective, I'm suprised it works at all.

Not like my 1959 Royal 1000 that still sports shiny solder joints... what we used to be able to build here.

He's probably stuck to one of the tv screens he was wrecking with a magnet in order to buy it cheaper.

Actually, the fortune cookie scenario doesn't make any sense at all.

First, it's too clearly written. Secondly, even he did manage to write it while sober, the owners of the cookie factory would have killed him after being called 'slopeheads' and 'gooks' by the cross dressing dog molester.

> just for the fun of it ~ RHF

Checking the headers from some of his previous posts shows the source
is the webtv domain; webtv has a minimal usenet posting facility
(which evidently makes quoting material difficult).

What does Google have to do with it?

Greetings Again!
Well, mine must not be the usual. This is the second time around for
mine and both times the same. The first time it was still under
warrentee so I let The Shack fix it. This time it may be up to me.
Have a great weekend! Jon.

I just called several people... those born in Mexico would never consider themselves Chicanos... the term, to them, is demeaning. Those born here... most reject the term as it is a zoot-suit stereotype. Very few pochos use it any more, outside of the fringe and radical MEChA group, which has given the term a bad name. Our news director in the stations' style guide, does not allow the use of the term unless part of the name of an organization or in a quote as he feels it is offensive to many and perceived as politically incorrect.

In Mexico a Chicano is a person who calls a patio a "yarda" and a truck a "troka" and who is not a "real" Mexican. Chicanos are parodied in the media and by comedians.

- - Face the Fact that there are 'some' Chicanos
- - and Mexicans who would disagree with you.
-
- - Again there are many Chicanos and Mexicans who use
- - both Etnic-Name-Tags when ever it suits them; to match
- - the social environment that they are in at the moment*.
-
- I just called several people... those born in Mexico
- would never consider themselves Chicanos...

The expand your circle of people 'in-the-know'
to "Homies" {everyday street people}.

- the term, to them, is demeaning. Those born here...
- most reject the term as it is a zoot-suit stereotype.

Yes and Yes -but- People are allowed their own personal
view of who they are; and their own sense of being evey
one who considers themselves to be a Puro Vato Loco.

- Very few pochos use it any more, outside of the fringe
- and radical MEChA group, which has given the term a
- bad name.

A 'fringe' group is still part of the greater Group :
They are 'some' but not "All".

Here again by your very own admission 'some do'.

- Our news director in the stations' style guide,

Life is not Lived by a Style Guide and
the World is Not A Radio Station.

- does not allow the use of the term unless part
- of the name of an organization or in a quote as
- he feels it is offensive to many and perceived as
- politically incorrect.

The your's is a Self-Censored Existence and you
have a Self-Imposed {Limited} View of what is a
Sellable Mexicano within the Market Place.

- In Mexico a Chicano is a person who calls a patio
- a "yarda" and a truck a "troka" and who is not a
- "real" Mexican. Chicanos are parodied in the media
- and by comedians.

Within Mexico as within the USA : There are Layers of
Culture and Society : The High and The Low : But It
Takes All of Them to Complete the Society as a Whole.

d'Eduardo - Agaqin and Again You Are Speaking
with an Absolute Certainty.

Yes they may be 'politicolly-incorecto' but there are
'some' Chicanos and Mexicans who would disagree
with you.

Within the Hispanic Culture and Diaspora in the USA
itself : There is a great diversity of 'self-identity'; ideas;
and understanding based on education background.
Each individual within it is a real preson; every though
they do not fit your 'perfect' definition of a Mexicano;
and your 'imperfect' concept of a Chicano.

d'Eduardo - I guess to you : Mexicans are Sellable Numbers
and Chicanos are NOT Sellable Numbers.

people are people - they are not numbers ~ RHF
.

4123. AM is dead thanks to iBiquity and the HD Radio Alliance!

Newsgroup: rec.radio.shortwave
Date: 2007-09-14 10:29:20 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <1189765760.395917.191740@22g2000hsm.googlegroups.com>
Source record: 123807

WOR 710 turned on their HD/IBOC tonight and when its skywave skips into Maryland WLW is unlistenable. WOR completely obliterates WGN 720. I would like to commend iBiquity and the HD Radio Alliance for the desturuction of AM, all for the benefit of a few thousand local listeners, if they can even pick up the HD/IBOC signals:

Narkspud wrote:

"Here in OC, I found two AM HD signals on the air at 12:15 AM: Our own KFWB (980, Los Angeles) and KFBK (1530, Sacramento). KFWB is always reliable during the day hereabouts, and has a non-directional 5,000-watt signal. KFBK is a 50,000-watt north-south directional, about 400 miles north of here. Now the bad news: no lock on either one for more than a second or two, although the analog signals sounded fine. And this time I tried driving around a bit. I got very little other than a flashing HD indicator. KFWB's sidebands obliterated 970 and 990, and KFBK'S were doing significant damage to an unidentified distant signal on 1520 that should have been listenable. This ain't looking too good. See ya tomorrow night."

http://www.avsforum.com/avs-vb/showthread.php?t=906379

Boycott HD Radio!

Couple good strong signals that should make it into CA on 1520. Both are
50KW. One is in Portland, OR, the other in OKC, OK. (there are places in
Portland where the local (actually licensed to Oregon City, with towers in
Clackamas) can be nulled and the OKC station can be heard.)

1520 kHz could have been KVTA-AM out of Ventura, CA
.
http://www.radio-locator.com/cgi-bin/finder?call=KVTA&band=AM&country=&scope=&count=20&sor
t=Call&sr=1&s=C&sid=
.
I use to receive KVTA very well at Sunrise and Sunset
{Dawn and Dusk times} up in Oakland, CA (350 Miles)
.
http://www.radio-locator.com/cgi-bin/pat?call=KVTA&service=AM&status=L&hours=D
.
http://www.gaisma.com/en/location/oakland-california.html
.

"La Raza" might identify a group of people by virtue of something
other than the semantics of the term. In a moment of irony or as a
result of a simple error, I might succeed at referring to you as "the
well-intentioned contributor to rec.radio.shortwave" despite the fact
that you do not satisfy the description.

I thought that it was Google groups that was blocking Cuhulin and not
webtv, but I could easily be wrong about that.

Hello,

When do all these schedule database sources like EIBI, etc. switch to
listing of the winter schedules ?

I guess it would be termed a08. True ?

Thanks,
B.

Yeah....nice hair. Not much under it.

And more Federal investigations into his business than Frank Nitti.

So far, nothing that's come out of his mouth has been true. Including
that he's not a puppet of City Hall.
```

Take about your Chifako.

4142. About - The High Frequency Co-ordination Conference (HFCC) and the "A" and "B" Shortwave Radio Schedules

Newsgroup: rec.radio.shortwave
Date: 2007-09-14 14:58:41 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1189781921.468696.161260@y42g2000hsy.googlegroups.com>
Source record: 123981

On Sep 14, 6:49 am, "Robert11" <rgs...@notme.com> wrote:
- Hello,
-
- When do all these schedule database sources like EIBI,
- etc. switch to listing of the winter schedules ?

About the End of October 2007

- I guess it would be termed a08. True ?

No that would be the B07 Schedule.

- Thanks,
- B.

Robert 11 - Roughly Speaking {+or- a Month}

About - The High Frequency Co-ordination Conference (HFCC)
and the "A" and "B" Schedules
http://groups.google.com/group/shortwave-listener-qsl-reports/msg/0e442109610bc0b5

High Frequency Co-ordination Conference (HFCC)
-aka- High Frequency Co-ordination Committee
.
HFCC => http://www.hfcc.org/
.
The HFCC Co-Ordinates Two Shortwave (High Frequency)
Schedules Annually for Member Broadcasters :
.
The "A" Schedule roughly corresponds to the Summer Period
for the Northern Hemisphere (European Clock-Time)
.
The "B" Schedule roughly corresponds to the Winter Period
for the Northern Hemisphere (European Clock-Time)

About the "HFCC" Group
HFCC => http://www.hfcc.org/group.html

Note - The HFCC independent from the International
Telecommunication Union (ITU) in Geneva, Switzerland
ITU => http://www.itu.int/net/home/index.aspx

The "A" and "B" Of It All :

"A" = Spring and Summer : April~October (7-Months)

"B" = Fall and Winter : November~March (5-Months)

"08" = 2008

So "A08" Schedule will start around April 2008.

Note - Before the A08 Schedule we will have the
B07 Schedule which will start around November 2007
and extend through March of 2008.

hope this helps - iane ~ RHF
.

"The American peace has proven itself peaceful, stable, and durable.
Yet no moment in international politics can be frozen in time: even a
global Pax Americana will not preserve itself." To preserve this
"American peace" through the 21st century, the PNAC report concludes
that the global order "must have a secure foundation on unquestioned
U.S. military preeminence." The report struck a prescient note when it
observed that "the process of transformation is likely to be a long
one, absent some catastrophic and catalyzing event--like a new Pearl
Harbor."

Your books are the enemy of the craft of radio. KGO has listeners in
Los Angeles. I know some of them. I hear others calling into the
programs. You even admit to knowing of 5,500 people who managed to
crack your ''books''. Artless bean counters like you killed radio.
You suck.

- Wrong again you Islam-0-Fascist liar: 9-11 happened
- because Impeached Clinton wanted a new Pearl Harbor
- and sat on his hands.
-
- See "The Path to 9/11". The ABC series with 40 million viewers that
will
- not be released on DVD because of death threats to the writer/
producer and
- threats from the Clinton Gestapo at Disney and ABC.
-
- Hiel Hitlery!

That would Hitlery "Reichskanzler" KKKliton - Fraührer of
the Democratic United Peoples Republic of North America
Formerly : Canada; Mexico and the USA

That would be b07 (we are currently in a07) which should start around October 29. Of course there will be much confusion the week or so before and after as not every country shifts from summer to winter time at the same time.

All we can do is sit back and attempt to have fun!

First off the vast majority of Chinese goods are not inherently dangerous. Secondly the Chinese are not forcing us to buy their goods. We are choosing to buy them. We are choosing to buy them in great numbers because we all like a bargain. If you are concerned about buying merchandise from china, the solution is staring back at you in the mirror. All you have to do is stop buying goods from china.

But if you are concerned about goods from china you should be equally concerned about goods from all low cost countries. Don't forget you have to include Indonesia, Sri Lanka, Korea, Mexico, most of south america, all os eastern europe, all of africa and the middle east. And that's only part of the list.

Lotsa luck bud.

There is no "craft" of commercial radio without audience measurement to
support the revenue side any more than there is no "craft" of automobile
design unless the designs sell cars.

> KGO has listeners in
> Los Angeles. I know some of them.

I told you there are a few thousand. The #1 station in LA has 2 million. In
the overall picture of things, KGO has no listeners in LA... as I told you,
the bulk of the diary mentions for KGO (4 in total, on average, for the last
12 months) were "away from home" meaning they were possibly not even in
market receptions.

> I hear others calling into the
> programs.

Probably the same 4 people.

> crack your ''books''. Artless bean counters like you killed radio.
> You suck.

We work in a business. And the business model of radio today is 100% based on usage of stations inside our local metro survey area. Out of nearly 5000 AM stations, I doubt even 25 get any revenue from skywave reception, and nearly none get revenue from anything but the local metro on groundwave listening.

>>
> Your books are useless below a 0.5 share.

Actually, you have that totally wrong. If a station has less than about the equivalent of a 0.3 share, Arbitron considers them not to meet Minimum Reporting Standards because they do not appear in enough diaries, with enough time listening, to be considered significant. To Arbitron, anything below the MRS standard is not representative of any real listening and is purely coincidental and not reliable; such stations are not "in the book" to use their term.

So any station not appearing in a handful of diaries at least is considered to have zero significant listening and whatever mentions may occur (there are 30,000 diaries for LA in a year) can come from away from home listening or poorly described internet listening or any number of other sources.

In LA, a station with a 0.5 share can bill $5 million dollars a year. It's significant. KGO has a 0.0 share.

Unfortunately, what you say is true, but only in theory. It seems that due to greed of the manufactures (and consumers), almost everything is made in China. A large majority of our manufactures have long since gone off shore. You would be very hard pressed to find goods that are not made in China (or some other Third World country).

Do you want goods or foodstuffs that are:

a) Safe

b) Cheap

Pick one.

Hmm. Looks like it. I can add some commentary. A bit of background: I maintain a VHF listening post in the vicinity of the Pentagon. I learned that Bush would be traveling from the White House to Quantico, and I had to look up some frequencies of interest for monitoring that flight. I swapped an old hard drive with a text file of those frequencies into my computer today. That hard drive also has some old posts from RRS on exactly this topic. Here you go:

Subject: My Dx 390 Story: opinions solicited (long)
Newsgroups: rec.radio.shortwave
Date: 2002-08-08 18:01:02 PST

Hello,

I just attempted to trade in my dx 390 for a versacorder at Universal Radio. They sent it back saying their service department found it unacceptable for trade in.

This radio works perfectly and was kept cosmetically clean: the only reason I decided to trade it in was that I use my DX398 at home on a daily basis, I have the DX375 on my desk at work, I used the Sony7600g for traveling and the GE Sr3 for MW Dxing sometimes. In addition I just recently picked up a DX 396 at the RS close out sale so now I certainly have more than enough radios. Plus the fact I hadn't used the DX390 in a long while so I figured to trade it in to save money on the recorder I wanted.

Well, when I asked Universal why the service department found the radio unacceptable, the email i got back said because of the "AM sensitivity". What does that mean? If they were familiar with the product why did they tell me to send it in for trade in and then reject it? Were different "batches" of this radio different in their sensitivity. How was I able to snag such great DX if the radio was so insensitive. Do they wear out from lack of use - since I hadn't used it for a while? what gives? please?

Can someone here explain to me if this is for real of if I have been jerked around. Irregardless I won't be dealing with Universal anymore and have since purchased my VersaCorder from CCRANE. But i would like to hear some opinion from you guys in this group since I respect most of the opinions around here.

Thanks in advance and have a great, Good DXing, weekend everyone.

The only possibility that comes to mind is that the 390 is not as sensitive off the whip as some other radios. If the tech that was testing it did not know this was normal, he may have thought it was a defect. I'm surprised that you use the 398 more. I still have my 390 but got rid of the 398. The 390 is a better radio, IMHO.

DX-390's are notorious for having an FET go out or get weak, which either weakens or completely nullifies it's ability to receive AM signals. It's a $0.99 fix to replace it, and can greatly increase AM sensitivity if it is in fact weak. I bought my 390 off of eBay and it was DOA. Replaced this FET and it worked like a champ. The same transistor went out again when a storm moved in quickly and some static discharge came down the wire. Another $0.99 and I was back in business.

Subject: Re: My Dx 390 Story: opinions solicited (long)
Newsgroups: rec.radio.shortwave
Date: 2002-08-08 22:02:21 PST

I presume it means the radio wasn't picking up AM broadcasts it should. This radio does have a reputation of being sensitive to static discharge and blowing out an FET at the antenna input. When that happens the AM sensitivity would go to hell and it would need to be repaired.

Should you wish to look into repairing it I've included an old post by Dave H. which could help.

>>
From: dx398 at excite.com (David H.)
Newsgroups: rec.radio.shortwave
Subject: Re: Sangean radio problem
Date: 10 Jul 2001 16:38:46 -0700

I used to own a Radio Shack DX-390, which is the same as the Sangean ATS 818, and I have had the same thing happen to me before. The field effect transistor, located at Q1 on the circuit board, has more than likely gotten fried to due a static discharge into the antenna. This seems to be a common occurance with the DX-390 and the ATS 818 as I have read many other stories of people having the same thing happen to them.
If you or someone you know is handy with a soldering iron, it should be a relatively cheap fix. Go to your local Radio Shack and pick up a MPF102 FET, which sells for $.99 (Cat. No. 276-2062) and replace the blown field effect transistor with it and you should be back in business again. The MPF102 FET will also cross reference with other brands of FETs should one from Radio Shack not be available. Check out http://www.sdxf.org/swedx/sangean_ats803a.pdf and start reading at page 11 and you will find other stories of people having similiar problems with their DX-390s and ATS-818s. I hope this was of some help and good luck!

73,
David H.
==========

When I click on http://www.sdxf.org/swedx/sangean_ats803a.pdf ,
I end up with what surely is "File not found" in Swedish. The site does have a home page. If you can figure out Swedish, you're in luck.

http://sdxf.se/Information/index.php

http://www.google.com/search?q=dx-390+fet

I own the DX-392. So far, mine has not malfunctioned.

> A Chicano is, and only is, a born American of Mexican heritage.

Not according to my dictionaries. It refers to more than that.
1. A Mexican born person living in N. A.
2. A person of Mexican decent (born in the USA) living in N. A.
3. A person of about which issues of Mexican heritage living in N. A. is spoken of in some way.

Since when did this definition become derogatory? The collage's in the area used to have courses in Chicano studies and maybe still do as I haven't checked.

Always was a derrogatory term where I grew up, mostly in the west. As for a college having a Chicano studies course, that doesn't mean a lot, either. I remember back when there were Negro studies courses at universities, and that word has long since fallen out of favor.

My stepdad had a lot of colorful turns of a phrase for anyone not a WASP when I was growing up. Personally, I just called everyone either by their first name or Mr. or Mrs. Whoever.

4178. GE Superadio now branded as RCA

Newsgroup: rec.radio.shortwave

You may have noticed that the GE Superadio III is listed as no longer available from many sources. French-owned Thomson, which bought the GE/RCA consumer electronics business from GE in 1986, recently stopped licensing the GE name from General Electric Co, but the exact radio is now branded as RCA Superadio RP7887

OK so I just did a Google search and...
<http://www.chicst.ucsb.edu/>
I guess someone needs to speak to the University of California in Santa
Barbara bout this.

In this case, the dictionary is wrong. Chicanos are definitely not Mexican born. No Mexican born Hispanic is a Chicano/a.

> 2. A person of Mexican decent (born in the USA) living in N. A.
> 3. A person of about which issues of Mexican heritage living in N. A. is
> spoken of in some way.

Those who consider themselves Chicano do not mind being called as same and self-identify that way. But to call, for example, a Tejano a "Chicano" might be scoffed at or even be cause for resentment. Tejanos are also born-in-the-USA descendents of Mexican immigrants. I surveyed about 20 born-here's in our promotion department who are here now prepping for our September 16 concert event and none considered themselves to be Chicanos; none knew any Chicanos. I asked what a Chicano was to them (all between 18 and about 26) and they said, in different ways, "an arrogant college kid who wants to coast through school on their name." The oldest said, "those guys in East LA in the suits that Cheech made fun of." All said being called a Chicano would be considered as "fighting words."

And I asked one of our highest rated talk personalities (over 2 million listeners in 12 major markets) who was born in Mexico and she said she would not be offended by being called a Chicana, but would immediately clarify that she was Mexican, born in Mexico and could not be a Chicana. This is from Amalia Gonzalez of the Recuerdo Network who talks with listeners all over the Southwest every day.

Chicano studies are related to the Mexican American experience in the US, not the immigrant experience.

The MEChA group, The Aztlan Chicano Student Movement, in its manifest, wants to establish the country of Aztlan in the Southwest, independent of the USA and Mexico, because they believe they are not truly part of the US or of Mexico, are not given full rights, and are discriminated against by Americans for being Hispanic and by Mexicans for being American and not

speaking any / good Spanish and having abandoned Mexican culture.

Again, from the Oxford dictionary: Chicano n noun (feminine Chicana) (plural Chicanos or Chicanas) chiefly United States a North American of Mexican origin or descent.

And Encarta; Chi&#65533;ca&#65533;no (plural Chi&#65533;ca&#65533;nos) noun
Hispanic Mexican American man: a North American man or boy of Mexican descent (sometimes offensive)

Chicano and Chicana refer only to Mexican Americans. They do not refer to Mexican residents of Mexico. Historically, Chicano is a dialectal variant of the Mexican Spanish word mexicano, "a Mexican," and Chicana is its feminine form. Since opinions about these words can and do differ among the various U.S. Mexican American communities, Mexican American is a preferred substitute.

And Wikipedia Chicano (feminine Chicana) is another word for Mexican American. While its meaning has changed over time and varies regionally, it represents Mexican American ethnic identity and the accompanying consciousness of Mexican American political struggle. The terms Chicano and Chicana are used specifically by and regarding Americans of Mexican descent. In Mexico, the term means a Mexican-American person of low importance class and poor morals. http://en.wikipedia.org/wiki/Chicano

As I said, about the only people who use and identify with the term today
are politicized students and intellectuals...
http://en.wikipedia.org/wiki/Chicano has what is actually a well referenced
and accurate description of the 70's Chicano movement and the meaning of the
term today.

I usually get 1520 from Portland Or. without any problem at my
location on Vancouver Island. Tonight the noise bands from KFBK are
obliterating 1520 and 1540. KFBK is coming in strongly as it usually
does.

This is the first time I have heard the digital hash and it sounds
like holding an electric shaver against my ear.

Bob

4187. AM HD on the East Coast

Newsgroup: rec.radio.shortwave
Date: 2007-09-15 05:27:15 UTC
From: Rfburns <jimwilhelm@labs.net>
Message-ID: <1189834035.992082.35660@k79g2000hse.googlegroups.com>
Source record: 123871

This is so sad. AM radio is history here on the East Coast. I have been a radio listener for years and tonight I can't believe what I'm hearing. Good luck boys cause it's over.

> Jon.

If you find that the problem was a blown FET, you can buy yourself some cheap insurance against future zapping.

You can put a couple of antiparrallel diodes between the gate and ground. If this causes interference because you are close to a lot of high-power transmitters, put two of these circuits in series. Use something like 1N914 or 1N4148 high-speed silicon switching diodes.

Depending on where you buy them them, they are 2-10 cents each. Back in the old days, you could get a package of 20 from Radio Shack for US $1.00 plus tax.

d'Edaurdo here is what you wrote the first time :

"All Chicanos are born in the US."

Now you have revised it; and here is what you are writing now:

"A Chicano is, and only is, a born American of Mexican heritage."

There is a 'big' difference in the two statements.

~ RHF

d'Edaurdo,

Now hold on a new-york-minuto - This here is a Shortwave
Radio Listeners Newgroup; and all your so called References
are not vaild here.

I looked up the word "Chicano" in the ARRL Handbook an
it ain't there. Therefore I must conclued that "Chincano"
does not exist and therefore "Chincanos" Can Not Exist [.]

I Swear on a stack of ARRL Handbooks that the above
is a True and Correct Statement. ~ RHF

Yes, but who gives a crap about the FM band? The only good thing about
FM broadcasters is that they're going to teach the proponents of HD AM
about the consequences of a poorly conceived business model.

Between 1200-1300 they are supposedly sked in Japanese. They often make ID's and mention the web address in English during their broadcasts.

Next up at 1300-1400 they should be in Korean.

4207. evidence shows ped ophelia not harmful

Newsgroup: rec.radio.shortwave
Date: 2007-09-15 13:04:07 UTC
From: commander zero rides <commander_xero@yahoo.com>
Message-ID: <1189861447.071785.62790@57g2000hsv.googlegroups.com>
Source record: 123891

The pe do philia scare is a fake. It is not harmful. That is why they refuse to allow anyone to discuss the issue openly. It would reveal that there is much evidence that it is harmless and can be beneficial.

check out these sources:

Gilbert Herdt on the culture of the Sambia people.

The Rind Report

"Harmful to Minors" by Judith Levine

"Love Against Hate" by Karl Meninger

It is even mentioned as common practice in the opera Don Giovanni by Mozart.

There are more sources. Have you ever noticed that only westerners are
arrested overseas? The locals never are.

The sex hysteria is being used as a pretext to distract the people from the failings of the government and to make them fear the government.

All Chicanos are born in the US. A Chicano can not be born elsewhere. All
are born in the US of parents of Mexican heritage... in other words, a
Chicano is a Mexican American, but not all Mexican Americans consider
themselves Chicanos.

CHR and Top 40 are the same thing. A trade magazine decided, to distinguish its chart from others, to use CHR back in the 70s and it stuck because nobody in the business side of the industry liked the teen image of the term Top 40.

At 15:40 through 15:45 I have been receiving a very weak AM signal on 13.560MHz. Smack in the middle of the ISM/HiFer "band".

Latin sounding music with a female buried too deap in the noise to understand.

Anyone else getting this?

Any guesses as to a prirate, HiFer gone wild or an out of band SW station.

Terry
R2000, experimental Lankford 15' relay tuned vertical with a set of 16 elevated radials.

Almost everything is made in China? Huh??? Almost everything means some impossibly high percentage like 90% of all of the things we buy comes from China. And I'm sure you know that is not the case.

> A large majority of our manufactures have long since gone
> off shore.

Well, it is time for those who believe the "Made In China" label to take a stand and buy goods from somewhere else. Or make what they need rather than buy it. But why pick on China alone. Have you considered what goes into producing vegetables from Mexico or farm raised fish in Chile?

But lets not forget why there are more goods on the retailers shelf from China, Mexico, Indonesia, Eastern Europe, Chile, etc. It is because we as consumers voted at the consumers ballot box by purchasing the lowest cost item. We all love a bargain, and I'm sure you do too. As we all know the lowest cost of production is usually somewhere else.

So, if buying locally is truly important then it is time for you and others like you to stop whining and start taking action by changing their buying habits. Implement a solution rather than voice vagu complaints.

> You would be very hard pressed to find goods that are not
> made in China (or some other Third World country).
>
> Do you want goods or foodstuffs that are:
>
> a) Safe
>
> b) Cheap

>
> Pick one.

Beyond whining on rec.radio.shortwave what have you done to eliminate the consumption of non USA produced goods from your family's budget. I suggest that you stop talking and organize enough like-minded folks to start buying only goods from the country(ies) that you want to buy from. If enough others agree with you there will indeed be a change in the goods available at the retailer. Retailers respond to consumer demand and if enough of us say we are willing to pay more for USA produced goods then those will be produced.

If as I suspect you are in a very small minority then no change will occur. But please redirect your complaining into action that might actually cause a change.

Yes, brand names get traded around quite a bit. The label on consumer
electronics really says very little about where and by whome the
components inside were really made. At one time the GE label meant
the goos came from a specific plant in the USA, but that time has long
since passed.

Actually, you are wrong on several counts.

First, just the top 50 metro survey areas have 50% of the US population....
and there are 250 more rated markets. Together, the rated metro markets are
something like 82% of the US population.

8500 stations are in the top 300 metros, and there are 6,500 serving the
rest.... in other words, that 18% outside the metros is many times better
served than the metros, based on station count to population ratio.

Second, the old 1-As, two dozen in number vs. nearly 14,000 US radio
stations, have nothing in the license or the FCC rules requiring them to
serve anything other than the community or city of license.

Third, there is so little AM listening at night that the opportunity to
serve anywhere when few are listening is minimal. The 1-As were created
before TV when most radio listening was at night to non-local network
shows. Today, TV is the night medium, and there is little interest in night
radio.

There is no service of any kind unless a reasonable profit can be made.

FYI, Thomson (a Canadian) was one of the founders of the General
Electric Company. Any apparent lack of relationship between RCA, GE
and Thomson consumer brands was strictly to fool the regualtors.

Since there are literally only a handful of non-commercial AMs, this
discussion has to be about commercial radio.
>

This is incorrect. The fact that there are currently only a handful of non-commercial AMs does not entail that there could not be a greater number of non-commercial AMs. To discuss not only what AM is but the ways in which it could change in the future is perfectly legitimate. This is precisely the problem with you and the other proponents of AM HD: instead of looking to the future, you instead look to the past.

You are a tool and a robot. I am in your so-called ''metro survey
area'' but I am way out of the coverage area of all but 2 local
stations at night, therefore I am part of the half of the population
that lives outside the suburbs.

How many people watch TV at night? How many don't? How many of those
that don't listen to the radio? How many of those listen to AM radio?

Until last night, the flamethrowers ruled the Bohemian airwaves, for
people who aren't slaves to the idiot box.

Wrong! CHR is very crossover averse and narrow. Top 40 was the
epitome of ecclecticism and variety.

It's hard to say. I know that as recently as about 6 months ago he used
to post on rec.antiques.radio+phono. But then somebody pissed him off
over there and he was never seen again. Maybe that's what happened here
- not sure. I miss the 'pearls of wisdom' that used to appear regularly
in the evening hours.

Half the population lives in the top 50 Arbitron metros. Just the top 50.
And 82% live in the 300 rated markets.

I believe that you have mentioned living in or about Canyon Country, CA. You
can not get many stations because of terrain obstructions, but you certainly
have Internet and other options.
>

Of those who are not at work or sleeping in 6 PM to Midnight, virtually all
watch TV. On the other hand, less than 7% are listening to radio at night,
and less than 1.3% are listening to AM.

> Until last night, the flamethrowers ruled the Bohemian airwaves, for
> people who aren't slaves to the idiot box.

Bohemia is in Europe, where some nations have decided to simply eliminate
AM.

CHR was the "new" name for Top 40, courtesy of Radio & Records magazine. The same stations that reported as Top 40 to Billboard and Cashbox and Rudman and Gavin and Hamilton simultaneously reported as CHR to R&R.

CHR today includes r&b, hip hop, dance, alternative, rock, pop, etc. It has as much variety as the format had in 1957... maybe more.

> comes from China. And I'm sure you know that is not the case.

Well, I didn't specify an exact number, but seeing as you ask, consider
the following:

I think most people would consider Wal-Mart a "general purpose" store;
i.e. they carry a VERY wide variety of merchandise, everything from bed
pans to brake pads. Having said that, for the last couple of years it
has been widely published in various media outlets that 85% of this wide
variety of items on Wal-Mart's shelves are made in China. So, even
though I said "almost everything" is made in China, I consider 85% as
'almost'.

>> A large majority of our manufactures have long since gone
>> off shore.

> Well, it is time for those who believe the "Made In China" label to
> take a stand and buy goods from somewhere else. Or make what they
> need rather than buy it. But why pick on China alone.

I'm not. My exact quote was "China (or some other Third World country)".

> Have you
> considered what goes into producing vegetables from Mexico or farm
> raised fish in Chile?

I don't know what you mean by "goes into", but yes, I fully realize
other countries besides China produce things. Unfortunately for this
country, every item produced elsewhere, China or otherwise, is one less
job for an American.

> But lets not forget why there are more goods on the retailers shelf
> from China, Mexico, Indonesia, Eastern Europe, Chile, etc. It is
> because we as consumers voted at the consumers ballot box by
> purchasing the lowest cost item. We all love a bargain, and I'm sure
> you do too. As we all know the lowest cost of production is usually
> somewhere else.

Well, that's what makes it such a conundrum -- people DO like cheap;
however, I contend that if you don't have a job, ultimately it won't
matter how cheap a product is.

> So, if buying locally is truly important

it's 'truly important' only if you ultimately want to have a decent job...

> then it is time for you and
> others like you to stop whining and start taking action by changing
> their buying habits. Implement a solution rather than voice vagu
> complaints.

First, I'm sorry to hear that you consider open discussion as 'whining'.
Secondly, by having this open discussion, maybe that IS 'taking action'.

> Beyond whining on rec.radio.shortwave

Again, IMHO, to call open debate 'whining' is rude and thoughtless on
your part.

> what have you done to eliminate
> the consumption of non USA produced goods from your family's budget.
> I suggest that you stop talking and organize enough like-minded folks

Well, gee, I thought that having an open debate is a way to start
organizing people. Ooops, sorry, I forgot -- it's just whining. ;-)

> to start buying only goods from the country(ies) that you want to buy

> If as I suspect you are in a very small minority then no change will
> occur.

At least no change will occur until the very last well paying job has
been exported overseas, and by then it will probably be too late...

Even if that is true, it in no way entails that none of them expired
while you were making your last post. You may understand the

dictionary definition of "median" (we know how fond you are of your dictionaries), but you've obviously not mastered the logic of the term.

He's certainly not mastered the logic of Mexican being a nationality rather than a race.

I'm still trying to figure out how this is supposed to work.. I understand the concept, FM stereo does something similar by using phasing to reduce the bandwidth needed for the L-R signal. The peaks of the L-R fit nicely into the valleys of the L+R signal and vice versa.

But this doesn't seem like it would work as advertised on a store-stock AM radio, because the ordinary envelope detector does not detect both sidebands, only one of them. So how does it cancel?

I suppose someone could have died while making the post, but if we are going to count car accidents and heart attacks, then any medium, be it the Internet, WiMax, Radio, TV or talking books could have lost a few users in that time span. Statistically, such occurrences are irrelevant, particularly if you are looking at the audience of 75 radio stations, and a weekly audience approaching 12 million.

The median age, that point where half our listeners are younger and half are older (which is all a median point indicates) is about 33 years of age. The bulk are in 18 to 49, with very few, as a percentage, younger or older. Consequently, very few would have died either of old age or, for that matter, crib death.

Considering that nearly everyone has a local station or stations to listen
to, and most night AM radio save sports is Coast to Coast drek, it's hard
even for me to say night AM radio is much good. Of course, the reason why
not much is invested in it has to do with the fact that advertisers like to

reach radio audiences in the daytime, and TV viewers at night, so most ads that you hear (except sports) are bonus spots or freebies.

Since Top 40 was invented (August of 1952) to today, the format has reflected mass tastes... principally 18 to about 34 year olds (the format was "invented" by watching a 30-something waitress playing the same songs over and over on a jukebox). Other than crossovers, there have been few country or jazz Top 40 hits. And, while Top 40 was AOR in the early 50's (Gogi Grant, Perry Como, etc..) it dropped the MOR tunes almost entirely by the late 50's to early 60's... and MOR itself morphed into AC, and today there are many, many AC and CHR crossovers.

Once again, "Hispanic" is a culture, not a nationality or race. A person immersed for most of their life in a culture becomes part of it. One of the benchmark studies has to do with a child of European origin who somehow was found and raised in a primitive indigenous culture and was, except for skin color and such, 100% of that culture when discovered by explorers.

Or, as a cultural anthropologist I knew in Latin America said, "language defines culture. So the language a person swears in when they hit a finger with a hammer or the language they make love in defines their culture better than any indicator."

And you do not understand that there is such a thing as the incorrect
use of an expression, including the widespread misuse of expressions.

Also, previously you were arguing that it's proper to speak of 'race'
whenever people share some property in common. Well, surely being
human is something that all human beings have in common. So, by your
own standards, the human race is precisely that.

Then please stop talking about what a problem this is and do
something. Start by purchasing goods only from USA companies. It can
be done if you are willing to make the financial committment. I
suspect that you are not up to making such a committment however. You
would rather have it both ways by making yourself feel good that you
are supporting the USA with all of your rhetoric while enjoying the
benefits of ever low prices from third world producers.

>

> matter how cheap a product is.

You have a choice to make, but you cannot have it both ways. If you
are willing to pay for products what were made by workers paid USA
wages then you will have to pay the price. But I'm gonna guess that
despite all the rhetoric on rec.radio.shortwave that when it really
comnes down to making a purchase you will do as every one else does.
Continue shopping for the lowest price. That's how that good old
American Boy Sam Walton became so rich - delivering the lowest
possible price goods from overseas and USA manufacturers.

>
> > So, if buying locally is truly important
>
> it's 'truly important' only if you ultimately want to have a decent job...

It's up to you - make a choice. Either pay a premium and buy from
american companies or get a cheap price and buy from a foreign
supplier.

>
> > then it is time for you and

> Secondly, by having this open discussion, maybe that IS 'taking action'.

No, you are not changing your habits to match your rhetoric. You
sound so concerned about goods from non-USA companies being purchased
here in the USA. But when it comes down to making a choice you
continue to opt for goods from the lowest price chinese or other third
world company.

Greenhelm Engineering is looking for volunteers who wish to make a difference by applying their engineering and technical skills. To get involved in the Greenhelm projects or to learn more about the organization, please visit www.greenhelm.com .

Greenhelm Engineering is a non-profit professional organization that works to strengthen communities and eradicate poverty through implementing engineering solutions that improve life conditions.

Greenhelm was founded in June 2007 by a group of engineering students from Canada and Germany willing to apply their knowledge and their ideas to help people in need.

Our goal is to apply our knowledge and engineering skills to implement basic technological improvements in regions where people's well being depends on them.

Greenhelm volunteers are trying to balance the fulfillment of human needs with the protection of the natural environment, thus contributing to a safe and sustainable development.

No, this is not how FM works. I suggest you do some google searching. Here
is a start.
http://www.radio-electronics.com/info/receivers/fm_demod/fm_demodulation.php
http://www.st-andrews.ac.uk/~www_pa/Scots_Guide/RadCom/part13/page1.html

An envelope detector does just what its name implies. It works from the
peaks in the time domain signal. The signal applied to the detector is
everything that comes through the filter; the carrier and both sidebands if
the signal is centered in the filters passband. The only way you can
exclude a sideband is to tune off from the center frequency.

A little bit of google searching can find you these.

Hello folks,

I hope that someone might be able to point me toward an online source where I can find a DC cable with an inline fuse holder. Once upon of time I had one of these (I believe it was about 22 awg) that I used to use for powering a receiver (Drake R8 series RX) off of a gel cell. Seems that I've misplaced it, and the local Radio Shack doesn't seem to have anything comparable in stock. As I'd just as soon order online, I would ask if anyone knows where I can find this item online...

Best regards,

Junius

The detector in your basic AM radio is much the same as it has been for
nearly 100 years now. It rectifies one half of the envelope and filters out
the remaining RF to leave an audio waveform. It does not detect both halves
(both sidebands) of the waveform. This is why such things as selectable
sideband make high end radios better able to pick out a signal. The signal
with both sidebands may be applied to the detector, but it's not what comes
out. I stand by my question. If only one sideband is actually detected,
there can be no phase cancellation.

For Sale: My SGC SG-2000 ADSP2 PowerTalk Transceiver. THIS IS THE CURRENT MODEL. Transmits form 1.8-30 MHz & Receives from .5-30 MHz. 150 Watts. DIGITAL SIGNAL PROCESSING. For Amateur Radio, Type accepted for Marine Radio HF SSB & CW, Commercial HF, etc. Go to this website for all the information on the SG-2000 ADSP2: - - http://sgcworld.com/2000ProductPage.html - - This is just back from SGC where it was updated and serviced. The front panel is perfect. There are a few scratches on the top. Electrically the radio is in perfect condition. It comes with the mic and the power cord. And, if I can find them a quick start card and a manual. (The updated manual is available on the SGC website as a Free download. The price is $1,450 plus actual shipping cost from my zip code to yours. My zip code is 32224. Contact Bill - - iamw7gsa@gmail.com - - or call me at 904-821-5055 (eastern time). I ship worldwide. I can accept Cash, Money Order or Bank Transfer. Please add 3% for PayPal. Thanks for looking. Bill

You clearly don't understand how an AM detector works.

But I do. The basic AM detector works exactly as any half-wave rectifier. If
you used a full-wave rectification, then you could detect both sides of the
RF waveform, but logic would seem to dictate that this would cancel the
audio waveform, since the two sidebands are mirror images of one another.

That is correct.

So far, correct.

> but logic would seem to dictate that this would cancel
> the audio waveform,

No cancellation.

> since the two sidebands are mirror images of one
> another.

In the frequency domain, yes, that is true. But an envelope detector works
in the time domain. The two are not interchangeable.

You seem to believe that the positive peaks of the AM waveform represent one
sideband and the negative peaks, the other. That is grossly incorrect.

If all you need to add is a diode to detect the opposite sideband, it would
be cheap and easy for all radios to be sideband selectable with the flip of
a switch. But you don't see that, ever wonder why?

If the diode based envelope detector only detected one sideband, then half the radios in the world would have trouble receiving CHU as it does not broadcast one sideband. (Adding a balun and getting the wires reversed would invert the signal and you could lose reception.) This follows from what you have suggested, yet it doesn't happen.

Look at the links I provided.

If a full wave rectifier is used, the AM envelope is updated twice as often. It can be viewed as flipping the bottom half of the waveform up and using a single diode. (Look at the waveforms for a power supply with half wave and full wave rectification and this may be clearer.)

To receive a single sideband, you would need to tune the radio so that the carrier is at one edge of the passband of the filter. Then one sideband will be reduced somewhat, depending upon the shape of the filter, and the other sideband will be in the middle of the passband. This generally will not give good rejection of the unwanted sideband.

The other approach is to use the phasing detector as would be found in some (sideband selectable) synchronous detectors or some SSB detectors. These detectors process both sidebands and use cancellation to remove the unwanted sideband.

You are mistaken in thinking that the positive and negative sides of
the RF envelope correspond to the upper and lower sidebands. They do
not. Examine a SSB envelope - it has positive and negative components
that must balance each other, else there would be a DC component. How
could DC be delivered through a vacuum? It is correct that applying
modulation to one side of an Independent Sideband transmitter and anti-
phase modulation to the other side will result in cancellation in the
envelope detector, whether it is half-wave or full-wave, provided both
sidebands are delivered equally. If one sideband is cut off (by
filtering in the receiver), then there would be no cancellation. For
normal DSB-AM, the two sidebands are modulated in phase and the
envelope will be detected by both half-wave and full-wave.detectors,
whether one sideband or both are passed to the detector with carrier.

Regards,
Tom

I did a scan of the band Sunday evening and the only unambiguious IBOC I could hear was on 1520/40. There were maybe 5-8 other frequencies that faded in and out, often weaker than the AM signals in the same spot. Some were hard to tell if they were even IBOC.

After listening to 1530 for a while, those California public service spots have a really creepy big brother aspect that we don't seem to get up here in the Soviet of Washington. Go figure...

The only local AM IBOC here in Seattle, the sports talker on 850 kHz, apparently wasn't running it.

Obviously You didn't Listen To The MP3 or visit the website.

You just threw up some websites one refering to the producers of the hit piece on the history channel. Popular Mechanics which is owned by Hearst Publishing. They are Yellow Journalism at its best.

Seriously listen to this clip then get back to me.

http://harrythomas.info/SpecialReports/SR091307clip1.mp3

if your on dial up you might be able to use this wma

http://harrythomas.info/SpecialReports/SR091307clip1.wma

by the way clip two is now available. I do hope you take the time to

listen to some of these facts presented.

http://harrythomas.info/Disputing%20Popular%20Mechanics%20and%
20Others.htm

clip 1

First Lets Meet The So Called "Experts" Gene Corley and Matthys Levy (one works for FEMA the Other For Larry Silverstein) Both men are connected to the American Society of Civil Engineers . Corley's Company also helped cover up the Oklahoma city bombing in 1994 ;

clip 2

First Lets Meet The So Called "Experts" Brent L. Blanchard and Davin Coburn. Mr. Blanchard's work includes the Protec Report on the collapses

of the towers. It should be noted that the NIST report relied heavily on Blanchard's flawed analysis. Davin Colburn is an editor over at Popular Mechanics Magazine and holds no credentials that would make him an "expert" on this issue. In fact Mr. Coburn is a shill for Hearst Publishing the inventor of Yellow Journalism. So we have a backer of the "official story" and a weasel of yellow journalism as so called "Experts". This debunking is going to be easy;

Popular Mechanics said they consulted over 300 experts, only 72 people and companies were listed.

From the military and government: 26

From big business and main-stream media: 25

Professors and people from universities: 12

Eyewitnesses: 2 (both photographers)

Other: 7

Benjamin Chertoff, senior researcher for Popular Mechanics magazine, is Homeland Security Director Michael Chertoff's cousin.

Popular Mechanics is owned by the Hearst Corporation. Hearst owns:

12 newspapers (ex. San Francisco Chronicle and Houston Chronicle)

17 magazines (ex. Redbook and Esquire)

27 television stations (ex. WCBV-TV Boston and KETV-TV Omaha)

17 business medias (ex. Stocknet and TL Publications)

11 cable stations (ex. A&E and Lifetime)

25 radio stations (ex. WBAL-AM Baltimore and WIYY-FM Baltimore)

23 interactive media (ex. Drugstore.com and govworks.com)

...and more...

The term "yellow journalism" came from shoddy reporting from Hearst Newspapers. It was a Hearst newspaper that falsely reported the USS Maine was attacked by Spain and rallied the American people to enter the Spanish-American War. It has a history of falsely reporting or totally disregarding the facts.

http://www.onlineconcepts.com/pulitzer/yellow.htm

Do Some Real Research and Then Get Back To Me

d'Eduardo You are perpously mixing AMs and FMs

For the purpose of this News Group and the Topic of
IBOC "HD" AM/MW Radio - Please use NUMB3RS
that are specific to AM/MW Radio and leave the FM
Radio Stration NUMB3RS out of this discussion.

DO SLANT THE AM/MW NUMB3RS WITH FM DATA.

> Second, the old 1-As, two dozen in number vs. nearly 14,000 US radio
> stations, have nothing in the license or the FCC rules requiring them to
> serve anything other than the community or city of license.

Well There Should Be -IMHO- Or Reduce Them All To 15 KW
-and- Power-Up the Rural Broadcasters to at least 5 KW.

> Third, there is so little AM listening at night that the opportunity to
> serve anywhere when few are listening is minimal. The 1-As were created

[snip]

I read about such an AM stereo system in an old radio magazine. The positive peaks of the envelope carried one channel, the negative peaks carried the other channel. The idea was patented, but I doubt it was developed to any extent. The normal "flywheel effect" of the L-C filtering would symmetrize the modulation envelope and destroy the stereo seperation. The higher the audio frequency, the the poorer the stereo seperation would be. This system was completely compatable with normal AM radios but adequate stereo seperation would have required such low Q circuits that these AM stereo radios would receive way too much noise and interference.

And, as we've seen, it's far better to try and sell magic radios when everybody else has to put up with the noise and interference.

- All Chicanos are born in the US.

wrong, Wrong. WRONG !
* You are Speaking in Absolutes without Considering :
People + Places + Things {Jobs}

- A Chicano can not be born elsewhere.

wrong, Wrong. WRONG !
* Better Check Your Thinking Again.

- All are born in the US of parents of Mexican heritage...

Not Both - One Will Do -or- If your are raised by your
Mexican or Mexcan-American Grand-Parents.

- in other words, a Chicano is a Mexican American,

Good enough.

- but not all Mexican Americans consider themselves Chicanos.

That Is Very True.
* and Some Even Hate Their Own Heritage.
* * While a few 'others' Talk about "Those People"
-wrt- the current 12M Illegal Aliens from Mexico.

That would be the original Kahn system. I forget the exact name of it. XETRA
used it for many years, and if you had two radios you could tune off channel
high on one and low on the other and get stereo separation. I listened to it
occasionally. It wasn't great, but it was an interesting novelty at the
time.

This is actually quite funny. Tardo has a great fondness for arguments from authority, since they only require him to cite "authorities" (dictionaries, census bureaus, etc.) as opposed to saying anything more substantive. Now, though, he's trying to justify inconsistency itself by appeal to authorities. I guess if inconsistency is good enough for your precious authorities, it must be good enough for us, huh Tardo? lol

Yes, but you did have to tune quite far off center on either side to be able
to detect the alternate sidebands. The same sort of tuning you would do to
get more highs by changing where the signal sits on the IF bandpass curve.

You are talking about receiving a signal broadcast using ISB. The Kahn system uses ISB. This is not the same as having different content on the positive and negative peaks.

It sounds like we are discussing different things. The Kahn system could transmit a 1 kc tone in one channel and nothing in the other and the channels could be demodulated using normal SSB techniques such as narrow bandpass filtering or phasing.

You could transmit a one channel tone of 1 Khz at 1 Mhz using the Kahn system. One way would result with a signal at 1 Mhz and a smaller one at 1.001 Mhz. Just one frequency beating against another. The resultant waveform would be symmetrical. And you'd detect a 1 khz tone with diodes in either polarity.

You are digging yourself deeper. The point of having a healthy AM
band is that I can get something other than Noory or sports if I want
to. KGO and KOA both are live and local all night long. I've been
listening to Rick Barber for over 20 years. I listened when I lived
in Houston and I listen now when I live in the exurbs of Boss Angeles.

What you are doing is driving people away from their radios and toward
their computers. People you don't care about anyway, but persons just
the same. I wish somebody would make a decent standalone internet
radio appliance for under a hundred bucks.

Actually, RHF, it is you who can't seem to understand that others do not see threads that same as you do. Google displays threads differently than other usenet readers. Most readers group threads based upon the subject. When you change the subject, you create a new thread.

You view the world from your distorted perspective. Try thinking about the other readers of the group.

I have a II and a III, and have used what is known as a I.

Go for the II. (Note though that neither the I or the II have the expanded band coverage up to 1700 kHz).

I don't think there is a G.E.Superadio I, is there? Anyway, I own a G.E.Radio and according to the model number on the back of the radio it is a G.E.Superadio although it does not say Superadio anywhere on the radio.I bought the radio new at a Service Merchandise store back in the 1980s.In my opinion, the first G.E.Superadios (including the one I own) are better than the G.E.Superadios models II and III.I have never owned a G.E.Superadio II or a G.E.Superadio III before.I am only basing my expert opinion on reviews I have read before about the first ones and the IIs and the IIIs.

What is inconsistent? The term "Hispanic" used to mean someone from what was the Roman province of Hispania. Since that was a little used term, when the Census was ordered to break out what we now know as Hispanics before the 1980 Census, there was no term that fit the mandate. Latino includes Brazilians, Portuguese, French, Italians, etc. So the OMB and Census came up with a word that covered persons of the "Hispanic culture" which really is just anyone who speaks as their principal language or comes from a heritage where it was the principal language of Spanish. Of course, even this is a defective term in the sense that many Hispanics' heritage tongue is N&#65533;huatl, Quechua, Aymar&#65533;, etc.

But, it had been impossible to separately enumerate this group before (most were under "white" racially) the term worked.

They are at it Again - Bring Back Maggie !!!!
Tierra del Fuego bilingual broadcasts to Falklands
by Andy

An Argentine member of congress has presented a bill calling for the establishment of a bilingual broadcasting station targeted to service the Falkland Islands. Daniel Gallo, deputy for the province of Tierra del Fuego and belonging to the ruling coalition of President Nestor Kirchner said the station would be located in Rio Grande the second largest city of Argentina's most extreme south province.

"It's beyond all discussion the significance that in our days the media has in the development of our society. Not only that they help to consolidate the national identity, they help to bring together under the same banner peoples and cultures that otherwise would remain distant", said Deputy Gallo on presenting the bill.

In this framework, he added that it was essential to have "a 24 hours broadcasting service, both in English and Spanish geared to the Malvinas Islands from the studios of Radio Nacional in Rio Grande and with the purpose of spreading Argentine culture and news".

"Programming should emphasize on different aspects of Argentine culture plus daily information related to Argentina and the region in such areas as politics, economics, history, sports and traditional values which make to the Argentine identity", underlined Gallo.

As to the actual broadcasting "all programmes must permanently insist on Argentina's inalienable sovereignty rights over the Malvinas, Georgias, Orcadas and Sandwich del Sur islands".

The bill is currently under consideration by the Communications and Computer Technology Committee and according to Patagonia provinces press reports has received an enthusiastic backing.

Gallo recalled that "some many years ago, from Rio Grande, Mrs Sara Carolina Mc Phee had a weekly program both in Spanish and English which broadcast messages to relatives and friends living in the (Falkland) Islands plus information about Argentina and "all that which helped to bring both peoples together".

"That memorable attitude just comes to show how positive and enriching aspects such an activity can generate and how advantageous it is to re-launch a broadcasting service directed to the Islanders", he added.

Finally the bill requests the Argentine Executive to make viable the necessary instruments to increase the transmission power of the

current Radio Nacional in Rio Grande "to ensure an optimum broadcasting capacity and reception in the Malvinas islands".

(Source: MercoPress)

1. Steven Allan Says:
September 16th, 2007 at 16:20 e

The population of The Falklands is only about 3,000 in total. Most of the people don't speak Spanish and would never listen to this proposed station and the powers that be in Argentina will know that.

The idea of a radio station for one or two listeners is ludicrous, so I assume that the idea is to get the people of Argentina to listen and make them think that there are loads of listeners on The Falklands who will be drinking in the propaganda or something like that.

In the course of it all, the government will be able to build up some anti-British sentiment and, as they did in 1982, divert the Argentinians' attention away from the domestic problems.

As with all modern inventions, there is always a down side and I'm afraid this is an example of one of them.

DJs picking their own music and respectable listening levels do not go
together. Any time a station allows that, and is somewhat successful, like
progressive rock in the late 60's, someone comes and structures the same
concept and kills the free form station. The exceptions are very, very rare.

ISM HF frequencies are:
6.765-6.795 MHz (not allocated in US but some RFID tags
use this frequency)
13.553-13.567 MHz
26.957-27.283 MHz
40.660-40.700 MHz

Radio Astronomy HF frequencies are:
13.360-13.410 MHz
25.550-25.670 MHz

I am doing a silly project where I compare the noise floor on
13.375MHz with 13.562MHz.
RFID tags appear to be gaining in popularity. As the mall stores about
5 miles NW from me
open the noise floor jumps up maybe 10dB on 13.562. the bump happened
about 10:00 today
as compared to 8:30 M~S. The 13.562 comes in two flavors. Broad band
quasi white noise
and a repetitive "machine gun" sound that happens several times a

minute.

Terry

How can I follow a non-existent thread; I am not on 'Google Groups'.
In Usenet, the header determines the threading logic for many
newsreaders. If you create a new header, it begins a new thread.
I had no idea what you were talking about with no references to
any previous posts by message ID or to previous threads by
name.

I have no interest in the content of any perverse postings; just
expect that Usenet conventions be maintained so we're not kept
guessing.

Regards,

Michael

A careful reading and navigation of the few pages will make it clearer.

From the development announcement page:
http://ipx1.cybertheque.net/homebrew/zipit/zipit-devel.shtml

'fmli' AT&T Form and Menu Language Interpreter; curses-based GUI for screen and keyboard management;
it permits the ZipIT to host complex applications not otherwise well suited for the tiny keyboard
and limited screen. Please view this example screen shot of a Communications Menu with several
submenus (note that the Internet Radio application runs in the background and the user my browse
the web with lynx or perform other tasks selected from other menus while listening):

FMLI Screen Shot1 FMLI Screen Shot2 , and here is the 'fmli' 'F7' Command Menu with a moonscape
wallpaper background: FMLI Screen Shot 3.

That'd be fine to use a wi-fi "radio" but watch "them" figure out a way to make streaming audio pay only, just like pay websites.

I'm rural in Pa. and the whole AM band is shot at night now... IBOC bullshit has to go.

THE SONS OF BITCHES ARE AT IT AGAIN: AMNESTY FOR ILLEGAL ALIENS!!
HOME ADDRESSES OF U.S. SENATORS WHO INTEND TO DEFY AMERICANS AGAIN BY VOTING FOR THE "DREAM ACT" TO GIVE AMNESTY TO ILLEGAL ALIENS!!!! THESE SENATORS HAVE IGNORED REPEATED AND SPECIFIC INSTRUCTIONS OF "THE PEOPLE" BY REPEATEDLY VOTING IN FAVOR OF AMNESTY; SIDING WITH ILLEGAL ALIENS OVER AMERICAN CITIZENS!
By: Hal Turner HalTurnerShow@Optonline.net

The treacherous, disloyal and defiant political sleaze bags listed below have EACH overtly and willfully ignored tens of thousands of phone calls, faxes, letters and e-mails from taxpaying American Citizens telling them to vote AGAINST amnesty for illegal aliens. Each of them voted previously to resurrect the Immigration Bill after millions of Americans opposed it so staunchly the Senate Majority Leader was forced to withdraw the Bill from consideration before the summer.

Several of them defied us AGAIN when a vote for CLOTURE was taken on the Immigration reform bill, but the vote was not sufficient to invoke cloture, so the bill "died."

Here we are, just two months later, after the Senate was repeatedly told by MILLIONS of Americans that we will not tolerate any Amnesty for illegal aliens, and the dirty bastards are at it again! They will vote on "The DREAM Act" next week.

The DREAM Act will give explicit AMNESTY to select millions of illegal aliens!

Apparently, these pricks in the Senate aren't going to obey the American people until some of them get the shit beaten out of them. If that's what it takes to get them to obey I won't shed a tear.

These U.S. Senators are paid by us to represent what WE THE PEOPLE want. The power they wield is OUR power. It is loaned to them by us, for them to utilize as we instruct. Yet despite the calls, letters, faxes and e-mails from literally millions of decent, hard-working, law-abiding, tax-paying citizens, these defiant public servants intend to ram AMNESTY through the Senate by the end of the week!

Clearly, these arrogant public servants need to have far more pressure applied to them so they truly get the message: We will not tolerate them betraying America by continuing to side with illegal aliens over American Citizens!

To that end, I do hereby supply the home addresses and where available, the home telephone numbers, of U.S. Senators who voted to resurrect the
McCain-Kennedy Immigration Reform bill despite being told by the American People that we do not want to give law-breaking illegal aliens a path to citizenship!

Due to the incredible and terrible implications of The DREAM Act, it is clear that We The People must make further use of our Constitutionally protected right to peaceably assemble and to Petition our representatives for the redress of Grievances; at their homes!. Where they cannot escape and cannot ignore us.

They intend to move on this by the end of the week! There is no longer enough time for more letters opposing this Bill to arrive through the Mail. We're tired of them ignoring our Faxes and e-mails and we've definitely had enough of waiting on "hold" to express our views just so some staff-flunky can pay us lip service by phone, hang-up and ignore us. We will not be ignored on this matter any longer!

It is time to "up the ante" for these defiant public servants and go to their homes 24 hours a day this week to confront them personally over their disobedience! The messages they need to hear are simple:
1) OBEY.
2) Do what We The People tell you and vote against this Bill or we will take you out of office. Suddenly, dramatically and irreversibly if necessary.

LET'S HEAD TO THEIR HOMES!
It is time to begin protesting their arrogance and defiance and pressure them mercilessly at their homes; as soon as we can get there and for as long as we can stay. Thousands of us need to just get in our cars and go.

The vote on this thing may happen as early as MONDAY !! There's almost no time to muster our strength. They know this and have intentionally scheduled this Bill in a manner to deny us our right to speak effectively against it. This is deliberate, open defiance of the Will of The People. It is tyranny.

Worse, the DREAM Act would irreversibly damage our nation by rewarding law-breaking. On top of allowing Millions of law-breakers to remain in our nation, it would allow hundreds of thousands MORE "guest workers" into the country every year, driving more Americans out of work!

We're supposed to believe those hundreds of thousands of immigrants will simply go home after their two year "guest worker period." Yea. Sure.

We're also supposed to believe the government will actually enforce the new immigration laws better than they've failed to enforce our present laws. Yea. Sure.

HMMMM. Let's see. They promised immigration enforcement after the 1986 Amnesty. It didn't happen. They promised immigration enforcement in the last two Presidential elections, It didn't happen. They promised immigration enforcement in the last four Mid-term Congressional elections. It didn't happen.

Yet we're supposed to believe this latest new law will somehow be enforced better? No. Not this time. We're not stupid. We won't be fooled again.

These Senators - OUR elected officials - are ignoring us and treating us like fools. They are acting as though they can do whatever they want in spite of what we want. They are wrong.

A word of caution
The information below was gathered from Public Records and while I believe it to be very accurate, in some cases it may be questionable.

For instance, phone numbers may have changed and a completely innocent person may have the Senator's old phone number! While I have personally
verified many of the home phone numbers, some are connected but I was not able to actually verify it as the correct number for the Senator's home.

In addition, people move. So while I have good cause to believe the home address information -- both in their home state and their secondary residence
around Washington, DC, / Virginia -- is accurate, be aware that someone new may live at the address listed.

We want the correct people and NOT innocent people to feel political pressure of having demonstrators out front of their homes So be respectful and verify the information politely before proceeding to give them a message they can't ignore.

Don't Break Any Laws!
For legal liability purposes I must ask you to please not mis-use this information to commit any violation of law. Some states forbid protesting at private homes. All states forbid harassing or threatening phone calls. So before you act, make certain you'll do so in a lawful manner.

Naturally, there are some. . . . . ahem. . . . . "crazy" people out there (whom I call "fed-up citizens") who may choose to do bad things with this information. To them I say, please do not lay-in-wait for these defiant political whores and punch them in the face for disobeying us or crack their skulls with a baseball bat to remind them they answer to us.

In the same vein, there are other. . . . . ahem . . . . . "nuts" (whom I call "PATRIOTS") who may also try to do bad things with this information. To them I say, please do not sneak up on the Senators when they're going into or out of their homes and shoot them.

Definitely don't take up a sniper position near the homes of these stinking traitors and put a rifle shot through the dirty bastards while they're watching TV, and; for goodness sake, please do not fire bomb the sons of bitches and burn them to death in their homes.

While such acts may be well deserved by these scurrilous, sleazy, disloyal, disobedient, treasonous usurpers of the Constitution and the rule of law, and while one of America's Founding Fathers, Alexander Hamilton, writing in Federalist 28, Paragraph 6 told us it was OK to "rush tumultuously to arms" if we are "betrayed" by our Representatives, I strongly caution you against doing any of those things because such acts are illegal -- even if some of us know in our hearts such acts are exactly what's necessary to save The Republic.

It is a very sad time in America where I and so many others now realize we may actually have to start doing such things very soon.

If you break the law, you can be put in prison. (If you get caught.)

So. . . . . be smart about . . . . . .whatever. . . . . you . . . . . have to do. . . . .

On second thought -- about obeying the law -- why bother? Millions of illegal aliens don't have to obey the law, why should we?

I remind everyone of what our Founding Fathers said about situations like this. In "Federalist 28," Alexander Hamilton told us what we must do if we are betrayed by our Representatives. He wrote: If the representatives of the people betray their constituents, there is then no resource left but in the exertion of that original right of self-defense which is paramount to all positive forms of government, ... The citizens must rush tumultuously to arms, without concert, without system, without resource; except in their courage and despair.

In simpler terms, that means "Pick up guns and kill them."

We all agree that our arrogrant, out-of-control, disloyal, disobedient, sleazy, scummy, untrustworthy government must be brought back under proper citizen control before it opens our nation to an unstoppable flood of millions more third-world savages.

We also know that History will judge what we do to save The Republic from this treacherous, tyrannical government at this hour of grave danger and urgent need.

Act in a manner that History will judge as the right thing to do; just like George Washington, Thomas Jefferson, Samuel Adams and their men did, when they confronted their tyrannical, out of control government!

In the event we must suddenly, dramatically and irreversibly restore our control of our government by using force against these low-life, bottom-feeding, arrogant, disobedient, bastards, history will record that they broke the law and the Constitution first. Whatever We The

People choose to do, they had it coming.

Well, I personally have not inventoried the Wal-Mart shelves. However,
the 85% figure is widely published and accepted (nor has it been denied
by Wal-Mart). Also, Roy (RHF) graciously provided the fact that China's
fifth largest trading partner is not a country but Wal-Mart.

>> So, even
>> though I said "almost everything" is made in China, I consider 85% as

> have found other jobs? Look at the unemployment rates.

I would suggest that you look at the rules behind the unemployment rates; if you have reported yourself as unemployed, and have NOT found a job within 6 months, you are DROPPED from the unemployment report -- even though you are STILL unemployed. Certainly, some have found jobs -- although many of those relatively well-paid down-sized workers have later found work, in many (most?) instances, not at their previous level of pay. Throughout this discussion, I have been referring to the loss of relatively well paying jobs, not "Do you want fries with that" or being the Wal-Mart greeter type of jobs.

>>> Well, it is time for those who believe the "Made In China" label to

If you do a bit of research, you will find that, even though they are "USA" companies, the manufacturing (read former decent paying American jobs), is being done overseas. I'm sorry to rain on your parade, but fewer and fewer items are actually being manufactured in the USA.

> It can
> be done if you are willing to make the financial committment. I
> suspect that you are not up to making such a committment however. You
> would rather have it both ways by making yourself feel good that you

> benefits of ever low prices from third world producers.

Not true. See above which states that actual USA manufacturing is becoming an extremely rare breed. Furthermore, although I consider myself an informed consumer, I do NOT shop at Wal-Mart; only been there once and that was an emergency situation.

>>> But lets not forget why there are more goods on the retailers shelf
>>> from China, Mexico, Indonesia, Eastern Europe, Chile, etc. It is
>>> because we as consumers voted at the consumers ballot box by
>>> purchasing the lowest cost item. We all love a bargain, and I'm sure

> sound so concerned about goods from non-USA companies being purchased
> here in the USA. But when it comes down to making a choice you
> continue to opt for goods from the lowest price chinese or other third
> world company.

Comment below:

One last time: Even though you keep referring to "American" companies,
the actual manufacturing (the former well-paying American jobs) are now
being done overseas. In many (but not all cases), all the "American"
company manufacturing overseas does is take advantage of the low Third
World labor rates, passing along very little of the labor savings to
American consumers.

Look at the toy industry; 80% of all toys are made in China. Yet toys,
even from "American" companies seem to cost about what they always have,
even though they are made overseas at a spectacularly lower labor rate.
So, where did most of the labor savings go, if not into the pocket of
the "American" companies, hmmm?

Finally, and again not to rain on your parade, buying from "American"
companies is NOT the issue. The issue IS to try and find a product
actually made by American workers in this country... and good luck with
that endeavor!

>
> - Show quoted text -

You are inconsistent. First, when some posters object that there's a
distinction to be drawn between race and nationality, you respond that

there is no distinction because two people can be categorized as belonging to the same race anytime they share some characteristic (e.g., nationality) in common. However, when someone later describes Hispanic people as belonging to the same race, it turns out that being Hispanic is not, as a characteristic, sufficient for two people's belonging to the same race. So, it appears you can't make up your mind about whether to employ a very 'thin' notion of race or a substantially thicker one. When pressed on this apparent inconsistency, you seek shelter behind your dictionary and the Census Bureau. Pathetic.

Jesus - that crap on clearchannelmusic.com/hdradio makes me vomit - I listen to my own "personalized" music on slacker.com. Most of the shit on the HD channels is just vomit that stations don't want to run on their main analog channels:

"HD Hypocrisy"

"Here's a few more reasons why only iBiquity and a few clueless radio group heads could make a big thing out of HD radio tagging... The very damn radio stations that broadcast in HD offer no programming worth listening to. HD Radio is a virtual sewer of formats owners don't want on their terrestrial frequencies and other assorted garbage that no one sane would listen to -- let alone spend money for new radios -- tagging or not."

http://insidemusicmedia.blogspot.com/2007/09/hd-hypocrisy.html

"And the good ideas keep on coming..."

"So let me understand this... HD radio has been reduced to being a storefront for iTunes? So I listen to my HD radio, tag the songs I like, download them to my iPod, and listen to my iPod rather than my HD radio, right?"

I must say, I listened on MW for a while last night and was really shocked at the interference generated by IBOC. I expected it to be bad, but holy crap...it pretty well eliminates everything except for a few local powerhouses that I never listnened to anyway.

I'm considering getting one of those standalone internet "radios" for casual listening. With at least some of them you don't need an actual home network and can get by just fine with a simple USB wireless adapter. It's depressing, but I suspect IBOC will be one of the best things that ever happened to internet "radio".

To Whom It May Be - Who Is Concerned :

The MATH on the 85% "NUMB3R" for Wal*Mart
is "Actually" composed of Two Numbers :

1 - Wal*Mart Branded Products and Items which Wal*Mart
directly imports from China (PRC). {The Smaller Number}

2 - Products and Items from China (PRC) supplied by 'other'
US and Global Companies; who Import and Distribute them
to Wal*Mart for sale by Wal*Mart. {The Larger Number}

THE TOTAL - The Aggregate is said to be about 85%

EXAMPLES :

Wal*Mart sells an Emerson 20" LCD Stereo TV/DVD Combo
Model : EWL20D6
Assembled in Country of Origin : Imported
Origin of Components : Most from China

CAUTION - Wal*Mart HIDES the Country of Origin
for most of what they sell by claiming that the
"Assembled in Country of Origin" and
"Origin of Components" are {Generically}
listed as "USA and/or Imported"
? -WTF- Does "USA and/or Imported" mean ?

RCA 32" LCD HDTV with Digital Tuner
Model : L32WD22
Assembled in Country of Origin : USA and/or Imported
Origin of Components : USA and/or Imported

Oregon Scientific Genoa Alarm Clock Weather Station
with Motion Sensor - Model JMR868A
Assembled in Country of Origin : USA and/or Imported
Origin of Components : USA and/or Imported

Kodak 7.1 MP EasyShare Z712 Digital Camera
w/ 12x Optical Zoom, Image Stabilization
Assembled in Country of Origin : USA and/or Imported
Origin of Components : USA and/or Imported

Canon 6 MP PowerShot S3 IS Digital Camera
w/ 12x Optical Zoom & Image Stabilization
Assembled in Country of Origin : USA and/or Imported
Origin of Components : USA and/or Imported

Mr. Coffee 12-Cup Steel Programmable Coffeemaker
Model : ISX43
Assembled in Country of Origin : USA and/or Imported
Origin of Components : USA and/or Imported

Coca-Cola Personal Compact Refrigerator
Assembled in Country of Origin : USA and/or Imported
Origin of Components : USA and/or Imported

Sauder Mission-Style Corner Entertainment Center
Assembled in Country of Origin : USA
Origin of Components : USA and/or Imported
-Note- Of course it is Assembled in the USA -cause-
it is a KIT that requires "Assembly" by the Buyer - DOH !

Well if the people who supported blowing up the Murrah building
in Oklahoma City are opposed to amnesty for Mexicans living here-
Which side are you on?
Hal Turner murderers of Americans?
Hard working, family oriented really needy people desperate for an
opportunity?

Snow,

Like DX Ace says the General Consensus is that the
GE Superadio II is the Best of the three GE Superadios.

GE Superadio II = General Electric Model # 7-2885
Speakers : Dual 5" and 1".
Single Band Width.
Knobs : Chrome (color) Body including the bases.
Size 13"W - 9"H - 3.25"D.
Badging : General (GE) Electric "SUPERADIO II" on the speaker grill.
Printed on the Tuning Band Scale: "Long Range" & "High Selectivity"
Made in MALAYSIA and other locations from 1987 until 1994.

Cuhulin,

Like DX Ace says the General Consensus is
that you have what is called a GE Superadio (I)

General Electric Model # 7-2880
-aka- GE Superadio I { # 1}
Speaker : Single/One 5".
Single Band Width.
Knobs : Black Body with Chrome Base Ring.
Size : 13"W - 9"H - 3.25"D
Badging 'General (GE) Electric' on the speaker grill.
Printed on the Tuning Band Scale: "Long Range" & "High Selectivity"
Made in HONG KONG and other locations

4354. Seeking New FAQ/Intro Maintainers for rec.radio.shortwave

Newsgroup: rec.radio.shortwave
Date: 2007-09-16 21:53:37 UTC
From: rram@panix.com
Message-ID: <fck8hu$f8u$1@reader1.panix.com>
Source record: 124038
Cross-posted to: rec.radio.shortwave,rec.radio.info

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultanous cross-posting to our newsgroup.

We are seeking replacement maintainers for the following information bulletins formerly posted to rec.radio.shortwave (and currently archived at http://www.faqs.org/faqs/radio/monitoring/):

radio/monitoring/am-fm-dxing
Subject: Welcome to rec.radio.shortwave (AM/FM DXing)
Maintainer: fybush@world.std.com (Scott Fybush)
Last Posted: 28 Jun 1996 00:09:51 GMT

radio/monitoring/introduction
Subject: Welcome to rec.radio.shortwave
Maintainer: ralph@cbnews.cb.att.com (Ralph Brandi)
Last Posted: 28 Jun 1996 00:09:38 GMT

radio/monitoring/shortwave-faq
Subject: Welcome to rec.radio.shortwave (Shortwave)
Maintainer: ralph@cbnews.cb.att.com (Ralph Brandi)
Last Posted: 28 Jun 1996 00:09:45 GMT

We are interested in offering any technical support necessary to get these articles updated and automatically posted again at regular intervals. This would include establishing contact with the original maintainers for any necessary permissions. We would prefer to seek new, dedicated maintainers at this time, rather than start auto-posting the original articles ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

G'day, eh?

The Crystal Ship is going on the air this evening, shortly after 2200 on 6875 kHz with Valiant #1, and on 5386 kHz with the Viking II.

Sometime around 0100 UTC, we may take a break to reconfigure transmitter/antenna arrangements. Afterwards, we may appear on 3275 kHz // 6875 kHz. Check the "ACE LOGGINGS" section of the FRN Grapevines http://www.frn.net/vines/ later in the evening to see if we've appeared, or just check 3275 kHz // 6875 kHz.

I remember back in either the late 1960s or early 1970s, I read an article in a magazine about America was going to become more and more a service industry and America was going to lose a lot of American manufacturing jobs, in America.
That includes Farming jobs in Ameica too.Just today, I read an article on the internet about more and American farmers are renting land in Mexico to grow there crops in Mexico and the crops are sent to America.Chelaya,Mexico is one of those areas.

Thsat is because "Hispanic" has no common characteristics save language use
or heritage, and even there inconsistencies are found. Hispanic is not a
nationality, an ethnicity nor is it, under any standard definition, a race.
What common characteristic does an English speaking Tejano have with someone
from Buenos Aires... or either of them with a Quechua-speaking indigenous
person from Otavalo, Ecuador?

The usage by some US Hispanics of "raza" means (from the additonal Spanish
definitions... it is, after all. a Spanish word) "brotherhood " or "people."

There is a commonality there of language, origin, ethnicity and even (mixed) racial characteristics. But to say all Hispanics are a race is patently absurd.

> So, it appears you can't make up your
>mind about whether to employ a very 'thin' notion of race or a
>substantially thicker one. When pressed on this apparent
>inconsistency, you seek shelter behind your dictionary and the Census
>Bureau. Pathetic.

In the US, the Census defined the term "Hispanic" by taking a little-used term and adding a meaning. For all practical purposes, it is a neologism, like the contemporary "downsize" term applied to layoffs or the word "crib" used to indicate abode. Language is dynamic, of course, and such changes are why dictionaries have new editions constantly.

If there are no publicly traded shares to establish a price, any share transactions are negotiated between the existing shareholders. Options and similar executive incentives are only of value when exercised. Since there have been no changes in the existing ownership, there is no opportunity for any profits. And since iBiquity is not profitable, there are no dividends, either (most startups and small cap companies don't pay dividends generally, either).

In the markets where stations provide digital versions of their main analog signal as well as multicasting in some instances, radio reaches in excess of 95% of all persons.

You may not find anything you like, but most people do.

Going back to the Pulse and Hooper and Trendex surveys of the 50's, there has always been a percentage of folks who do not use radio... about 5% in the last 40 years on average, and another 6% to 7% that are very light users. So nothing, really, has changed at all.

That sort of propaganda would pale into insignificance compared to the high-powered shortwave fundamentalist Christian garbage spewing forth from numerous, ridiculously conservative and ill-educated broadcasters from the southern US of A. ;-)

September is the month when it is very common for AM anomalies to occur. I can recall... at about 20 miles from its transmitter... WTAM being obliterated by a 10 kw Venezuelan about 2000 miles away... and having Colombians and Venezuelans near-dominating many of the clears and even channels like 1370 bringing in low-power Venezuelans... plus the ABC island split frequencies, like Kelkboom on 1435, hetting the US adjacents.

No, good programming that reduces the audience of our competitors. Illegals
generally don't participate in radio ratings, a fact that logic should make
apparent..
```

Generally? Hell, they seem to participate in every other damn thing in the good ol' USofA.

They have fake documents for this, fake documents for that, and I even hear that the little rascals vote!

I say toss 'em, and YOU as well.

Back to Ecuador with your sorry Chifako ass.

It's a developmental startup.

Satellite radio began development in the early 90's, and is losing about a billion dollars a year... yet the companies involved believe they can be profitable in the future and give value to the shareholders.

Illegal immigrants don't participate in ratings and other research precisely because of this... ratings require revealing address, family size, ages, income, etc. Someone who is illegal will not do this in most cases.

Right. It's about the money.

Without money, there is no free radio. You can always pay $150 a year for
satellite... because that is the satellite model, also about money. One gets
ad revenues, the other charges the listeners. Your choice.

Hell, they even come out and march in demonstrations, right in the open.

Who the hell are you trying to bullshit, Mr. Bullshit?

This has been proven by Arbitron and Nielsen; you do not have ot show ID to
march. And the "authorities" like ICE are not going to start checking IDs in
a march with thousands of persons; it could be interpreted on constitutional
grounds (right of free assembly) and could cause violence.

> Please direct any comments, questions, or criticisms to
> rec-radio-info-requ...@panix.com.

- - - -

have. And
so, without further ado....

o What is rec.radio.shortwave for?

As stated above this group was created for USENETers to have a place
to discuss
the radio monitoring hobby. This group is not moderated, however
'serious'
arguments and any kind of flame wars are strongly discouraged. That
is not to
say that genuine disagreement and discussion of differing opinions is
not
welcome. We only ask that you keep the tone friendly, and in the
spirit of
international cooperation upon which the hobby is founded.

This group is intended to be a place where ANY radio monitoring topic
can and
should be discussed. We are happy to hear from posters who listen to
any part
of the radio or microwave spectrum, from DC to daylight. We discuss
topics of
almost any kind, ranging from (but not limited to) shortwave
broadcasting,
DXing small or distant shortwave stations, utility and teletype
monitoring,
military eavesdropping, station schedules, QSLing sw broadcasters,
spectrum
usage, equipment design and modifications, antennas, receiver reviews
and
recommendations, and many more.

Despite what the newsgroup name might imply, we definitely DO NOT
limit
discussions to shortwave only. Any radio-related topics are welcome.
People interested in scanning VHF frequencies may find that the
rec.radio.scanner newsgroup more accurately reflects their interests,
and
people interested in pirate radio may want to check the
alt.radio.pirate
newsgroup, although this group seems to be more interested in building
small
FM transmitters than in hearing distant shortwave pirates.

For more in-depth answers to questions you may have, we direct your
attention
to the postings entitled "Welcome to rec.radio.shortwave (Shortwave)",
and
"Welcome to rec.radio.shortwave (AM/FM DXing)", depending on where
your
interests lie. Scanner enthusiasts are also encouraged to read Bob

Parnass'
excellent monthly FAQ postings on rec.radio.scanner.

FAQ, of course, stands for Frequently Asked Questions. It is
considered
good form to read the FAQ(s) for a newsgroup before posting to ensure
that ones posting is appropriate. You can find FAQs for most
newsgroups at
ftp://rtfm.mit.edu/pub/usenet by anonymous ftp, or on WWW at
http://www.cis.ohio-state.edu/hypertext/faq/usenet/FAQ-List.html .
Look
under the following URL for a list of all radio-related FAQs.

http://www.cis.ohio-state.edu/hypertext/faq/usenet/radio/top.html

P.S. For those of you without the patience to look in the
appropriate
place, the BBC World Service can be reached by e-mail at
worldservice.lett...@bbc.co.uk. This has become probably the single
most frequently requested piece of information on
rec.radio.shortwave.

OBSERVATION: It appears that Google News Groups Does NOT Maintain or
have a 'Process for Maintaining' the: Mission Statement - Charter -
Guide Lines - Code of Conduct for the Recreation Radio Shortwave
(Rec.Radio.Shortwave) News Group or any other news group.

I have reviewed what is current on Google for the NewsGroups that are
Hosted and Maintained by them. Here are a few items that I have
EXTRACTED and a couple of my comments [RHF-Comments].
.

.
= = = = = GOOGLE GROUPS GENERAL INFORMATION = = = = =
.
GOOGLE GROUPS HELP
http://groups.google.com/googlegroups/help.html
ABOUT GOOGLE GROUPS: Google Groups contains the entire archive of
Usenet discussion groups dating back to 1981. These discussions
cover the full range of human discourse and provide a fascinating
look
at evolving viewpoints, debate and advice on every subject from
politics to technology. Google's search feature enables users to
access this wealth of information with the speed and efficiency of a
Google web search, providing relevant results from a database
containing more than 700 million posts.
[Q] How can I ask for a NewsGroup to be ADDED ?

GOOGLE GROUPS - TERMS AND CONDITIONS OF USE
http://groups.google.com/googlegroups/posting_terms.html
Thank you for your interest in using Google Groups (the "Service").By
using the Service, you agree to be bound by the following terms and
conditions. If you wish not to be bound by the following terms and
conditions, your exclusive remedy is not to use the Service.
The Service contains certain discussion forums and news groups,
including Usenet and other third party news groups (collectively, the
"Groups").
PERMITTED USES: You Agree that you are Responsible for your own
communications and for any consequences thereof. You Agree to Use
the Groups only to send and receive messages and material that are
Legal, Proper and Related to the particular Group. By way of
Example, and NOT as a Limitation, You Agree that when Using a Group,
you will NOT:
* Defame, Abuse, Harass, Stalk, Threaten or otherwise VIOLATE the
Legal Rights (such as rights of privacy and publicity) of others.
* Publish, Post, Upload, Distribute or Disseminate or offer to do
the same (hereinafter "Post") any Inappropriate, Defamatory,
Infringing, Obscene, or Unlawful Material or Information.
* Post any Material that Infringes any Patent, Trademark,
Copyright,
Trade Secret or other Proprietary Right of any party (the "Rights"),
unless you are the Owner of the Rights or have the Permission of the
Owner to post or transmit such material.
* Post any Files that Contain Viruses, Corrupted Files, or any
other
similar software or programs that may Damage the operation of
another's computer.
* Advertise or Offer to Sell Any Goods or Services for Any
COMMERCIAL PURPOSE, other than in Groups Intended For Such Uses.
RHF-Comment [Privite Party Bartering (For Trade/Swap/Auction/Sale
and
Want To Trade/Swap/Buy) of Personal Property is 'By Definition' a
NON-Commercial Purpose and Use of the NewsGroup.]
* Conduct or Forward Surveys, Contests, Pyramid Schemes or Chain
Letters, other than in Groups Intended For Such Uses.
* Download any File Posted by another User of a Group that You
Know,

or Reasonably Should Know, that Can Not be Legally Distributed in
such
manner.
* Impersonate another Person or Entity, or Falsify or Delete any
Author Attributions, Legal or other proper notices or proprietary
designations or labels of the origin or source of software or other
material contained in a file that is Posted.
* Restrict or Inhibit any other User from Using and Enjoying the
Groups.
.
All Legal Issues Arising from or Related to the Use of the Service
shall be Construed in Accordance with and Determined by the LAWS of
the STATE Of CALIFORNIA, United States of America, without regard to
it conflict of laws principles. By Using this Service, You Agree that
the Exclusive Forum for the bringing of any Claims or Causes of
Action
Arising out of or Relating to Your Use of this Service is the United
States District Court for the Northern District of California, or if
such court lacks subject matter jurisdiction, the State Courts of
California encompassed within the geographic scope of the Northern
District of California. You hereby accept and submit to the
jurisdiction of such court in any such proceeding or action, and
irrevocably waive, to the fullest extent permitted by law, any
objection which you may now or hereafter have to the laying of the
venue of any such action or proceeding brought in such a court and
any
claim that any such action or proceeding brought in such a court has
been brought in an inconvenient forum.
.
.
GOOGLE GROUPS - POSTING STYLE GUIDE
http://groups.google.com/googlegroups/posting_style.html
The Do's and Don'ts of Posting on Google Groups: The easiest way to
learn what's acceptable on Usenet is by watching how others use it.
Once you've read a few hundred posts and witnessed a few flame wars
erupt, you should get a feel for what's appropriate and what's not.
To
help you get there a bit faster (and to make sure you don't
unintentionally set off a flame war of your own), we've included some
basic tips that will help you fit into the Usenet community more
easily. This guide is adapted from the very helpful "A Primer on How
to Work With the Usenet Community" by Chuq Von Rospach. For a more
complete guide to Usenet posting rules, search on Google Groups for
'usenet posting rules' or just CLICK HERE. (Use This Link)
http://groups.google.com/groups?q=usenet+posting+rules&num=100&hl=en&...
.
[PSG] Only Post a Message Once. Avoid posting messages to more
than one newsgroup UNLESS you are sure it is appropriate. If you do
post to Multiple NewsGroups, do NOT post to each group separately.
Instead, Specify ALL the Groups on a single copy of the message.

This Reduces Network Overhead and lets people who subscribe to more
than one of those groups see the message once instead of having to
wade through each copy. RHF-Comment [Also See - Avoid Posting to
Multiple NewsGroups.]
.
[PSG] Avoid Posting to Multiple NewsGroups. Few things annoy
Usenet readers as much as multiple copies of a posting appearing in
Multiple NewsGroups (Called "SPAMMING"). A Posting that is
Cross-Posted (i.e. Lists Multiple NewsGroups on the NewsGroups:
Header
Line) to a Few Appropriate NewsGroups Is Fine, But even with
Cross-Posts, Restraint Is Advised. RHF-Comment [Also See - Only
Post a Message Once]
.
[PSG] Please Do Not Use Usenet As An Advertising Medium.
Advertisements on Usenet are rarely appreciated. In general, the
louder or more inappropriate the AD is, the more Antagonism it stirs
up. Just think how annoying it is to you to have your evening meal
interrupted by a telemarketer. The feeling is the same when someone
posts Inappropriate Commercial Messages in a NewsGroup. If in doubt,
don't do it. RHF-Comment [Plain Text "Sigature Files" and URL
WebSite Tag Lines by Past Practice and Custom are 'By Definition'
NOT
Inappropriate Commercial Messages.]
.
.

AM/FM DXing - by Scott Fybush and Earl Higgins
- - - -

For One and All - For All are One,

1. This a SHORTWAVE : "Radio" : Recreation : NewsGroup
http://groups.google.com/group/rec.radio.shortwave/

AS IT IS WRITTEN - SO SHALL IT BE :
" Welcome to Rec.Radio.Shortwave (Shortwave) "
http://www.faqs.org/faqs/radio/monitoring/shortwave-faq/
NOTE - Hams (Who Have Their Own NewsGroups, Rec.Radio.Amateur.*)

2. It is NOT part of the AMATEUR : "Radio" : Recreation : NewsGroups
http://groups.google.com/groups/dir?sel=33609768&expand=1
USENET :
rec.radio.amateur
rec.radio.amateur.antenna
rec.radio.amateur.boatanchors.* (1)
rec.radio.amateur.digital.* (2)
rec.radio.amateur.dx
rec.radio.amateur.equipment
rec.radio.amateur.homebrew
rec.radio.amateur.misc.* (1)
rec.radio.amateur.packet
rec.radio.amateur.policy
rec.radio.amateur.space
rec.radio.amateur.swap

3. SHORTWAVE : "Radio" : Recreation : NewsGroup
Is Equal To -and- Independent From the "Amateur" Groups
http://groups.google.com/group/rec.radio.shortwave/

4. Point-of-Fact - The Amateur Radio License and Call Sign or
Amateur Level of Technical Expertise is NOT a Requirement for
participation in the "Shortwave" Radio Recreation NewsGroup.
http://groups.google.com/group/rec.radio.shortwave/

5. The Topic Is - All Things "Shortwave" along with a-little-of-this
and a-little-of-that from the rest of the Radio Frequency Spectrum.

Conclusion :
While much respect is given to the Members of the Amateur
Radio Community (HAMs) by Shortwave Listeners (SWLs) :
The SHORTWAVE : "Radio" : Recreation : NewsGroup is
after all simply a Shortwave Listener's (SWL) Forum for those
who are interested in the general topic of Shortwave Radio.
[An Amateur Radio License Is Not Required.]

All Are Welcome :
Shortwave Listener's (SWL) and Amateur Radio (HAMs)
to the SHORTWAVE : "Radio" : Recreation : NewsGroup
and All have Equal Standing as USENET Members.

Point-of-Fact - d'Eduardo 'logic makes it apparent'
that you are Counting Illegal Aliens from Mexico;
the vast majority of only Speak Spanish; as a
Captive Group of Listeners for your Radio Stations.

d'Eduardo in your World of Sellable Numbers :
Illegal Aliens from Mexico count more than
American Citizens who are DXers. ~ RHF
.

IBOC Crock,

There you go again promoting "Slacker.Com" !

NOTE - "Slacker.Com" is an Internet Alternative
Sound Source to Free-Over-the-Air AM & FM Radio,

ITIOFD - "In The Interest Of Full Disclosure" - IBOC Crock :
Do You Own An Stock, Options, or Interests in "Slacker.Com" ?

IBOC Crock - Are You Shilling For "Slacker.Com" ?

IBOC Crock - Are you Spamming the Rec.Radio.Shortwave
Newsgroup for "Slacker.Com" ?

we (i) have the right to know ~ RHF
.

IBOC should not Fade - It should Drop-Out

There It Is {Digital Sound} - Oops No It Ain't {Silence}

There It Is Again {Digital Sound} - Oops No It Ain't Again {Silence}

Except where there is both the Analog and Digital Signal
There It Is {Digital Sound} - Oops No It's Fading Analog Again . . .

I'm on the side of the White Race. Who's side are you on?

If the people who blew up the Murrah building are opposed to amnesty
for Mexicans, then I agree with them about amnesty. Just because they
were wrong to blow up the building doesn't mean they're wrong to
oppose amnesty.

>Hal Turner murderers of Americans?

Who are you talking about, the treasonous bastards in Congress? Just
imagine what our Founding Fathers would have done to those fukkers.

Source record: 124082

This story was posted in alt.radio.networks.cbc as
<fcena9$l5$1@morgoth.sfu.ca>

Someone in Iqaluit got pissed when CBC stopped broadcasting Saturday Afternoon at the Opera (which carries the Met during the season and other opera the rest of the year) on AM so he bought a satellite dish and an LPFM transmitter. Dudley Doright has never busted down the shack in the name of the Queen. But now, there's an official CBC2 outlet with a much stronger and better signal and he's still playing BCer. It's too bad that someone won't look the other way whilst he pirates their signal off the satellite so his service ain't redundant.

is Constitution Day.
www.rumormillnews.com/cgi-bin/forum.cgi?read=109887

Be sure you are fed govt ''authorized'' to celebrate Constitution Day.
Me, I have big plans for tomorrow.After I wake up in the morning and drink three or four cups of coffee, I will head on over to the Goodwill store for a few minutes and then to the Wal Mart store food department.Then I might do a little bit of mowing my yard, (not that it needs it, of course) and come in and cool off for a while and then do some more lawn mowing.After about three cool offs, I will have my yard done and then I will drink a ''cold one'' that I will have bought at the store, because I haven't had a beer in over a week.

And, that is why news/talk/sports is so highly-rated on AM, the rush
to simulcast AM on FM, and that FMs are under attack by other media,
such as iPods.

All interesting points.

Reminds me of a cartoon I saw recently. Some white collar workers gathered around the janitor's closet with brooms, mops and buckets and the boss saying "Anybody know how to operate these things now that the illegals have been sent back?"

One more conundrum -- we want 'em out of here, but yet no one here wants to do their jobs.

Any NG readers want to hire out as lettuce pickers? I hear there will be lots of openings once they "Start Walking Back To Mexico". ;-)

News/talk is moving to FM, either outright like WNLS, WTOP and KTAR, or via
a transition from simulcasting to all FM.

News Talk on AM has been in decline for some time, with the salable audience
under age 55 in severe ratings decline and most AMs with this format having
flat or declining revenues.

That has nothing to do with the size of our station's audience. It is all unsupported and biased opinion.

Oh sure,..anomalies. I can recall, at about 10 feet from a
transmitter, monkeys flying out of my ass.

Such late Spring and early Fall AM anomalies have been reported for decades
in DX News, the publication of the NRC.

4423. WBZ Boston just went HD tonight

Newsgroup: rec.radio.shortwave
Date: 2007-09-17 03:34:03 UTC
From: Rfburns <jimwilhelm@labs.net>

I live 60 miles from KDKA (1020) and tonight WBZ (1030) went HD. KDKA is gone completely. These stations can no longer call themselves blowtorches, etc. Those days are over so they can take that language out of their vocabulary. It's a sad day for the broadcast industry and I hope what listeners remain turn off in droves.

4424. Re: which GE Super radio was the best?

American Kennel Club says Blue Heeler Australian Cattle Dogs are highly intellegent, but sometimes I wonder about my doggy. www.akc.org (scratch around on their AKC website and see for yourself) I can't learn any new tricks, I done got way too old.

I have here a Grand Prix AM Deluxe Pocket Radio Model No.A100 AM Frequency 535 - 1605 KHz, made in Philippines.It is a shirt pocket size radio, it runs on a 9 volt battery.I bought the radio for fifty cents at the Goodwill store a few years ago.It is as good as any of my hundreds of other little old,old,old pocket radios at picking up long distance AM stations.All of my old,old,old AM vacuum tube and transistor radios (the ones that work anyway) are better than any of those G.E.Superadios at picking up long distance AM stations.

>> THE SONS OF BITCHES ARE AT IT AGAIN: AMNESTY FOR ILLEGAL ALIENS!!
>> HOME ADDRESSES OF U.S. SENATORS WHO INTEND TO DEFY AMERICANS AGAIN BY
>> VOTING FOR THE "DREAM ACT" TO GIVE AMNESTY TO ILLEGAL ALIENS!!!! THESE
>> SENATORS HAVE IGNORED REPEATED AND SPECIFIC INSTRUCTIONS OF "THE
>> PEOPLE" BY REPEATEDLY VOTING IN FAVOR OF AMNESTY; SIDING WITH ILLEGAL
>> ALIENS OVER AMERICAN CITIZENS!
>> By: Hal Turner HalTurnerShow@Optonline.net
>>
>>
>>
>> The treacherous, disloyal and defiant political sleaze bags listed
>> below have EACH overtly and willfully ignored tens of thousands of
>> phone calls, faxes, letters and e-mails from taxpaying American
>> Citizens telling them to vote AGAINST amnesty for illegal aliens. Each
>> of them voted previously to resurrect the Immigration Bill after
>> millions of Americans opposed it so staunchly the Senate Majority
>> Leader was forced to withdraw the Bill from consideration before the
>> summer.
>>
>> Several of them defied us AGAIN when a vote for CLOTURE was taken on
>> the Immigration reform bill, but the vote was not sufficient to invoke
>> cloture, so the bill "died."
>>
>> Here we are, just two months later, after the Senate was repeatedly
>> told by MILLIONS of Americans that we will not tolerate any Amnesty
>> for illegal aliens, and the dirty bastards are at it again! They will
>> vote on "The DREAM Act" next week.
>>
>> The DREAM Act will give explicit AMNESTY to select millions of illegal

>> aliens!
>>
>> Apparently, these pricks in the Senate aren't going to obey the
>> American people until some of them get the shit beaten out of them. If
>> that's what it takes to get them to obey I won't shed a tear.
>>
>> These U.S. Senators are paid by us to represent what WE THE PEOPLE
>> want. The power they wield is OUR power. It is loaned to them by us,
>> for them to utilize as we instruct. Yet despite the calls, letters,
>> faxes and e-mails from literally millions of decent, hard-working,
>> law-abiding, tax-paying citizens, these defiant public servants intend
>> to ram AMNESTY through the Senate by the end of the week!
>>
>> Clearly, these arrogant public servants need to have far more pressure
>> applied to them so they truly get the message: We will not tolerate
>> them betraying America by continuing to side with illegal aliens over
>> American Citizens!
>>
>> To that end, I do hereby supply the home addresses and where
>> available, the home telephone numbers, of U.S. Senators who voted to
>> resurrect the
>> McCain-Kennedy Immigration Reform bill despite being told by the
>> American People that we do not want to give law-breaking illegal
>> aliens a path to citizenship!
>>
>> Due to the incredible and terrible implications of The DREAM Act, it
>> is clear that We The People must make further use of our
>> Constitutionally protected right to peaceably assemble and to Petition
>> our representatives for the redress of Grievances; at their homes!.
>> Where they cannot escape and cannot ignore us.
>>
>> They intend to move on this by the end of the week! There is no
>> longer enough time for more letters opposing this Bill to arrive
>> through the Mail. We're tired of them ignoring our Faxes and e-mails
>> and we've definitely had enough of waiting on "hold" to express our
>> views just so some staff-flunky can pay us lip service by phone,
>> hang-up and ignore us. We will not be ignored on this matter any
>> longer!
>>
>> It is time to "up the ante" for these defiant public servants and go
>> to their homes 24 hours a day this week to confront them personally
>> over their disobedience! The messages they need to hear are simple:
>> 1) OBEY.
>> 2) Do what We The People tell you and vote against this Bill or we
>> will take you out of office. Suddenly, dramatically and irreversibly
>> if necessary.
>>
>>
>> LET'S HEAD TO THEIR HOMES!
>> It is time to begin protesting their arrogance and defiance and

>> pressure them mercilessly at their homes; as soon as we can get there
>> and for as long as we can stay. Thousands of us need to just get in
>> our cars and go.
>>
>> The vote on this thing may happen as early as MONDAY !! There's
>> almost no time to muster our strength. They know this and have
>> intentionally scheduled this Bill in a manner to deny us our right to
>> speak effectively against it. This is deliberate, open defiance of
>> the Will of The People. It is tyranny.
>>
>> Worse, the DREAM Act would irreversibly damage our nation by rewarding
>> law-breaking. On top of allowing Millions of law-breakers to remain in
>> our nation, it would allow hundreds of thousands MORE "guest workers"
>> into the country every year, driving more Americans out of work!
>>
>> We're supposed to believe those hundreds of thousands of immigrants
>> will simply go home after their two year "guest worker period." Yea.
>> Sure.
>>
>> We're also supposed to believe the government will actually enforce
>> the new immigration laws better than they've failed to enforce our
>> present laws. Yea. Sure.
>>
>> HMMMM. Let's see. They promised immigration enforcement after the
>> 1986 Amnesty. It didn't happen. They promised immigration enforcement
>> in the last two Presidential elections, It didn't happen. They
>> promised immigration enforcement in the last four Mid-term
>> Congressional elections. It didn't happen.
>>
>> Yet we're supposed to believe this latest new law will somehow be
>> enforced better? No. Not this time. We're not stupid. We won't be
>> fooled again.
>>
>> These Senators - OUR elected officials - are ignoring us and treating
>> us like fools. They are acting as though they can do whatever they
>> want in spite of what we want. They are wrong.
>>
>>
>> A word of caution
>> The information below was gathered from Public Records and while I
>> believe it to be very accurate, in some cases it may be questionable.
>>
>> For instance, phone numbers may have changed and a completely innocent
>> person may have the Senator's old phone number! While I have
>> personally
>> verified many of the home phone numbers, some are connected but I was
>> not able to actually verify it as the correct number for the Senator's
>> home.
>>
>> In addition, people move. So while I have good cause to believe the

>> home address information -- both in their home state and their
>> secondary residence
>> around Washington, DC, / Virginia -- is accurate, be aware that
>> someone new may live at the address listed.
>>
>> We want the correct people and NOT innocent people to feel political
>> pressure of having demonstrators out front of their homes So be
>> respectful and verify the information politely before proceeding to
>> give them a message they can't ignore.
>>
>> Don't Break Any Laws!
>> For legal liability purposes I must ask you to please not mis-use this
>> information to commit any violation of law. Some states forbid
>> protesting at private homes. All states forbid harassing or
>> threatening phone calls. So before you act, make certain you'll do so
>> in a lawful manner.
>>
>> Naturally, there are some. . . . . ahem. . . . . "crazy" people
>> out there (whom I call "fed-up citizens") who may choose to do bad
>> things with this information. To them I say, please do not
>> lay-in-wait for these defiant political whores and punch them in the
>> face for disobeying us or crack their skulls with a baseball bat to
>> remind them they answer to us.
>>
>> In the same vein, there are other. . . . . ahem . . . . . "nuts" (
>> whom I call "PATRIOTS") who may also try to do bad things with this
>> information. To them I say, please do not sneak up on the Senators
>> when they're going into or out of their homes and shoot them.
>> Definitely don't take up a sniper position near the homes of these
>> stinking traitors and put a rifle shot through the dirty bastards
>> while they're watching TV, and; for goodness sake, please do not fire
>> bomb the sons of bitches and burn them to death in their homes.
>>
>> While such acts may be well deserved by these scurrilous, sleazy,
>> disloyal, disobedient, treasonous usurpers of the Constitution and the
>> rule of law, and while one of America's Founding Fathers, Alexander
>> Hamilton, writing in Federalist 28, Paragraph 6 told us it was OK to
>> "rush tumultuously to arms" if we are "betrayed" by our
>> Representatives, I strongly caution you against doing any of those
>> things because such acts are illegal -- even if some of us know in
>> our hearts such acts are exactly what's necessary to save The
>> Republic.
>>
>> It is a very sad time in America where I and so many others now
>> realize we may actually have to start doing such things very soon.
>>
>> If you break the law, you can be put in prison. (If you get caught.)
>>
>> So. . . . . be smart about . . . . . .whatever. . . . . .
>> you . . . . . have to do. . . . .

>>
>>
>> On second thought -- about obeying the law -- why bother? Millions of
>> illegal aliens don't have to obey the law, why should we?
>>
>>
>> I remind everyone of what our Founding Fathers said about situations
>> like this. In "Federalist 28," Alexander Hamilton told us what we must
>> do if we are betrayed by our Representatives. He wrote: If the
>> representatives of the people betray their constituents, there is then
>> no resource left but in the exertion of that original right of
>> self-defense which is paramount to all positive forms of government, .
>> . . . . The citizens must rush tumultuously to arms, without concert,
>> without system, without resource; except in their courage and despair.
>>
>> In simpler terms, that means "Pick up guns and kill them."
>>
>> We all agree that our arrogrant, out-of-control, disloyal,
>> disobedient, sleazy, scummy, untrustworthy government must be brought
>> back under proper citizen control before it opens our nation to an
>> unstoppable flood of millions more third-world savages.
>>
>> We also know that History will judge what we do to save The Republic
>> from this treacherous, tyrannical government at this hour of grave
>> danger and urgent need.
>>
>> Act in a manner that History will judge as the right thing to do; just
>> like George Washington, Thomas Jefferson, Samuel Adams and their men
>> did, when they confronted their tyrannical, out of control government!
>>
>> In the event we must suddenly, dramatically and irreversibly restore
>> our control of our government by using force against these low-life,
>> bottom-feeding, arrogant, disobedient, bastards, history will record
>> that they broke the law and the Constitution first. Whatever We The
>> People choose to do, they had it coming.

I saw Loose Change on Youtube today. Made me think a bit. But I don't think
this administration is competent enough to pull of a hoax of that magnitude.

www.rense.com Big Brother Is Watching Us All.

According to that dude at DARPA, our human bodies give off sensitive radio signals.The dude also said someday they hope to see through houses.
What that dude did not say is,,, they have had that see through houses technology for years.There are satellites in orbit that can, and do, see through houses.

4429. A GREAT WAY TO MAKE MONEY, THIS IS NOT A SCAM, TRY IT, THERES NOTHING 2 LOSE

Newsgroup: rec.radio.shortwave
Date: 2007-09-17 05:18:14 UTC
From: changoleon27@comcast.net
Message-ID: <1190006294.416763.86890@o80g2000hse.googlegroups.com>
Source record: 124113

GREAT WAY TO MAKE MONEY-READ THIS!!!!!!
I'll make you a promise. READ THIS INFORMATION TO THE END!
- follow what it says to the letter - and you will not worry whether a RECESSION is coming
or not, who is President, or whether you keep your current job or not.
HOW TO TURN $6 INTO $6,000!!!!!!
READING THIS COULD CHANGE YOUR LIFE!
I found this on a bulletin board and decided to try it. A little while back, I was browsing through newsgroups, just like you are now, and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, Yeah right, this must be a scam, but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 to each of the 6 names and address stated in the article. You then place your own name and address in the bottom of the list at #6, and post the article in at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured: what have I got to lose except 6 stamps and $6.00, right? Then I invested the measly $6.00. Well GUESS WHAT!!... within 7 days, I started getting money in the mail! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00! In the third week I had over $10,000.00 and it's still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it's still coming in rapidly. It's certainly worth $6.00, and 6 stamps, I have spent more than that on the lottery!! Let me tell you how this works and most importantly, why it works....Also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it. I promise you that if you follow the directions exactly, that you will start making more money than you thought possible by doing something so easy!
Suggestion: Read this entire message carefully! (print it out or download it.) Follow the simple directions and watch the money come in!
It's easy. It's legal. And, your investment is only $6.00 (Plus postage)
IMPORTANT: This is not a rip-off; it is not indecent; it is not illegal; and it is virtually no risk - it really works!!!!
If all of the following instructions are adhered to, you will receive extraordinary dividends.

PLEASE NOTE:
Please follow these directions EXACTLY, and $50,000 or more can be yours in 20 to 60 days. This program remains successful because of the honesty and integrity of the participants. Please continue its success by carefully adhering to the instructions.
You will now become part of the Mail Order business. In this business your product is not solid and tangible, it's a service. You are in the business of developing Mailing Lists. Many large corporations are happy to pay big bucks for quality lists. However, the money made from the mailing lists is secondary to the income which is made from people like you and me asking to be included in that list.
Here are the 4 easy steps to success:
STEP 1: Get 6 separate pieces of paper and write the following on each piece of paper;PLEASE PUT ME ON YOUR MAILING LIST. Now get 6 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (to prevent thievery). Next, place one paper in each of the 6 envelopes and seal them. You should now have 6 sealed envelopes, each with a piece of paper stating the above phrase, your name and address, and a $1.00 bill. What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate service and you are paying for it! Like most of us I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal! Mail the 6 envelopes to the following addresses:

#1) R. Overton
P.O. Box 18818
So. Lake Tahoe, CA 96151
#2) KEVIN LEE
8377 APT. I MONTGOMERY RUN RD.
ELLICOTT CITY MD 21043
#3) Stephanie Hicks
1283 Evening Canyon
Henderson NV 89014
#4) Matt Madracki
P.O. Box 1529
Sutton West, Ontario
L0E 1R0
#5) Jean Martinez
P.O. Box 810164
Carolina, PR 00981-0164
#6) Daniel Cook
26321 Ventura Ave.
Hayward, CA 94544
STEP 2: Now take the #1 name off the list that you see above, move the other names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as number 6 on the list.
STEP 3: Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at

least 200 newsgroups. (I think there are close to 24,000 groups) All you need is 200, but remember, the more you post, the more money you make!
This is perfectly legal! If you have any doubts, refer to Title 18 Sec. 1302 & 1341 of the Postal lottery laws.
Keep a copy of these steps for yourself and, whenever you need money, you can use it again, and again.
PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions. Look at it this way. If you are of integrity, the program will continue and the money that so many others have received will come your way.
NOTE: You may want to retain every name and address sent to you, either on a computer or hard copy and keep the notes people send you. This VERIFIES that you are truly providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft.)
So, as each post is downloaded and the directions carefully followed, six members will be reimbursed for their participation as a List Developer with one dollar each. Your name will move up the list geometrically so that when your name reaches the #1 position you will be receiving thousands of dollars in CASH!!! What an opportunity for only $6.00 ($1.00 for each of the first six people listed above) Send it now, add your own name to the list and you're in business!
---DIRECTIONS ----- FOR HOW TO POST TO NEWSGROUPS----------
Step 1) You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning of this letter and drag your cursor to the bottom of this document, and select 'copy' from the edit menu. This will copy the entire letter into the computer's memory.
Step 2) Open a blank 'notepad' file and place your cursor at the top of the blank page. From the 'edit' menu select 'paste'. This will paste a copy of the letter into notepad so that you can add your name to the list.
Step 3) Save your new notepad file as a .txt file. If you want to do your postings in different settings, you'll always have this file to go back to.
Step 4) Use Netscape or Internet explorer and try searching for various newsgroups (on-line forums, message boards, chat sites, discussions.)
Step 5) Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the edit menu. Fill in the Subject, this will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button. You're done with your first one! Congratulations...THAT'S IT! All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about 30 seconds for each newsgroup!
**REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A

MINIMUM OF 200**
That's it! You will begin receiving money from around the world within days! You may eventually want to rent a P.O.Box due to the large amount of mail you
will receive. If
you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it.
JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.
Now the WHY part:
Out of 200 postings, say I receive only 5 replies (a very low example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons
who just sent me $1.00 make the MINIMUM 200
postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make an additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2 and they each only receive 5 replies, that just made me $3,125.00!!! Those 3,125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still 5 persons per 200 newsgroups react I will receive $15,625,00! With an original investment of only $6.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is: do you realize that thousands of people all over the world are joining the internet and reading these articles everyday?, JUST LIKE YOU are now!! So, can you afford $6.00 and see if it really works?? I think so... People have said, &quote;what if the plan is played out and no one sends you the money? So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try? Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual internet.
Remember: play FAIRLY and HONESTLY and this will really
work.

Tell you what, Eduardo. If I were back home, I would, at this point, go the satellite venue in a heartbeat. At least someone in their programming department cares about people that want to hear something besides rap/hiphop/urban contemporary, country, Christian and rock. "free radio" has no choices anymore. It bites. And then, you go and throw up those damn noise generators so all we can get are local stations that are less than 10 miles from us. It's bullshit. You take away our choice, and try to blow smoke up our asses and tell us it's good for us because if you don't take away our choices, we won't have any choices at all. There's a word that was coined for that sort of crap on a stick:

4436. Nighttime AM HD

Newsgroup: rec.radio.shortwave
Date: 2007-09-17 09:47:23 UTC
From: Ron Hardin <rhhardin@mindspring.com>
Message-ID: <46EE4D2B.2A1D@mindspring.com>
Source record: 124162

Well, the band is full of HD hiss at night ; and not every HD station
is on HD yet!

In Central Ohio, I left my trusty Sangean HDT1 seeking a HD station, and
it didn't find any. Yet they're audible all over, on a regular radio ;
even very strong ones.

Verdict : you can't hear any HD radio in HD at night, but they're on all over
for the benefit of ordinary listeners, the hiss being better programming
perhaps. Or maybe it's to drive you to some other band that's more
profitable. The commercial profit is in jamming.

Dry today... mostly dry yesterday, wet the day before, as the typhoon came ashore around Chinhae, and went overland a ways before heading out into the sea of Japan.

Don't know what this new one will do. Korea Meteorological shows it's going to go right up the east coast of China.. but these things have a habit of changing pretty quickly.

As for DX'ing.. it always gets better when it rains. :)

I have a feeling that is going to happen in general, especially with
AM-HD causing massive problems.

And jamming its adjacents - listeners will abandon AM radio, and AM
will eventually die.

What makes it even more disturbing is KDKA's e-mail reply back to me
was to contact the FCC. This is a sad time.

I'm more inclined to go the internet "radio" route myself, especially
since I do most of my listening at home and not when I'm on the run. I
certainly agree with Ron's remarks above, though. What a train wreck!
I pulled out the old SW77 last night and basically heard a few
powerhouse locals against a background of solid hiss and buzz. The
hiss all by itself was enough to peg the S-meter on the 77.

I don't have an HD radio and don't want one but from what little I
know about it, I suspect selective fading will prevent any reliable
listening beyond the groundwave signal. It essentially makes all
stations local since an HD radio doesn't care about signal strength
beyond a certain threshold. It's another example of out-of -control
technology at it's worst. The day of the 50,000 watt blowtorches are
over. You better get another hobby.

I was mistaken.American Kennel Club says they are extremly intelligent.A lifespan of about 14 years.Doggy was born on May 29,2002 near Raymond,Mississippi, eight miles Southwest of Jackson.I will probally croak before my dog does.
www.akc.org/breeds/australian_cattle_dog/index.cfm

Skinny twin sister will be off work for two weeks this Thursday.That wooden fence she started on in Feburary this year, she hasen't hit a lick on finishing up with that fence since Feburary.She bought a new lawn mower and a new gas engine weedeater before she went to work Thursday before last.The lawn mower is sitting out there in the middle of her back yard, anybody could come along and steal it.That other woman, Carolyn, she went somewhere about a month and a half or two months ago, I haven't seen her over there since then and that other other woman, Ashley, I haven't seen her over there in about a month and a half or two months ago either.I guess she went to live with her boyfriend.He works for Mississippi Door Company.

Those G.E.Superadios are over rated.

RH,

Does your poor {none} Nightime "HD" Radio reception problems
and comments apply to AM/MW "HD" Radio 'only' ?

-Or- Are you experiencing this with FM "HD" Radio
reception at Night too ?

-If- What you describe is generally true for AM/MW Radio
then there may be No Benefit for AM/MW Radio Stations
to have their IBOC Operations extend beyond Daylight
Hours and then; at least the Nights would be IBOC Free.

Really? Let's see - one million people pay $6 means that there is
enough money to pay $50,000 to 120 of them, and then only if everyone
else gets nothing, not even their original $6.

If every last human on earth (about 6.6 billion, the last
I heard, including babies in Rwanda who are probably too smart for
this scheme) paid $6 there would only be enough money to pay $50,000
to about 800,000 people.

It might work for you - if you started it and didn't get caught.

http://sos.georgia.gov/investor_education/cyberspace_fraud_and_abuse.htm

[quote]
Investors were told "how to make big money from your home computer"`
as part of the "Electronic Message"` scheme promoted by a San Antonio
man and at least nine other individuals scattered around the U.S.,
according to a cease-and-desist action filed on June 30, 1994, by the
New Jersey Bureau of Securities. In what might be referred to as an
"e-mail chain letter," the promoter claimed that in exchange for five
dollars, investors could earn a return of $60,000 in just three to six
weeks. Participants were told to send one dollar to each of five
people on an online list. Then, those who sent money were to add their
own name to the list and post a message explaining the scheme on ten
different computer bulletin board sites. In practice, the scheme
amounted to a high-tech variation on the old pyramid scam, which is
barred under federal and state laws.

Your daddy, Jeffrey Cook, (phone 510-732-0671) ain't going to like it
if Comcast kills your cable modem account for spamming an illegal
"Make Money Fast" post to "at least 200 newsgroups".

And don't bother with the stoopid trick of using Google Groups with a
Hotmail account - you can still see the ISP in the posting headers.
("NNTP-Posting-Host").

In fact, drop Google Groups and get a real newsgroup provider. Comcast
gives you a free Giganews account but with limited downloads.

Yes, the AM band. Nothing good on FM either, programwise, now that Imus
is gone ; one of the FM stations put Imus on a HD channel.

I heard KDKA from Central Ohio okay, with some WBZ buzz on it, though.

Loud as WBZ was, I couldn't get the HD mode to flip on for it.

Source record: 124193

For One and All,

With the advent of 24/7 AM/MW "HD" Radio good old
AM/MW Radio Listeners may be faced with a need
for Media Migration : {Fleeing IBOC Digital Hash}

They have two basic choices :

1 - XM & Sirius Satellite Radio
+ Great Variety with many more Choices then Over-the-Air Radio.
+ Stand-Alone Devices "Radios"
- Requires a Separate Subscription - Month/Annual Fee
- Relatively Small Subscriber Base {Listeners}

2 - Internet "Web-Radio"
+ Great Variety with many more Choices then Over-the-Air Radio.
+ No New Fees since many already are paying for Internet
Services.
+ No New Separate Subscription for 'basic' Over-the-Net {Free} Radio
+ Relatively Large Internet Subscriber Base {Listeners}
- Premimum Web-Radio will Require a Separate Subscription
Month/Annual Fee
+/- Use the Home PC as the Audio Out-Put Device.
Note - Need separate Stand-A-Lone "Web-Radio" that does
not need the Home PC to be 'On' to Work and WiFi Free

2.A - Home Stand-A-Lone "Web-Radio" {WiFi Free}
* Consumer Appliance - Simple and Easy-to-Use
* AC Power Cord & Plug-in -or- Batteries {Power}
* Telephone Cord & Plug-in {Web-Radio Signal}
* Usable with Dial-Up or DSL
* * Cable-TV "Cable Modem" Option
* It's Got To Look 'like' A Radio {Toaster}

does iboc mean - there is a 'web-radio' in your future ? ~ RHF

Smokey,

Contacting the Radio Station "Local" Advertisers is a Great Idea !

Fighting IBOC Digital Noise and Interference :
The "Local" Radio Advertisers Are The Answer.

But keep the Message 'simple'

1 - I can not hear the Radio Station very well :
Due to IBOC Digital Noise Interference.

2 - I can not hear your Advertisements very well :
Due to IBOC Digital Noise Interference.

3 - The Radio Station Claims : It's Not Their Problem
-or- That They Do Not Have A Problem.

4 - Please Tell the Radio Station I Called You.

IMHO - When Radio 'people' like d'Eduardo
$tart getting Call$ from Advertier - They Li$ten !

Let the Radio $tations themselves $ee the Need for Change.

Let the Radio $tations themselves Contact the FCC
to Correct any $ignal Interference Problem$.

yes it is that simple ~ RHF

Good idea!! Bottom line has always been revenue. So, if advertisers
think their message isn't getting heard, the station might listen.
```

But then wouldn't it be only those messages that are on in the evening?? If I understand correctly most of the interference is during the evening hours. I wonder how that would play not only with the advertisers but also with programming?? Just thinking.

You're gonna pay for radio?!!! Sucka!

I'd rather take the money I'd save on pay-radio and instead spend it
on records, tapes, CDs and replacement diamonds for my hi-fi. :)

And then there are always the hundreds of Internet audio feeds going
on if I don't want to "spin my own".

Out of the box, with the latest firmware from the manufacturer,
it has a proprietary audio player for use with a proprietary
program to be run an a user's PC which streams audio to the
Zipit.

The hacking described on my pages (and other hacks from
elsewhere) permit using the hardware as a general-purpose
platform; I have implemented an IP Radio and other
programs using software that I have written and software
from other closed and open source projects.

Problem with HD radio is: you can't sell it in a shop. There are too much problems with computers, LCDs, Plasma's etc... A salesman says "the problem is those LCDs aren't HD, what do you expect, those HD radio's can't function very well ... "

;-)

4496. ILG Frequency Database announcement

Newsgroup: rec.radio.shortwave
Date: 2007-09-18 01:47:06 UTC
From: sbrant@ioc.com
Message-ID: <1190080026.439063.141860@50g2000hsm.googlegroups.com>
Source record: 124222

To all users of the ILG Frequency Database:

As all of you know, A full-featured radio control program allows for scanning
and a host of other functions and, in particular, integration of shortwave
databases in real-time, like a "TV-Guide" type capability.

This is particularly helpful in locating all transmissions on all frequencies of
a particular broadcaster, at any given time.

The most widely used free shortwave database was provided by a German company at
ILGRadio. As of late 2006 they suspended the public broadcast database project
and it is uncertain if they are going to resume it.

Since I and several friends of mine are Racal 6790/GM users, we have used the
ILG Database for sometime to help control our receivers.

With the ILG project now closed to the public, we figured it was time to
re-establish a public database that uses the same format as the ILG database.

Myself and others jumped into the project and have created a web accessable
ILG compatable database and have made it available to the public for free.

We have also made a few interesting updates.

First of all, if one signs up for the automatic distribution (again free) you
have now the ability to make enteries on your own findings for others to share.
Also you have voting rights on the frequencies logged in the database. That
means, it takes five votes to remove a listing from the logging database.

This is a user created and user controlled ILG type database. You control it,
you make it grow and keep it updated, and you get to use it for free for doing

so. The members then can remove bogus or invalid listings by voting on the
listing.

The database is also made available to the public even if you do not sign up,
however, you will not have voting or entry rights and most importantly you will
not be able to receive the automated distribution.

Yes, thats right, through a special arrangement between us and Docuchannel.net
we have provided a free automated distribution of the database as it is updated
and is then sent directly to your PC for your software to read and use.

To get more information or to sign up go to our website

http://www.ioc.com and select the Ham database.

>From there you can see the database or you can sign up. When you sign up,
you will also automatically be given an account on DocuChannel.net and your
user login information will be emailed to you. NO CHARGES and nothing to
purchase.

Then all you need do is sign in to Docuchannel.net and run the receiver
software. Nothing to install, nothing to purchase, just enjoy the new
discoveries as others log them.

I hope you will use the system that we developed and that you find it usefull as
we have.

Good listening!!

It is about half the band here. Worst affected for me do far is KOH out
of Nevada to which I used to listen to several programs on in the
evenings. It only half the band because only some stations are
broadcasting IBOC at night. If they all were the whole band would be
trash.

Good strategy. But also note that you can RECORD pay radio and make
lots of cheap tapes and CDs. Burn a couple of CDs per month and
satellite radio can pay for itself. (1 retail CD == 1 month of sat.
radio.)

>
>And then there are always the hundreds of Internet audio feeds going

And what... you DON'T pay a monthly subscription for your internet
access???

Many people I've met have your same, odd attitude. And the
contradiction continues to puzzle me: why do you recoil at paying for
radio but happily accept paying for net access?

The whole "radio/tv should be free and other media should not be" is
just a big headscratcher to those of us who try to approach life
logically.

Thank you for the effort. It took a bit of doing but I have finally managed
to download the file. FOr those of you having problems, make sure you have
the latest version of Sun Microsystems Java Plugin. You should have at least
version 6 rev 1. The lates version is version 6 rev 2 BTW. Mine aws version 5
and did not work with the java applet used on Docuchannel.

To find out which versio you have and upgrade if needed take a look here:

http://www.java.com/en/download/installed.jsp

I also found I neede to register for an account to download the file, but
could view it without registering.

Hope it helps

Last time I checked, the American justice system isn't based on personal opinions proclaiming the guilt of a person. Rather it is based on proving beyond a doubt that one is guilty. Whether you or I or Bozo the clown thinks OJ is guilty is a moot point. Rather, it is based on a jury of ones peers and members of society to convict based on prosecutorial merit. Maybe someday you'll learn about the American justice system.

4507. WTAM 1100 now IBOC wiping out WBT 1110

Newsgroup: rec.radio.shortwave
Date: 2007-09-18 06:35:38 UTC
From: IBOCsuckx <hairy2crankr@yahoo.com>
Message-ID: <1190097338.490751.155580@g4g2000hsf.googlegroups.com>
Source record: 124233

It used to be that if you could not hear C2CAM on 1100 WTAM out of
Cleveland you
could hear it on 1110 WBT out of Charlotte and visa-versa. Now that
1100 WTAM is transmitting
IBOC 24/7 forget about hearing WBT in some areas of the country. The
white noise
this IBOC crap puts out is easily covering up 10 kHz either side of
WTAM's carrier on 1100.

IBOC sucks. Plain and simple. IBOC suckz MAJOR ASS.
If more stations start comming up with this IBOC crap
at night look for my two GE Superadios to be on e-Bay
or perhaps on the curb in-a-box on trash night soon.... ;(

If you think that Digital radio is a crock of shi+ just wait till
regular
Analog TV Broadcasting shuts down once and for all in 2008 or 2009
and all those folks who still use rabbit-ears find out their TV sets
are now utterly useless unless they pay $50 for a converter box.

Looks like we've come full circle! I can remember UHF converter boxes
on TV sets in the 50's and 60's - except they worked! I know many
people who've tried getting digital TV on an antenna and almost
all of them had nothing but problems.

This via 'Gary' on the Yahoo Drake R8 page:

"Some of my local Los Angeles stations are now broadcasting in IBOC
at night. One of them is KABC 790. I used to be able to listen to
KOH 780 Reno with minimal interference on my Sat 800 or E1XM with my
Quantum QX Pro ferrite loop by using LSB sync. Now the signal is
covered with IBOC hash from KABC. Oddly, tuning using USB sync works
somewhat better for reducing the IBOC hash, but not of course the
normal analog splatter. So far, I'm not enjoying IBOC at night."

Apparently the selective fading bug manifests during very mild fades, unnoticeable before 9-14, but very prominent and distracting since.

I'm about 40 or so miles from the transmitter and the night signal is definitely compromised.

Good point. And the same can be done with Cable TV's Music Choice
service. Hook up a tape deck to the audio outs of the cable box and
you're in business.

> And what... you DON'T pay a monthly subscription for your internet
> access???

Well, technically I don't. My husband pays for it because he's the
computer geek. ;)

> Many people I've met have your same, odd attitude. And the
> contradiction continues to puzzle me: why do you recoil at paying for
> radio but happily accept paying for net access?

It's always been a fact of life that you have to pay for Internet
access and telephone service.

Radio was originally designed to be a free service. You buy the
receiver and once you finish paying it off, you don't have to keep
paying to receive the service.

> The whole "radio/tv should be free and other media should not be" is
> just a big headscratcher to those of us who try to approach life
> logically.

Again, the whole idea of radio BROADCASTING was that it was supposed
to be a free service (cost of radio aside), not something where you
had to pay a monthly fee. Even in countries where you have to pay a
licence fee, you can get away with not paying it and still receive the
radio waves.

Digital TV is going to be a disaster just as with digtal radio - take
a look at all the dropouts will digital cellphones. Just image, your
new, wonderful digital TV goes blank, instead of just fading - digit
radio and TV are a farce!

Stations don't care that you can't hear beyoind thier local area and the FCC doesn't care that you can't hear your favorite station anymore. Try and contact them.

HD AM is here to stay. 100 yrs of tradition has been given to the highest bidder and the consumer lost.

Try and find an HD radio. The salesman just looks at you wondering what you're talking about.

The FCC says - "let the market decide". The market did decide by little or no need for HD but that was just a smoke screen because you get it anyway.

It's over.

David,

But in-fact the "HD" in HDTV does
stand for something 'High Definition'.

While the the "HD" in HD-Radio
actually stands for Nothing :
Well May Be 'Highly Doubtful' ;-{

Do you have a digital tv? I do, and reception is OUTSTANDING. NO dropouts on stations within 60 miles or so. And morning and evening reception (depending on weather - same as analog tv reception) from 180 miles away is absolutely perfect. In fact, I get digital stations loud and clear that I can't even get on analog!

Some stations are not yet broadcasting full power on digital which may cause problems for those in the fringe reception areas, but once they are using full power, reception should be consistantly excellent.

No more snowy picture for me.

Yeah, digital radio is pretty stupid, but I have to agree on this one - HD TV signals really do look quite amazing on an HD TV, and even if you think that it won't be great on regular broadcast (and it actually is), most folks are using cable these days anyway. Turner Classic Movies and my favorite silent films have never looked better (at least on the tube).

I'll keep using my old TV until it breaks down, but once it does, I will be happy to get a new fancy digital TV set :-)

Living in NC,WBT was always my clearest station when I wanted to
listen to AM C2C at night .Now
it sounds like a printing presses in a newspaper room.It is a sad day
or night when they ruin your favorite local station.
All my radios & different antennas -doesnt matter-train wreck!

While, God I hope you're right, don't count on IBOC going away anytime soon. There's been a LOT of money spent, and a huge effort put into this technology. No one is going to let this go easily. And RADIO, often being its own worst enemy, especially, will hang onto this until there is nothing left.

By the time AM Stereo was implemented, it was nearly DOA. And yet, it took nearly 20 years for it to go away. And, though, noone has that kind of patience, today, you can expect AM IBOC to linger long after the AM Band is dead, dead, dead.

RADIO is determined that there will be a digital solution to both its problems and its non-problems come Hell or high water.

No one wants to see this horseshit go away more than I do, but as
you've witnessed here, radio people can be stubborn.

I tend to agree with you here. I'll never enjoy the internet the way I used to enjoy AM/MW radio, but the internet will at least let me listen to most, if not all, of the stations I enjoyed prior to AM IBOC. If the AM broadcast band really is history, and I'm more and more thinking that it is, then streaming audio via the internet seems like the way to go.

4559. Radio-Mart/Gottahaveit1995 Opened a PayPal dispute with me

Newsgroup: rec.radio.shortwave
Date: 2007-09-18 21:19:15 UTC
From: Cartrivision1 <doidy1@juno.com>
Message-ID: <1190150355.248224.140860@r29g2000hsg.googlegroups.com>
Source record: 124143

I sold a Icom receiver to Gottahaveit1995, who also has a Ebay account under the name of Radio-Mart. He emailed me after receiving it claiming it had been damaged in shipping, but offered no evidence that it was not working as it was described in auction. Anyway, he sent some pictures of the "damage" and it was basically some pre-existing cosmetic dings to the rear of the cabinet.

He opened the dipsute but did not mention any damage specifically, just that it was damaged in transit, which it was not as he did not describe any crushed boxes, etc. He than said in the dispute that he was afraid to plug it in to test because it might explode or something ludicrous like that. I was honest with PayPal in that I described it in good working condition and that the buyer never inquired about any cosmetic issues and it was sold as-is. As a consequence PayPal froze money in my account. He then went on to say that he would accept $40 so that he could buy a new case for the radio which I did not even get a chance to reply to because he escalated the claim after I had made only one reply to his charges.

Well after doing some research on the Ebay ID "Gottahaveit1995", I discovered a lot about him and how he supposedly bids on his own items. Then I get this email from him after confronting him with this:

I am no liar, yes I own Radio Mart Inc,, I am not and never denied this

not that it has anything to do with our transaction

now be the man and step up to the plate and do the right thing here.

Martyn

I would suggest anyone who does business on Ebay block him from him doing any transactions. I cannot believe that he is still in business on Ebay doing business the way he does. I guess the bottom line for Ebay is the almighty dollar so they look the other way.

Luke

You'll have to stand in line to take a Louisville Slugger to this guy. His antics are well known in the hobby. He's pretty slimy.

And that's being generous.

This Icom receiver will be sold by Radio Mart as "one person from brand new." The best receiver I ever used.... etc.

Isn't it amazing that just to jam adjacent, smaller broadcasters off
the dial, that the HD Radio Alliance's own stations are jamming each
other! The broadcast industry must be full of morons - I've heard that
it IS full of alcoholics.

AMS didn't prevent anyone from listening to their favorite radio station,
and there were many of us out here that enjoyed it a great deal. DX
listening in AMS was actually quite robust.

I'm certainly not a fan of Radio-Mart, but you admit not informing the buyer of cosmetic flaws. Saying you sold the radio "as-is" doesn't cut it when you admit knowing about the dings... and admit not telling the seller about the dings. You knew this info would affect the sale of your item, so don't take yourself out of the blame.

Best advice I can give is either pay Radio-Mart what he asks or take the item back with a full refund.

Source record: 124262

Since FM HD in its current form will likely survive it's very, very unlikely AM HD will fail. Since both systems were hatched by iBiquity they will both be force fed to the consumer untill such a time, in the future, when the FCC sets a date for the end of analog radio. There will be no FM HD without AM HD ....period.

And this will happen. There will be no turning back.

So all of us who have loved traditional radio are out of luck. It's that simple. The days of listening to a distant station coming via the ionosphere are over - at least on the standard broadcast band. There will be no more 50KW blowtorches and AM radio will essentially become all local.

It's sad to see another pleasant thing pass due to out-of-control technology.

Luke,

Did you List and Reveal these Defects in the Item in
the eBay Auction Listing ?

Did You State that the Item was Used ?

Did You State that the Item was being Sold "As Is" ?

What Did Radio-Mart et. al. pay for the Item

Did Radio-Mart Pay -via-you- to have the
Item Shipped to Him ?

How did you Ship this Item ?
USPS [ ] - UPS [ ] - FedEx [ ]

Did you offer Radio-Mart the 'Option' of Buying
Shipping Insurance ?

Did Radio-Mart buy the Shipping Insurance ?

Was the Shipping Box Damaged ?

- - - It all begins with what you did initially
on eBay.

Tell Radio-Mart that Shipping Damage is the
responsibility of the Shipper and the Receiver.

Yesterday afternoon I had been listening to the Overcomer. I don't believe any of that Apocalyptic crap, but do find the man himself to be extremely amusing. I'm sure he doesn't mean to be.

Last night just before 10pm I put the radio on to tune in a local station. It was still tuned to the overcomer. Here's what happened:

They played the funeral hymn 'Abide with Me', then a womans voice announced "The prophet is dead, long live the prophet" That was followed by 12 trumpet blasts and then the station went off air. (Always does go off at 10pm here)

Has Brother Stair finally gone to the man downstairs or have I heard this out of context?

That is true. Radio stations are businesses that depend on
advertising revenue from local sources. I would not expect that a
radio station in Los Angeles would have many advertisers from
Sacramento or Bakersfield. There are more than enough radio stations
to service local areas.

> the FCC doesn't care that you can't hear your favorite station
> anymore. Try and contact them.

Catching stations from afar is am enjoyable hobby for DXers that
creates no revenue for the radio station. None. There are more than
enough radio stations to service local areas

>
> HD AM is here to stay. 100 yrs of tradition has been given to the

Actually no that is incorrect. Best Buy is running big ads for HD
radios.

>
> The FCC says - "let the market decide".

Yes, market-based allocation of resources is yet another hugely
successful legacy from the Republicans. Just look at what a great job
they did with energy, telephone and airline deregulation. Or what
they did to the tax code in the name of opening up investments.

> The market did decide by
> little or no need for HD

Uhhh, just when did the market decide there was little or no need for
HD radio. HD radio has really only just become widely available.

> but that was just a smoke screen because you
> get it anyway.

You seem to be saying that the market creaated a smokescreen, but I'm
sure that is not the case. Who created a smoke screen.
>
> It's over.

At this point I have no interest in buying yet another piece of gear
to receive radio programming that will in alll likelihood be very
similar to what can be gotten over standard radio at no charge. The
programming on HD radio has the potential to be about as interesting
as that available via satellite radio, which is to say not very much.
HD radio does not have an added listening fee which is a minor
benfit.

You may well be right that AM IBOC will spell the end of analog AM,
but it seems even more likely to me that, if AM IBOC does come to rule
the AM BCB, then the AM BCB is doomed for purely commercial reasons.
I'm sure that AM IBOC stations understand that they're not going to
take on their FM counterparts. The only thing that will change in an
AM IBOC world is that the audience will become exclusively local and
all of the infomercials will be broadcast in high fidelity. It's hard
to imagine a more efficient means of commercial suicide.

Stair's Overcomer website mentions nothing about the boss' status of
life.

Maybe it was a dig at the prophet Mohammed?

Some areas have people but not enough to warrant a local station (not
enough advertising income). The only things these people have for
radio entertainment are the distant stations.

Or, imagine yourself being in a town with maybe one or two local
audible signals (either FM or AM). And neither is a format you
like....what do you do if you want radio? Gotta DX.

Some channels on both Sirius and XM have commercials. I believe it's
only some of the music channels that are totally commercial free. But
the talk stuff? Oh yeah, that has spots. And you're paying to hear
those....

"RADIO is determined that there will be a digital solution to both its
> problems and its non-problems come Hell or high water."

DAB is stalling in the UK, DAB has stalled in Canada. As consumers
continue to shunn HD Radio, and broadcasters realize that IBUZZ has
driven away a good-part of listeners, they will have to turn off
IBUZZ, at some point.

I'm not so impressed with ibiquity. They've screwed up more than they've succeeded. Their biggest success, self-promotion, has cast an ironic light on their shortcomings. If ibiquity is going to wait it out, it's going to take money. Were's that money going to come from? From broadcasters who have to keep paying -- right now -- for the promise that significant numbers of listeners will someday strart trickling in? Or will the money come from a turnaround in sales of all those expensive HD radios?

> There
> will be no FM HD without AM HD ....period.

Why not? HD needs radio sales to have a chance. Consumers have a long track record of preferring cheap radios. Most people don't think a HD radio is worth one or two hundred bucks more than a regular radio. But plenty of people will chance it for five bucks. And FM-HD is stronger than AM-HD.

So it would make perfect sense for ibiquity to offer a bargain basement FM only IBOC chipset.

Why not? Oh, I get it. It's that "perfect sense" part.

>
> And this will happen. There will be no turning back.

Let's hope that ibiquity sees itself in lockstep with the inevitable march of history. There's always room for more inflexible knotheads in the dustbin.

The status quo is doomed, whether it's from IBOC or individualized media or whatever.

Don't count on it. We're not talking about DAB in the UK and Canada, where decisions about implementation and development are made by the government. We're talking about terrestrial broadcasting in the US, where the most vibrant force is the market.

Most people are not aware that the Powell FCC mandated that all future modulation schemes would be DIGITAL. For all media. And that analog was in its sunset years. Nowhere does it say what those schemes would be. Only that they be digital. IBOC fullfils that criterion.

This will NOT die easily.

You're correct that there's little to no public interest. And that FCC has also mandated that there will be a marketplace solution to the issue. But that doesn't mean that IBOC is in a buy or die circumstance. It means that whatever is to come will be determined by market forces. Within THAT context, both Radio an iBiquity could continue to modify, evolve and reinvent IBOC applications, technical solutions, and marketing solutions until things catch fire.

You need to consider that there has been an astonishing amount of money spent here. By iBiquity. By broadcasters. And by manufacturers. And that licensing offers a cash cow to iBiquity when the market for IBOC hardware saturates. No one in a market economy will let go of that kind of goldmine without a fight.

IBOC may be doomed. God, I hope so. But whether or not that's true, it will not die quickly. And it will not die quietly.

This will not go away as quickly as it appeared.

IBOC Crock,

Wireless WiFi/WiMAx Internet Radio - ? Maybe ?
IMHO - Too Much of a "System" for most Consumers.

I think Stand-A-Lone "Plug-and-Play" Web-Radios
"Kitchen Appliances" and bedside "Night-Stand"
Web-Alarm-Clock-Radios would be the First-Choice;
better alternative for most Consumers.

There are web radios now that are stand alone and work perfectly from anywhere in your house even while your computer is turned off. They do require that you have an internet connection and the ability to use wireless devices, but that's not asking for much in this day and age....and it'll be asking for even less tomorrow. And I do think consumers will tolerate the minimal system requirements given that web radio will give them hundreds, even thousands of listening

possibilities that are closed to them on terrestrial HD.

And, how are consumers ever going to get good reception with portable HD (don't forget that HD needs power bricks), as table-top needs AM-loop and external FM-dipole antennas? Technically, ther eis no way HD will ever work...period. $5 HD radios - with the expensive HD chipset and licensing fees to iBiquity, it will never happen. And, what stores sell radios anymore and who buys radios?

Don't forget that radio stations are first businesses. Their target audience has to be listeners who advertisers feel will be in a position to respond favorably to their message. Listeners will not likely drive 500 miles to purchase a car, refrigerator, insurance, etc. Those few people who live outside the primary listening area are of no interest to a commercial radio station. It's just tough if the radio station does something like add HD channels that disrupts the listening of someone outside the target area. Those are the hard cold facts of radio stations that hope to make a profit.

>
> Or, imagine yourself being in a town with maybe one or two local

True you you may have to dx if you live in the boondocks, or buy a satellite radio setup. But that faraway radio station will for obvious business reasons have no concern about your listening habits because you are not a listener who would be of any interest to their advertisers.

If radio stations were public entities with no profit motive then I could understand your concerns. But the basic radio model in this country is built around it being a profit making enterprise.

In NYC you should have no shortage of local radio stations.

> Wireless WiFi/WiMAx Internet Radio will kill terrestrial/HD Radio.-
If Internet Radio is in a position to kill HD radio then it is equally
in a position to kill the parent of HD radio as well.

Are you saying that if a radio station broadcasts on the Internet that
action will kill off its signals on standard broadcast and HD
channels? Please explain how this mass murder will come about.

> > will be no FM HD without AM HD ....period.
>
- Why not? HD needs radio sales to have a chance.
- Consumers have a long track record of preferring cheap radios.
- Most people don't think a HD radio is worth one or two hundred
- bucks more than a regular radio.
- But plenty of people will chance it for five bucks.
- And FM-HD is stronger than AM-HD.

FD
The vast majority of Consumers buy Low Cost Kitchen Radios
and Bedside Radio Alarm Clocks.

All The FCC Had To Do / All the FCC Has To Do is Mandate
that All 'new' Consumer and Automotive AM/FM Radios sold
in the USA are IBOC {Analog and Digital} Compliant by a
Certain Date [.]

Then over time IBOC will be forced upon the Consumer and
Automotive Drivers.

IMHO - It is Automotive Drivers via New Car/Truck purchases
that are 'naturally transitioned' into New Radio Technologies.

An IBOC "HD" Radio in every Car/Truck for Drive Time Radio
Listeners to Listen To : Will Get These Radio Listeners To

Want An IBOC "HD" Radio In Their Homes and At The Office.

IBOC FM "HD" Radio 'fits' the FM Radio Band Plan
and should be accepted by Consumer over time as
a better mode of Radio Enjoyable FM Radio Listening.

IBOC AM/MW "HD" Radio does not 'fit' the AM/MW Radio
Band Plan and may fail; without a major revision to the
AM/MW Radio Band Plan :
* Fewer AM/MW Radio Stations with the Migration
of most of the AM/MW Band Radio Stations to the
FM Radio Band.
* Greater Channel Spacing : 25 kHz vice 10 kHz
* More Uniform Digital Broadcast Signal Power for all
AM/MW Digital Radio Stations 500 to 2500 Watts (1:5)
vice the Analog scheme of 1000 to 50,000 Watts (1:50)
Note this puts the Locals at 500/1000 ~50% of their
original Analog ERP -and- the Clear Channels at
2500/50000 ~ 5% of their original Analog ERP making
them Regional Broadcastes.

I Ask Myself : What IBOC ?
All I See Is The Blinking Blue Light ! ~ RHF
In the Distant Land Where IBOC Fears To Go :
Life Exists and Radio Listeners Live Beyond the 10mv/m Contour.
.

- So it would make perfect sense for ibiquity to offer
- a bargain basement FM only IBOC chipset.

IMHO 'that' would be the "Smart" Thing To Do.

>
> Why not? Oh, I get it. It's that "perfect sense" part.
>
>
>
> > And this will happen. There will be no turning back.
>

>
> > It's sad to see another pleasant thing pass due to out-of-control

> > technology.
>

- The status quo is doomed, whether it's from IBOC
- or individualized media or whatever.

- Frank Dresser

IMHO - Over time FM "HD" Radio will be accepted by Consumers
and FM Radio Broadcasting will prosper.

However - AM/MW Radio will Die and it's Death will be hastened
by IBOC's Digital Hash. {All I Here Is Noise Across The Band}

~ RHF
.

About the only formats that attract any AM audience among adults are the variants of news & talk. This is a format that commands less than 10% of total listening in most markets. Add to that the fact that night listening to radio is about a quarter of the 6 AM to 7 PM levels.... and you have very few listeners who would find anything of interest on distant AM stations.

For some reason my post last night is not showing up in the group.
Anyway I have attached a link to the picture of the "damage" that he
is claiming. It is obvious that it is just wear and tear from being
picked up and set down and stored on it's side as how the radio is
designed. And the radio was sold as-is and was missing the main
tuning knob, so that should have been a clue right there that the
buyer (Radio-Mart) was not getting a mint specimen. A normal person
would have just shrugged off any small cosmetic imperfections and used
the damn thing, but he was buying it obviously with the intention of
trying to resell it. There has to be better ways of making money than
by buying things off of Ebay and reselling them I would think?

Here is the "damage" he is claiming:

http://tinypic.com/view.php?pic=4ze2s8i&s=1

Now he is claiming since I stood up to his crap that he is going to go
through his credit card company and get the money back from them for
the purchase instead of waiting for the PayPal dispute to finish.
This guy is lower than low. What a slimeball. I would suggest again
that everyone do everything they can to put this guy out of business.
I am going to get ahold of Ebay fraud and let them know what is going
on.

- IBOC. Try to pay attention Tilda Boy.

David - Please Re-Read Your Original Post
-and- Don't Read Anything In To It :

"KNX 1070 exhibits severe motorboating at night"

"Apparently the selective fading bug manifests during
very mild fades, unnoticeable before 9-14, but very
prominent and distracting since."

"I'm about 40 or so miles from the transmitter and the
night signal is definitely compromised."

Point of Fact - The Word "IBOC" does not appear in it at all.

* The Words 'motorboating' , 'selective fading' and 'mild fades'
are genearlly considered Analog Radio Terms.

* Digital "Drop-Out" would be an IBOC {Digital} Radio Term.

David - I never knew that your had an IBOC AM/MW Radio
to clearly make a judgement as to where it was the IBOC
Digital Signal that was the Problem with your AM/MW
'Analog' Radio reception.

David - I will give you the Point that you can hear Digital Hash
on your Analog AM/MW Radios that is Attributed to IBOC.
-but- To Attribute : 'motorboating' , 'selective fading' and
'mild fades' to IBOC is a stretch - imho.

David -Question- Do You Own an IBOC AM/MW Radio ?

FWIW - This "Tilda Boy" is Paying Attention.

david - now go enjoy your radios ~ RHF
.

I was listening to KNX on my car radio last night aound 9:30-10:00pm
local time. I heard nothing unusual and expereienced no problems.
This was about 400 miles away in San Jose, California.

How many times before have you bought something that you heard advertized on radio, or heard and saw advertized on tv? Things that you have bought before, mostly sitting on the shelves in the stores is the advertizing that I check outExubera commercial on tv right now.I wouldnt touch that S..t with a million mile long pole.Most commercials on radio and tv, I shut that crap off! I never buy any of that new fangled non sense stuff they advertize.You got people out there, every two or hree years, they rush out and buy the latest Dell or HP of eMachines or Gateway or Asus or whatever computer gadgets, they don't know a damn thing.

Does anyone have experience and an opinion (good and bad points) about any of these receivers:

AOR AR-3030
Bearcat DX-1000
Magnavox D-2999
Panasonic RF-3100
RF-4800/4900
RF-600
Realistic DX-300/302
Sony ICF-6700W/6800W
Yaesu Musen FRG-7

I'm looking for a backup radio that can handle a decent outdoor antenna, and take internal batteries.
If I missed any, please add it to the list with any comments on it you might have, thanks!

If you are looking for a battery powered oldie that will perform very
well as a tabletop, then consider the Sony 2010. It has keyboard
entry, excellent synch detector, selectable filters and yes it will
work well off an external antenna. To be honest it does a fine job on
the built-in whip.

Unless you are into radios that require extra knob twisting I would
avoid the FRG7.

Don't forget the Lowe HF-150. It not only takes batteries, but if you use rechargeables it will recharge them when you return it to AC power.

>From your description it would appear that you did not fully disclose
the condition. It would be in your best interest to just take the

radio back and give a credit. Otherwise you face the real possibility of his credit card company reversing the charge and hitting your account and allowing him to keep the radio. I'll tell you right now his credit card company has no interest in brokering a transfer of that radio. They will very likely give him a credit and debit your account.

There are a lot of specifics about this transaction that you have decided to omit, which makes me think your description is slanted to your side.

It would be in your best interest to ratchet back your rhetoric and unwind the deal amicably before you end up on the short end of the stick.

Like,
I would strongly suggest 2 things:
1. get a lawyer (you might need him/her)
2. file a fraud complaint with both the FBI and the police in his local area
(the info is findable from the contact in the whois database for his
website)

after you file the report, get a copy and send it to his credit card
company. the last thing they want is to be involved in a fraud complaint.

Agreed, the Lowe HF-150 is worth consideration...As are the Drake SW8 (particularly models from 1996 onward, featuring the synchronous selectable sideband) and the Eton E1 (a lap-sized portable, like the Sony ICF-2010 & Sony ICFSW77, but much more selective than the Sonys and much more capable of handling an outdoor antenna). Oh, and the Palstar R30CC is supposed to be a very nice performer, too, although I've not used one firsthand.

The Magnavox D2999 is, in my opinion, fairly overrated. Good audio, sure. But aside from that, you'd be better off going with a Sony '2010. If good audio is what you're after, you're better off finding a decent (preferably Drake-serviced) Grundig Satellite 800, which is a much more capable and better sounding receiver than the D2999.

Larry,

Please get access to a computer (not WebTV) with Internet access and
the Winamp player and access this URL:

http://www.live365.com/play/310148?LID=676-usa&lid=676-usa

This is a serious independent station from Bethlehem, PA, WGPA, which
concentrates on polka; after sundown, it streams polka without commercial
interruption until sunrise. You can read more at:

http://www.wgpasunny1100.com

That still doesn't explain why you'd want to further degrade your
analog sound quality used by probably 99 percent of your AM radio
listeners) in order to insert a digital sideband that is

1) temperamental to receive in a lot of cases

2) still doesn't solve the problem of lack of reception in high-rise
office blocks

3) practically unknown to most "normal listeners".

That's my biggest concern. The audio quality of LOCAL stations is
being degraded by their own IBOC signals. The digital may sound
fabulous...but if nobody is listening to the digital and is also being
driven away from the station by the awful sound on their analog
radio...then what does it matter?

KNX broadcasts an IBOC crap signal so unless you have a receiver that
has upper or lower side band selectable sync it should sound OK in AM
mode or sync that is not exclusive to one side band.

Putting a nice signal into Brooklyn tonight on 3320 khz, S7-S8 with less noise than usual. Just played Leo Sayer "When I Need You".

Conditions seemed pretty good in general tonight, except of course on MW, which is now a wasteland.

Indeed, a lot less QRN around 80m than has been the case for several
weeks here. Copying this signal about S3 in No. MN. at 16:10 UTC

You might not consider it damage, but the buyer does... and that's all that matters. In any case, you're going to lose this fight with Radio-Mart and Paypal. They will end up issuing Radio-Mart a refund and you'll be out both funds and radio. I'd start working direct with Radio-Mart immediately to minimize your losses.

What makes you so sure any other buyer wouldn't make similar claims about condition? Would they be "slimeballs" as you say? Simply ask for the radio back, issue a refund, block Radio-Mart from bidding on your auctions, and call it a lesson learned.

I think you are wrong my friend. First off, he filed a claim under
"item not as described" or something similar. I made no claims to the
cosmetic condition of the radio. In fact, like I said earlier it was
missing the main tuning knob so that might be a clue that it was not
in mint condition. Secondly, his claim was that it was damaged in
shipping, while offering no evidence or description of the damage. I
sold the radio as-is in working condition. No claims that it was in
any kind of condition beyond that it was working. Now I could be
wrong but I do not see how they could rule in his favor. He received
the radio just as I advertised it on the auction.

Selective fading causes the IBOC sidebands and the warbling pilot or
whatever it is to be audible. As the station fades a little bit the
noise comes up fast and the warbler starts. Selective fading is
especially brutal where the ground wave and the sky wave meet out of
phase with each other.

You're confusing fact with legalism, here. The facts are on your side. You listed the radio As-Is, and you made no claims. The reasonable buyer would bid accordingly and accept what he/she got.

But you're not dealing with a reasonable bidder, here. And the rules and procedures favor him. Quite simply, he can make accusations that you cannot disprove. That's all eBay and PayPal are interested in. The facts simply don't matter.

This guy is a master manipulator of the e-Bay/PayPal system. He's a professional victim. His life position is one of blamelessness. And he's vicious when criticized. He's ruthless when he thinks there's a dollar left on the table for the harvesting. And he doesn't play fair.

He routinely misrepresents his products, and wouldn't hesitate to launch a slander action against any bidder who made such a claim. Even if the claims made were absolute truth. Remember, when someone is manipulating the rules, the facts are not relevant.

You will not win an action against this guy. Those who sit in judgement, PayPal and e-Bay, have no interest in justice. Only resolution of a conflict with an eye to maximum profitability. Since RM's record is volume sales and large monthly PayPal and eBay fee payment, resolution will be in favor of RM. The eBay Power Seller division was created to protect such sellers. And both PayPal and eBay

make big noise out of 'Buyer Protection.' That's an unrecoverable double whammy, right there.

For you to fight this will cost you thousands of dollars in legal fees, and even then you are not likely to win. If you were, RM would have been booted off eBay years ago.

But that's not happened. That should tell you all you need to know.

Take the advice of the other posters. Resolve this before it gets to a stage that can do you harm. And don't do business with this goatfucker again.

All of which appears to be true. But, as you've seen the game is not
about the facts. but about manipulating the system.

> He sent me some email saying that I was just a "mere morsel" and that

\

You've seen, now, what he really thinks of those he does business
with. Don't expect him to be reasonable. And don't expect him to give
up, either. As a 'mere morsel' he has no reason to believe you cannot be
vanquished if things come down to you vs him.

I don't see why this is such a big problem. He claims shipping damage
(although being the scumbag he is, we know it's a scam).

Play along. Respond to the Paypal dispute, agreeing to refund his money
once the claim has been settled. He will put the radio back in the ORIGINAL
box and packing, and have UPS/Fedex/DSL pick it up. They will evaluate the
claim and either pay not. Once you have either the money or the radio,
give him his money back and consider it a lesson learned - most of us
already have both of his IDs blocked and you do the same.

Police open fire on radio station - report
September 18 2007 at 11:42AM

Mogadishu - Somali security forces surrounded the independent Shabelle radio station in Mogadishu on Tuesday after firing shots on the building, an AFP correspondent reported.

The incident came three days after police stormed the radio station, accusing one of its journalists of hurling a grenade at a police patrol and detaining 14 members of staff.

"We are trapped inside the building because the government forces have sealed off the streets around the station. They are opening heavy fire on the building," a Shabelle journalist told AFP, speaking on condition of anonymity.

"Everybody is lying on the floor. We cannot keep our heads up because of gunfire. They are asking us to open the gates and nobody is willing to do that. Most of the windows are shattered," he added.
'We cannot keep our heads up because of gunfire'
At least seven journalists have been killed in Somalia this year.

Media watchdogs have urged all sides to ensure better protection for journalists, several of whom have also been wounded or robbed.

Somalia is the second deadliest country in the world for journalists in 2007, after Iraq, according to the New York-based Committee to Protect Journalists.

The troubled Horn of Africa country has had no central authority since former dictator Mohamed Siad Barre was toppled in 1991 and has defied numerous attempts to restore stability. - Sapa-AFP

(Via "Paul" at HCDX)
==========

I was fortunate enough to get at least an email QSL from Radio Shabelle for reception back in November 2005 when they operated on 6960, but of late I think they've only been on FM.

I wish them well.

CTV,

Tell Radio-Mart that you will provide a Refund to Him :
After He Ships the Radio Back to you at His Expense.

Carefully Inspect the Radio when it comes back and
make sure that nothing is Missing or has been Removed.

Radio-Mart is 'noted' for buying a Fully Option Packed Radio
and removing the parts and selling them; and also selling
the basic radio by itself.

-IF- Radio-Mart does not send the Radio back NO ReFund [.]

keep us informed of this developing drama ~ RHF

It's a good receiver only IF you want to engage in a lot of knob
twisting for it's own sake. The FRG7 serves mostly as a benchmark
from which to measure how far radio technology progressed in 30 years.

The 2010 will deliver a lot of stations and it's 20 year old design is
stilll reasonably up to date.

I could never get used to the display and controls on the AOR
receivers. Cramped and things just didn't seem well organized.

>
> The DX-302 is the knob twister.

The 302 is Radio Shack's answer to the FGR7 with tuning that now seems
as painfully fiddly as that used on the frog.

Generic store advertising doesn't add 20% to the cost of a product.

Yes, that is what the high school civics textbook says. I think it is
clear that the American Justice System went seriously awry in
Simpson's murder trial. I can only hop that OJ receives the full dose
of justice this time around.

Be sure you have the user ID exactly as it should be, upper/lower case,
hyphens, etc.

I found that 'Gottahaveit1995' and 'Radio-Mart' aren't valid user ID but
'gottahaveit1995' and 'radio-mart' are.

You can go into MY EBAY, and set up preferences that block bidders by region, or ID. You can maintain a blocked bidders list and weed out undesirables ongoing.

I had a Canadian bidder on one of my auctions last year get quite huffy with me. The listing said specifically that the sale was for USA bidders only. He wrote to me and all but demanded that I consider shipping to Canada. I told him clearly 'No.' He bid anyway. I found the block bidder's preference, and that ended that noise.

eBay offers a considerable range of solutions to bidder problems, if you get out ahead of them. Once the problem has begun, however, resolution rarely goes against the member with the biggest volume.

I agree that he should be presumed to be innocent and be given a chance to show his side of the story at trial. As a former Angeleno, I remember the newspaper stories about Simpson beating up his wife and getting involved in other assault cases. And I remember the murder trial that I think went off the track for a variety of reasons and allowed him to get away with murder. So yes, I do want to be sure that OJ receives everything he has coming for this latest infraction.

4678. Eton E1 for sale

Newsgroup: rec.radio.shortwave
Date: 2007-09-20 14:07:48 UTC
From: bundlegrundle@yahoo.com
Message-ID: <1190297268.605932.289600@o80g2000hse.googlegroups.com>
Source record: 124398

I recently upgraded to a Palstar R30CC and no longer have any use for my E1. The E1 is in almost new condition. There are no big scratches or blemishes of any kind. I have used it a fair amount and it has accompanied me on a couple of DXpeditions, but aside from the inevitable, minor signs of wear around knobs/buttons there's nothing that stands out. I'll consider any reasonable offer. Please contact me via email (bundlegrundle@yahoo.com) if interested.

Your description does not make sense. The radio cannot be both almost
new and have been used a fair amount and exhibit wear around the
buttons and knobs.

> I'll consider any reasonable offer. Please contact me
> via email (bundlegrun...@yahoo.com) if interested.

Oh come on...give us a hint about the price. Better yet why don't you
be like most sellers and set a price.

Although I don't want that radio, I think it is resonable for someone to make him an offer for the radio.Kind of like buying an old car, How much do you want for that old car? [Oh, I don't know, how much do you offer?] cuhulin

4686. C. Crane Company on HD Radio

Newsgroup: rec.radio.shortwave
Date: 2007-09-20 15:41:56 UTC
From: Rfburns <jimwilhelm@labs.net>
Message-ID: <1190302916.465862.214580@19g2000hsx.googlegroups.com>
Source record: 124407

I ordered something from C.Crane today and in passing asked about HD radio sales. Interestingly enough, this person couldn't recall ever selling one even though they carry two different models.

It's obvious to me that HD radio is being force feed to the public and has nothing to do with letting the market decide. It's a sad day when government no longer represents us but controls us.

OK - that's reasonable considering HD radio is only just starting to
take off.

>
> It's obvious to me that HD radio is being force feed to the public > and has nothing to
do with letting the market decide.

How is the government force feeding HD radio to the public. The only
way I can think of for the public to make a market-based decision on
HD radio is to have them listen to real broadcasts on receivers
capable of catching HD channels.

Indeed the market will decide if HD is a success or not. IF a lot of
people listen to broadcasts over HD channels then advertisers will
flock to those radio stations and it will by definition be a market-
based success. IF on the other hand very few people buy HD radios and
tune into those stations then advertisers won't advertise and HD radio
will be a market-based failure. But the only way to find out is to
allow the marketplace of consumers to make a decision to listen or not
listen.

> It's a sad day when
> government no longer represents us but controls us.

My my, are you feeling controlled again? Maybe it's those voices you
hear late at night. Yes, those eerie voices that command you to buy
all manner of consumer goods like HD radios. The voices that seem to
come from under your bed, but when you get up the courage to look
there you find nothing.

It's really important that you realize how precarious your position is
since he filed a claim directly with the credit card company. It
would be in your best interest to just take the radio back and give a
credit. Otherwise you face the real possibility of his credit card
company reversing the charge and hitting your account and allowing him
to keep the radio. I'll tell you right now his credit card company
has no interest in brokering a transfer of that radio.

Reading about the high bidder on a Drake, who was outbid by
GottaHaveit1995 at the last minute, it appears that he keeps his
bidders' ID's private to keep anyone from noticing that he's the high
bidder on his own auctions, to drive the second high bidder to his
maximum bid.

The guy is bad news. And the more that comes out about him, it's a
wonder he's still in business, and not in jail.

Except, of course, that the only entity that can be more corrupt than
radio-mart is eBay/PayPal itself.

Thomas,

Price {Budget} -and- Performance {Expections} :

* Price {Budget} - Within these Price ranges these
Shortwave Radio/Receivers offer good performance
and reliablility for Shortwave Radio Listening (SWL).

* Performance {Expections} - Can go from a 'basic'
Shortwave Radio/Receiver to one with a lot of Bells and
Whistles {Extra Features} that you may or may not want.

About $300 a 'used' Grundig Satellit 800 Millennium Radio
http://www.universal-radio.com/catalog/portable/0800.html

About $500 a 'used' Kenwood R-5000 Receiver
http://www.universal-radio.com/catalog/commrxvr/r5000.html

About $700 a 'new' Icom IC-R75 Receiver
http://www.universal-radio.com/catalog/commrxvr/0175.html

Around $800~ $1400 a 'used' RL Drake R8B Receiver
http://www.universal-radio.com/catalog/commrxvr/0082.html

About $1500 a 'new' AOR AR-7030+ Receiver
http://www.universal-radio.com/catalog/commrxvr/3396.html

About $2000 a 'new' JRC NRD-545 DSP Receiver
http://www.universal-radio.com/catalog/commrxvr/1545.html

Remember - The Shortwave Radio/Receiver is only one
part of the Shortwave Radio Reception Equation : The
other major part is the Shortwave Listening Antenna.

I think it can be done. I can imagine a few technical reasons why most of these radios are mediocre performers, but I'm thinking the biggest reason is that these radios designs are based on some marketing illusions, rather than on performance.

It might start becoming obvious, even to ibiquity, that digital doesn't sell itself.

> Technically, ther eis no way HD
> will ever work...period. $5 HD radios - with the expensive HD chipset
> and licensing fees to iBiquity, it will never happen.

Ibiquity sets the price of their chipsets. If radio sales remain dead in the water, they might decide they need a new game plan. Selling the chips cheap might encourage most of the rest of the broadcasters to buy and license broadcast equipment from ibiquity.

And I fully expect the pay radio variation of IBOC to show up one of these days.

My point is that ibiquity and the broadcasters have still have options to play out before they give up.

I just don't think the conclusion of this mess is yet determined.

I think you're dead right here. Looks to me like IBOC was practically
designed as a first step toward pay radio.

Golly gee, that was nice of you to say that. Now that I have your undivided attention I'll try again:

How is the government force feeding HD radio to the public.

How is allowing listeners to vote on the viability of HD radio by choosing to tune in or tune out not a market based decision.

Unless price is no object and you are willing to put up with the
hassle of a lab-grade receiver you probably don't want "The Best Table
Top Radio". If what you want is a radio that will allow you to catch
a lot of broadcast, amateur and utility stations. In today's world a
high performing receiver does not have to be a tabletop, i.e. plug
into the wall and can't be moved radio. Consider the Eton E1 receiver
as one that has lots of features for manipulating signals. It works
equally well as a tabletop or portable.

WillisMat,

Why buy an older and aged 'used' Radio ?

When you could buy a 'new' / newer Radio and have newer
Technology and Features plus a Manufactures Warranty.

Here are five (5) 'portable' AM/FM Shortwave Radios that
will work well as Table-Top Radio/Receivers and can be
used with Batteries or an AC Adapter {Wall-Wart}

Plus all of these Radios can be used very well with a
moderate size (not to long) Shortwave Listening (SWL)
Antenna of about 35~50 Feet -aka- Low Noise* SWL
Antenna : Random Wire Antenna + Matching Transformer
+ Coax Cable feed-in-line.
* Read About - The "Low Noise" Shortwave Listening Antenna
design concepts that were popularized by John Doty
http://groups.google.com/group/rec.radio.shortwave/msg/a438b087b5e89fee
http://groups.google.com/group/rec.radio.shortwave/msg/e24cd5e4a449fb60

Price {Budget} -and- Performance {Expections} :

* Price {Budget} - Within these Price ranges these
Shortwave Radio/Receivers offer good performance
and reliablility for Shortwave Radio Listening (SWL).

* Performance {Expections} - Can go from a 'basic'
Shortwave Radio/Receiver to one with a lot of Bells and
Whistles {Extra Features} that you may or may not want.

1 - Eton E1 Radio {New} ~$500
http://www.universal-radio.com/catalog/portable/0101.html

2 - Grundig Satellit 800 Millennium Radio {Used} ~ $300
http://www.dxing.com/rx/sat800.htm
http://www.universal-radio.com/catalog/portable/0800.html

3 - Sony ICF-2010 Radio {Used} ~$300

Thanks for the info, but no surprise - you do realize however, that
every HD Radio sold is supplying iBiquity with more time to destroy
the AM band.

True - but with HD radios not selling, where is iBiquity's money going
to come from to continue daily operations,and to pay back those mad-
dog capital investors who have been waiting years for a payback.

Did a google image search on the R&S EK895, and it finally answered my question as to who Bharat Electronics worked with for their HS-495 and HS-496. So it's licensed production of R&S receivers, I see. Interesting. I didn't realize that Bharat had worked with R&S... I had previously guessed that the BEL HS-495/496 were perhaps derivatives of some Thales receiver design... Anyway, thanks for pointing out this $20,000 military-grade receiver! R&S gets around, I guess. In military circles, they've done fairly well with their M3TR tactical radios.

Dear Thomas,

I own an AOR AR7030 Plus receiver which I purchased in March 2004. It was customized for me by the factory. I use this radio many hours every day. Along with a good antenna (very important, it should go without saying!) this radio performs as well or better than any communications receiver I have ever experienced in my almost-fifty-years experience with such units and it is very reliable. I have experienced no problems whatsoever with it. In addition, its sound quality is the best I've ever heard from a shortwave receiver, bar none.

I do not know your price range (R.H.F.'s reply is excellent in that regard) but, if you are able to spend the money this receiver commands, or even well-above it, you will not do any better, in my opinion, than with an AOR 7030 Plus.

Best,

Joe

"It's obvious to me that HD radio is being force feed to the public and has nothing to do with letting the market decide. It's a sad day when government no longer represents us but controls us."

Who bought the first radio to listen to the first station, tv ditto? Government was only involved in setting the hd technical specs to be used. This was the same for tv, radio had no such choices as analog was the only game going at first other then cw.

It depends on what you want to listen to. There's less political
propaganda and more religion. If you like utilities, there's tons of
stuff.

A good program for Edweeniette, IBOC's not selling too well.

How much do you want to spend? Do you want to buy a new receiver or are you also considering used ones? If you're willing to spend over $1K and want to buy new, I'd recommend the AOR 7030+. If you want a new receiver for between $500 and $900, I'd recommend the Palstar R30CC. If you want something new for less than $500, that's trickier. Would you consider a PC-controlled receiver? If so, then there's the Ten Tec RX320D--a great value for the money, but it does chain you to your computer.

If you're considering used receivers, I'd recommend something from the Drake R8 line. Then there are the Lowe receivers (HF-150 and HF-225) which still occasionally pop up on ebay.

Anyway, there are a few suggestions. Please let us know how you make out.

Steve

<snip>

I'm surprised that nobody has included the venerable Collins general coverage receivers such as the 51J-4, R-388 and R-390 (and their variants). Reliability is implicit in these rigs and there is no lack of community support for ongoing maintenance. When I need a reference receiver for experiments or calibrations, I fire up the 51J-4.

Michael

Several fabs will be selling chipsets in Q1, starting with Samsung, at low
prices and in power saving designs capable of making competitive protables
possible... iBiquity is in the development, not the chip business. The
license fees are not as high as people think for the third party fabs.

Steve,

I thought I had CKZN from St John's, NL Canada
http://members.aol.com/baconti/xckzn.htm
last night 20 SEPT 2007 @ 09:03 UTC
http://en.wikipedia.org/wiki/St._John%27s%2C_Newfoundland_and_Labrador
here in Twain Harte, CA USA.
http://en.wikipedia.org/wiki/Twain_Harte%2C_CA

S-Meter : S8~S9 with Good Audio

CBC Radio One ID at 09:05 UTC followed by
http://en.wikipedia.org/wiki/CBC_Radio_One
CBC Radio Overnight ID and Radio Sweden ID
http://www.cbc.ca/overnight/index.html
Channel Africa ID @ 10:21 UTC
Africa Rise and Shine ID @ 10:22 UTC

-But- a Check of the CBC Radio Overnight's
Broadcast Schedule shows both :
http://www.cbc.ca/overnight/schedule.html
CKZN from St John's, NL on 6160 kHz {24/7} and
CKZU from Vancouver, BC on 6160 kHz {24/7}

However - What I was hearing was the individual
Radio Show {Re-Broadcast} Times for Pacific
Daylight Time (PDT) and that it was CKZU from
Vancouver, BC Canada instead.
http://www.cbc.ca/programguide/program/index.jsp?program=CBC+Radio+Overnight

Considering that CKZU is located in Richmond, BC
http://en.wikipedia.org/wiki/Richmond%2C_BC
123.12W 49.08N and is Rated at 1 KW plus it uses
a Directional Antenna designed to Beam it's Signal
Up North into Canada and not down south into the
USA; about 1000 Miles.

Yes, I saw that. I am surprised that they do not rename the group to radio-mart-sucks, or something similar. My god, the majority of the messages are about him. Well, I gave in to his extortion and gave him $30 to drop the dispute. I did not want to but figured it would not be hanging over my head anymore. And extortion is exactly what it was. I am just waiting until he lists the radio to see what kind of description he gives it.

Please tell all of your fellow SWL's and Ham friends to be aware of this thief. How he can still be in business via Ebay makes me sick to my stomach and really tells me a lot about the business practices of Ebay. They are just as guilty as he is in my opinion.

>
> 5 - Redsun RP2100 Radio {New} ~$100

Thanks to all who have given me input, you have helped me quite a bit!

I had forgotten about the HF-150, despite the fact that I have an RDI
White Paper on it from several years ago that I've read a dozen times
(DUH!!!)
But as has been said here, bidding gets quite high. I need a backup
radio and can't justify the cost. That also goes for the AR3030 (I
shouldn't have even considered it, really).
Never considered the 2010, as I didn't know that it could take an
antenna better than its whip. Performance sure gets high
regard...plus it has synch.
The E1 is a good idea, that would also be a way to go, but then its
back to price for a backup.
I was thinking that I could get one of the Panasonics for a good
price, same for the DX1000, yet I know performance won't be as good as
some others.
Also, I didn't know that the Drake SW8 could take batteries. Can the
SW2?

Sounds like a Sony or a Frog (if it has the battery holder) if I find
one at a good price makes the most sense for my needs. One of the
Drakes would be great but probably would be costly.
I had a 7600GR before and didn't like the ergonomics of it, though it
was a good performer with the tennis racket. The 2010 looks much
better in this regard.

Uhh, last I checked the greater percentage of the 'free world' and
developed nations have interests aligned with the US. You see David,
nations do not have 'friends' they have interests and interests change
over time. At one point Iran was indeed a respected member of the
world community and they may well attain that status in the future.
At this point they are pretty much only aligned with Cub, Venezuala,
Syria, North Korea and though not fully aligned with, at least no
censored by Russia. Hell, even the French are starting to speak of
them in the same manner as the US. Though many of the US's allies
are disappointed with our current administration they do share very
similar interests and shall not deviate too far in sharing those
interests, oil, precious metals, low cost workforce, workforce free of
safety and environmental regulations. You know, places where you can

get folks who will do what no others will and a cost that nobody can touch.

Now, back to my original question.....where can I get some of what you are smoking?

Are they the same person?

They never post at the same time.
Have never been seen together.
Are in the same time zone.
Both post large volumes of off topic material.

Hmmmm, could it be they are one person posting with two different names with the purpose of providing what he/they consider to be entertainment?

To my knowledge, the SW2 did not accept batteries. The SW8 can run on 6 D batteries...for about 8 to 10 hours or so...a rather clumsy but functional compartment accessible through the set's bottom panel. If the HF-150 is a bit out of the range you're wanting to pay, however, it is likely that the SW8 will be, as well, particularly if it's a unit from 1996 or later.

As for the '2010, it can handle about 20' of wire or so. Hook it up to a 100' wire antenna, though, and you'll be experiencing some overload most likely (I guess you could fit in one of those little MFJ preselectors, though).

Regarding the price of the E1, it can be found at discount prices at times. Joining the Yahoo E1 group is a good way to check up on the latest price deals... evidently, Ham Radio Outlet had some sale on these recently, with new E1s going for $350, I believe (or so it was

posted in a few messages). I don't know if this was nationwide or just at the Oakland location where evidently someone had found this deal. One thing about the E1, though, is that, if you're wanting to ensure that there's a valid warranty, make sure you're buying from an authorized Eton retailer. Some folks who've steeply discounted E1s on eBay have found themselves in the lurch with regard to warranty issues. I'd be hesitant to go for a used E1, however, without first ensuring that the unit doesn't fall within the recall numbers for some battery issues and secondly ensuring (through the Yahoo group) that it's not within the serial number range that has seen display failures (presumably resolved in the newer units on the shelves).

As RHF has noted, collector demand has inflated the prices of many of the receivers on the list provided in your first email. Certainly a lot of the Panasonics are fetching a price that is beyond any performance-based justification. That would also hold true for the D2999, which benefits from both collector demand and some undeserved lore with regard to its performance.

Regards,

Junius

Excellent receivers, the R7 and R7A, particularly when equipped with a full complement of bandwidth filters. Very well built, too. They very often command a hefty amount, however, when one surfaces for sale (which certainly isn't often enough to satisfy the demand).

- The SW8 can run on 6 D batteries...for about 8 to 10 hours
- or so...a rather clumsy but functional compartment accessible
- through the set's bottom panel.

The Drake SW8 Receiver is a beauty to change the
Batteries in. * Physical: 11.5x5.25x13" 10 Lbs.

However the Panasonic RF-4900 Receiver is a Beast
to change the Batteries in. * Physical: 19x7.8x14" 20 Lbs.

You added improper punctuation to what I posted.............that could
be the evidence proving youi are not David.

Must consider this further.....................bythe way, if you are
worthy of ignoring as you mention in a later post why do you post at
all. Is it for the same reason I am doing this - entertainment?

At least you don't hate America but damn I wish you'd leave Allah out
of your posts.

DX Savant,

When I make this Personal Prayer {Statement of Faith - Belief} :

"God {Allah} Bless America - Amen ~ RHF"

I Am Claiming GOD {Even Their God "Allah"} is On America's Side.

I Yield No Ground {Even Heaven} :
To Those Who Would Call Me An Infidel -and- By Doing So :
Feel That They Have The Right and The Duty To Kill Me :

In The Name of Their God "Allah" [.]

the raving of a sane man in an insane world ~ RHF

Don't count out the HF-150. While I suspect the one currently on ebay
will go for an excessive amount of money, they often go for around
$400. IMO this makes it a fine value, especially considering that
you'd pay close to $400 for many new or used portables.

My hope is that they begin to shake every time they think of us, and what we might do to them should they screw up. As far as the loathing goes, many just can't escape whatever century they may be currently locked into and are merely jealous of our success. (Much like the many Liberals in this country who can't seem to get their shit together into one sack and are envious of the 'rich').

You may now return to whatever your drug of choice is today.

A look in the dictionary will show that they are NOT pronounced
exactly alike, but very close to it.

Collins 51J-4 Communications Receiver

For those who like to read about Collins Gear and Old Tube Radios.

* This reads like a Museum Description instead of the usual eBay Ad.

* Plus a few nice Photos too.

Wasn't the current President of Iran involved somehow in the Embassy situation
or was that disproved?

Doesn't IBOC use digital technology developed by Texas Instruments? How
come, three or four years later, TI hasn't already started making the low
power chipsets?

>iBiquity is in the development, not the chip business.

I know ibiquity only developed the chips, but calling them ibiquity chips is
a reasonable sort of shorthand. It's like all those Celene Dion CDs at the
record store. I can't really blame the manufacturer.

> The
> license fees are not as high as people think for the third party fabs.
> >
>
>

I think ibiquity's fees have accounted for the bulk of the price difference
between a standard radio and a HD radio.

And wouldn't Texas Instruments get an even lower licensing fee than Samsung
since some of the technology is already owned by TI and TI is one of the
buddies in the HD radio alliance?

<snip>

That listing may be counterproductive to the seller; the fonts and type sizes chosen for the description are way too large for easy reading and scrolling in my browsers takes too many resources (backing-store thrashing, etc.) due to the exceedingly long length. Stock photos do little to depict the actual unit at auction and the tiny low-res photos at the bottom are nearly useless for examining the condition. Why didn't the seller create links to supplementary material and post decent resolution images?

I own a 51J-4 and do consider it a fine instrument however.

Regards,

Michael

Source record: 124341

Hi-- can someone explain why I can hear transmissions by the BBC and
Deutsche Welle which are directed towards Africa here in Los Angeles?
If it weren't for these transmissions there would be very little worth
listening to on SW !

I'd like to have one of these. I never thought I'd develop an
interested in tube receivers, but as time goes by those tubes start to
beckon. One day I'm going get one...maybe a Collins, maybe a
Hammarlund.

It's a fine receiver, but the seller is doing himself a disservice by flooding the listing with all that that copy-pasted text. Most prospective buyers of a specialty radio like that know the technical details or know where to read it. Several really good closeups of the receiver being sold and a written description of how the radio actually performs, what mods were made, etc., would help prospective buyers a lot.

Read up on signal skip and propogation. Knowing when and where to
listen will help you find more signals that are potentially
interesting. Indeed I remember stumbling onto my first exciting (at
the time) catch. Radio South Africa was broadcasting of all things a
program for SWL's and I was hooked! Consider getting a program guide
from MT or at least do some reading to figure out when the bands are
active.

If you think there is nothing worth listening to, please read the
article by John Bryant in the latest MT.

Although the transmissions may be "directed" , beam patterns on HF are
quite wide and some radiation will occur at many angles including the
back180 degree direction. IF PROPAGATION is favorable, directed broadcasts
can be heard in many other locales other than the "directed" one.

Short Answer -- favorable propagation

Lamont

That will happen sometime after the winter of the blue snow. One of
the new Redsun receivers or an Eton E1 will likely outperform the
venerable 2200.

You do not understand the semiconductor business.

You are making illusions to "low power" designs that are false.

You are quite the humorous one.....kinda like the newsgroup clown,
though I've decided you're not funny anymore and will return later to
taunt your sorry ass.

You are not as much fun as David.......he takes everything so
seriously. Even he is not too much fun anymore - way too predictable.

Oh so boring on the newsgroup.............not even any really good
shortwave stuff - or even XM for David. Such a shame - usenet was
once a fun place.

Perhaps, but I have surmised that RHF is probably just a way too happy
guy who needs to fill his time - no major harm in that; whereas David
is a seriously upset and grumpy man who feels shortchanged because not
everyone discovered the age of aquarius when they saw "HAIR" back in
the 60's.

Wrong - Mexico loves us; if they didn't their people wouldn't keep
doing everything possible to come here. Get a grip on things will ya.

It was a shame when CKZN went to a 24 hr format. When I lived in
Montreal, CKZN (Newfoundland) was the dominant station but went off the
air for a bit during the local nights. I managed to get readable
reception of CKZU during one (very late) summer evening.

Now that I live in Edmonton, I can pretty much forget about hearing CKZN
as CKZU easily dominates the frequency.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

More information about kill files may be obtained from Dave Fawthrop's | Killfile FAQ at: |

http://www.hyphenologist.co.uk/killfile/ |

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

FWIW - David has a Hearing Problem {Mental Processing}.

While a Generation was talking about "The Age of Aquarius" .

David Thought He Heard Them Say "The Age of A-Hair-Up-Your-Ass"

And So - Since the 1960s David has been going
around acting as -if- he had A-Hair-Up-His-Ass !

Sounds interesting, except for the DRM part.

It's a Super 12 converter -- plugs between the car radio and car antenna and tunes the 10, 11, 15, 20, 40 and 75 meter amateur radio bands as well as some shortwave broadcast frequencies. I've played with one many years ago. Doesn't have provision for a BFO, though, so no CW or SSB, unfortunately.

I had a Multi-Elmac PMR-6 receiver (broadcast plus 160 through 10 meters with BFO and noise limiter) installed in my 1947 Jeep station wagon ca. 1966 or so (no transmitter, though).

I see messages using the Google interface that say the poster has
requested they not be archived and will disappear in so many hours.
Maybe you have encountered threads that were filled with evaporating
messages.

Interesting site. My ISP (Sympatico) dropped direct free Usenet support and dumped me onto some other Usenet provider that requires a paid subscription for posting (reading is free). So that drove me and a bunch of other Sympatico users to Google Groups in order to post. If I posted more often, I would probably do most of my reading using GG but normally continue with the Outlook Express newsreader and the free Usenet server. The position of improve-usenet seems to be akin to banning all Corvettes from the road because there are some bad drivers.

Radio World ran some "battery life" comparisons of a first generation HD
chip to the design spec consumption of the Samsung chip.... 10 times more
"on time" than the early chip, and acceptable comparisons to consumption for
analog signal reception. To the consumer, it's about how long the batteries
will last, not formulae.

The HD Alliance is a group of large radio broadcasters who banded together
to create a unified on-air ad campaign and marketing materials. Neither
iBiquity nor TI have anything to do with it.

Google is having serious problems keeping messages in the index or tree linked with the text. Messages get posted and appear in the thread but the text isn't connected. When it happens in a single message thread that is the system message you see. Over the past 4 weeks it has been an intermittent problem, but seems to be getting worse. The Google techs on their help forum say help is on the way, but so far I don't see any improvement. When they do fix it I doubt they will make a retroactive repair.

The first one should have a soft "a" sound while the second one
should
start with a soft "o" sound. Slurred slightly "Otto ought to
consider
getting his auto at the automobile repair shop" could end up sounding
like "Otto otto consider getting his otto at the ottomobile repair
shop"

Oops. Looks like I miscatagorized TI into the HD radio alliance. That's what I get for writing off the cuff. I could have call them one of ibiquity's "strategic partners". But that dosen't really make any difference to the question -- Why Samsung and not TI?

Well, a bit of research reveals that Texas Instruments isn't just a strategic partner. They are investors in ibiquity. That's right, TI owns a share of the company which is presumeably sending business off to a competitor.

http://www.ibiquity.com/about_us/investor_information

So, why isn't TI making the lower power chips right now? Why didn't they start making them a couple of years ago?

Could Texas Instruments have lost faith in the future of HD radio?

Samsung is a consumer products manufacturer first and foremost... and
substantially vertically integrated. Samsung's first goal is to create chips
for its own products, then sell them. iBiquity wants as many different
companies manufacturing receivers as possible. Anyone can license the
technology and make chips.

A couple of days ago, skinny twin sister was pecking on my front door.I said, Wait a minute, let me put my dog up.(I had to put my clothes on too) She said, You are fixin to get your yard mowed!, I have already taken care of it.(she pays a little boy to mow her yard with her new lawn mower) I told her, You might as well unass that idea, I will mow my own yard when I feel like it.

Some of those weeds and cat tails in my front yard are about four feet high.I like a Country looking yard.No body is going to mow my yard but me.I will get to it when I get to it, maybe next week, maybe next month,,,, whenever.

I don't know what you mean by "on time" in relation to power
consumption. If you meant that the new chip set consumes 1/10 the power
that I could understand, but regardless the comparison should be the new
chip set to a comparable analog radio and cost by the way.

The consumer does not by a chipset, they buy a radio. "On time" is very
important in a portable... the longer the "on time" the greater the battery
life.

Consumers don't do the kind of comparisons you suggest. The reference point
today is to how long an iPod lasts between charges... or how long a cell
phone stays charged or its talk time. Consumers do not compare with old
technology. They compare new technology with other manifestations of new
technology.

Alright then the amount of time the radio plays. That comment didn't
quite fit in with semiconductor chip sets.

So can you point me to a HD portable that runs off batteries? Far as I
can see there are none.

Your reading comprehension really bites, doesn't it? I have said multiple
times that there will be a minimum of two and as many as 4 low power
consumption HD chips shipping in Q1 of 2008; these will enable portables and
boom boxes of all sizes and we should see the first in Q2 or Q3 of 2008.

d'Eduardo -but- At What Price Range ?

We are talking an AM/FM Radio that happens to be "HD"
and the 'Average-Joe' Radio Listener is not going to pay
Big Bucks for what he considers an AM/FM Radio.

Here are three AM/FM Radios that I bought in the last year.

Sony ICFS10MK2 Pocket AM/FM Radio ~$11
http://www.jr.com/JRProductPage.process?Product=4030071

Panasonic RF-2400 AM / FM Radio ~$17
http://www.amazon.com/gp/product/B00007KDX6/

Sangean DT-200VX 'Pocket" Radio ~$65
http://www.universal-radio.com/catalog/spcialty/4117.html

ALL UNDER $100 and TWO UNDER $25

"HD" Radios Won't Sell -If- They Cost Too Much !

I Ask Myself : What IBOC ?
All I See Is The Blinking Blue Light ! ~ RHF
In the Distant Land Where IBOC Fears To Go :
Life Exists and Radio Listeners Live Beyond the 10mv/m Contour.

I have had several battery operated Tabletop radios.
DX 300 DX302
Pansonic RF 2800
And a FRG 7.

The FRG-7 was also sold by SEARS under their label. Same guts and performance as the second version of the Yeasu FRG-7 with the fine tuning knob.

I kept my RF2800 in my kitchen in daily operation for almost 30 years, and it would still be in use today if a lightning induced power line surge hadn't zapped it.

These really are electric mains operated radios with internal power transformers, and battery backup.
When I take them out of the house and operate them on battery power, I notice that there is MUCH LESS noise in the audio.

They tend to overload when connected to an outdoor antenna except for my FRG-7.

If you are just going for general Broadcast and casual SW broadcast listening, I would like the Panasonic 4800 mainly for the audio quality of the built in speakers.

For more serious DXing I would go with the FRG-7.

Nothing wrong with my reading comprehension since I did not read those
posts bozo. The posts I read spoke of portables back in 2006. It's not
going to happen in 2008 either due to current demand required to support
the processing needed for HD.

Somehow I wound up with duplicates. All are in excellent condition.
The years:
2002
1999
1998
1997 (2 copies)

$4 each plus $3 shipping
$7 for two plus $3 shipping
$10 for three plus $4 shipping (they're heavy!)
$12 for all four plus $4 shipping

Interesting, because I believe AIR only recently recently changed the
Vividh Bharati tx feed from Bangalore to Delhi (though same frequency
10330).

Those things should be really good on batteries... as there is no 'current
demand' for them. :) :)

Nobody with any actual knowledge thought there would be portables in 2006.
In a luncheon address to the Program Directors and Managers I work with, in
2005, the CEO of iBiquity stated that there was no chip capable of portable
usage and that there were no portables in the immediate future. This was the
story everyone in the industry heard, so nobody in radio was talking about
portables in '06 as there were none, none were planned and the HD system was
not even approved..

First, the FCC had not approved HD. No company was going to take the risk of
spending on a chip design which would be useless if the FCC did not approve;
many were worried the FCC might change the standard, requiring chip
revisions. Now, they can safely proceed.

The moist significant development is the entry of Samsung, the largest
consumer electronics company in the world. This pretty much guarantees lower
prices and broad availability of chips and, consequently, radios.

Mister Nobody, { You're Really A Somebody :o}

* I Don't Post that Hard-to-Hear DX:
I Post What Is Easy To Find and Listen To on the Shortwave Radio.

* I Don't Post for DXers :
I Post for the Newbies; the Casual Shortwave Radio Listener (SWL);
The Everyday Broadcast Program Listener .

* I Don't Simply Post Station+Frequency+Time :
I Post Information that a Newbie 'might-not-know'
and Find-of-Interest.

* The Rec.Radio.Shortwave Newsgroup is for Everyone
with an Interest in Shortwave Radio Listening :
This includes the Beginning Shortwave Radio Listener
(SWL) -aka- 'Newbies'

and yes - i post for me - i got to be me ~ RHF
.

d'Eduardo,

IMHO - "HD" AM & FM Radio will Live or Die : If-and-When
there are "HD" AM & FM Radios in Every Car and Truck :

When will there be OEM "HD" Radios for Automobiles ?

When is it estimated that an "HD Radio will be Standard
Equipment in ALL Cars and Trucks ?

I Ask Myself : What IBOC ?
All I See Is The Blinking Blue Light ! ~ RHF
In the Distant Land Where IBOC Fears To Go :
Life Exists and Radio Listeners Live Beyond the 10mv/m Contour.
.

I don't believe mainland China has been heard in that region since the early 50's, and that on a totally clear channel.

The possibilities for 650 would be some local station running programming for a Chinese community in North America. There is a station near Richmond, VA, with major power, but daytime. A low power station in MA, and then a 250 watter in Houston are the North American stations... so nothing licensed to 650 seems likely. Any chance you have some receiver issues?

Issues? You mean like you have? Like being a pathological liar, and a faux
Hispanic to boot?

Quite the combination.

Your data or your supply of the Amazing HGH?

4944. LYQ Non Directional Beacon (NDB)

Newsgroup: rec.radio.shortwave
Date: 2007-09-23 02:46:54 UTC
From: WA4SZE@gmail.com
Message-ID: <1190515614.237008.67780@w3g2000hsg.googlegroups.com>
Source record: 124627

LYQ NDB is on the air!!!

Try to hear it and post reception report here: Post signal strength and your location!

You will hear the Morse code ID LYQ over and over again,

The beacon is located at our private airport 43TN Co-located located with the WWRB shortwave transmitter facility.

WWRB is about 50 miles south southeast of Nashville,TN just off I-24 by Manchester,TN

The Freq is 529 KHZ so you should be able to hear it with your car radio tuned to 530 AM

give it a try and post!!!

Lets have some fun!

We will QSL the Beacon with reception reports sent to WWRB Check out our web page at www.wwrb.org see our photo gallery

RHF!! Can you hear the Beacon???

What kind of Sherwood?

Only station listed in the NRC Log on 650 with any kind of ethnic programming is a 250-watt outlet near Boston - which should have reduced to 9 watts at sunset. (even if they stayed on 250-watt day power I doubt they'd override WSM in Central Kentucky...) I have heard foreign stations on 650 here under WSM (I'm only about 50 miles from the WSM transmitter) but it's always been Colombia, which of course broadcasts in Spanish, not Chinese.

I strongly suspect you're hearing a shortwave station. (probably US-based or Radio Canada International/some other station using RCI's transmitters) Harmonics of your radio's local oscillator mixing with a strong SW signal. If that's the case, the broadcast will probably only last a half-hour or an hour, and you may well hear an ID in English when the Chinese program ends.

If you have selectable sideband or at least SSB, you can check one thing.

If from China (either mainland or Taiwan), the station would actually be on 648 KHz, rather than 650. If it is right on 650, then it's in the Americas for sure.

Here's a list of stations on 648 in China... none look like they would make it there..

648 kHz CHINA Changchun,
Jilin Province Changchun PBS, Children's & Elderly Life Station
Sep 2007
648 kHz CHINA Chaoyang,
Liaoning Province Chaoyang PBS (Economic Broadcasting Station)
Listed

BoBo,

Next time that this occurs :

1 - Select your Narrorest AM/SSB IF Filter on your Radios :

2 - Tune down from 650 kHz to 648 kHz

=IF= the Signal improves and the Listening is easier
then 'most likely' you have a "Non" North American
Chinese Language Medium Wave Radio Broadcaster.

+ Plus -if- you have USB & LSB - Try LSB on 648 kHz
to get rid of much of WSM on 650 kHz.

=IF= the Signal weakens and the Listening is more
difficult then 'most likely' you have a North American
Chinese Language AM/MW Radio Broadcaster.

hope this helps ~ RHF

Get a free TV with no credit card. Follow this link and sign up where
it says Start Here. Then sign up for an offer I recommend ebay (or
FastWeb if it works on your computer) because you don't need to give
them your credit card # or pay anything. If you choose ebay create a
new account and bid 99 cents on something very expensive like an
iphone or ps3 so you are guaranteed to lose.

If he says Okachobee at the top of the hour, it's SW.

I hear WEEF Chicago in Central Ohio on 1430 in Mandarin some mornings,
coming in over the local WCLT, as things fade in and out around
sunrise. So there's Chinese programming out there.

THIS IS NOT THE FIRST TIME HE FAKED DAMAGE IN SHIPPING, I HAVE BEEN TOLD
THIS STORY BY OTHER PEOPLE.

NOW YOU KNOW WHY I BLOCK HIM FROM MY AUCTIONS !

by the way, paypal does NOT guarantee against damage, only that you do or
don't receive it

he does NOT have a case against you. he is bluffing.

Luke:

Radio-Mart is a liar and a cheat, plain and simple. a few months ago,
He purchased a old KWM-2 from a older fellow down the street from me. I had
seen this radio from time to time sitting out in his garage uncovered for
YEARS, It was filthy dirty!

After Martyn bought it, a week later he was selling it on Ebay as a
"pristine" radio that had been pampered and "covered up" all it's life!
....Go figure!

I would NEVER buy anything from this guy, Do a Google search on radio-mart
and you can read the horror stories for HOURS!

You made 2 BIG mistakes, #1, You dealt with
gottahaveitsoicanresellitonebay1995, and #2, you used Paypal!

Isn't that the truth about that with the commercials. I hardly ever buy anything I hear advertised on the radio. Frankly, I think most of it is a bunch of garbage. I generally buy what I need and things I want here and there. As far as the computer thing, I would suspect it is almost like radios having to have the best and newest. After a while, you finally run out of either money or things to buy having too much stuff.

You can be assured that this poster isn't going into any sort of HD radio purchase until the cost of the receivers gets way below what they are at this point. 200 dollars for a radio that only receives broadcast band crap? Some cases more than 200 dollars. But really, after a while how much do you want to spend Frankly when I can go out and buy a AM/FM radio for little shock to my wallet versus 200-400 USD for a HD set, why in the hell would I want to do that. For that cost, you could pick up a decent shortwave portable or even possibly a relatively inexpensive DRM radio for SW. Not that I think that DRM is going to be a boon either but seriously what is there really on most commercial radio except hours of Rush Limbaugh and other assorted talk show hosts. Other than listening to WBBM or some powerhouse station like that for the news, there is little available on local radio. FM has basically been turned into a vast wasteland of morning talk shows, commercials, and other nonsense. Play the same song half the day from the latest artist and here you can listen to two different stations on FM playing the same format and same exact song at the same time. So much for broadcasting diversity.

Considering that I can get hundreds of channels via my internet connection, I think it is already doing some amazing things. If you look at everything on the net especially all the Yahoo Music, AOL Music, etc, it is already superior to local stations. Other than a five minute news bulletin on the hour, there really isn't much to offer locally. NPR and some of the other news stations might be the exception. But as far as music and other progams, you can find all that and more through podcasting, internet radio, and all that. Plus, my internet connection is 30 a month and I get a lot more use out of it than HD radio can ever think of doing.

d'Eduardo,

IMHO - You just made the Case for Radio Being
a Licensed 24 Hour a Day Public Service which
allows Commerical Advertising from 5 AM to 9 PM
{16 Hours per Day} : With the Hours of 9 PM to
5 AM {8 Hours per Day} being "Commercial Free
Radio Hours".
* All Commercial Radio Stations would be
Required by Law to operate 24 Hours a Day.
* The Nation-Wide {Uniform} Commercial Radio
Licensing Model would be built on 18 Billable
Commercial Hours per Day.
* Like PBS and NPR Corporate Underwritters
could have a Public Service Message Minute
at the TOH {00} and BOH {30} during the
"Commercial Free Radio Hours".
* PSAs could run during the "Commercial Free
Radio Hours" for One Minute at the Quarter-Hours
{15 & 45}

i have a plan - turn the radio on and listen ~ RHF
.

Strange conditions last night on 75 meters as well as 40 meters. Seems like some sort of propagation event. I didn't get home until rather late and as soon as I turned on the radio I saw a lot of signals normally S9 plus 20 showing up at S6 etc. Didn't matter which of the 6 antennas I tried either. So its possible you received some Chinese skywave propagation. Rare but possible.

Possibly a Chinese station because some really strange conditions were on last night both on 75 meters but also 40 meter ham bands. Considering that we are getting longer nights in the Northern Hemisphere it is very possible. At 9 PM eastern here it would be around 8 am to 10 am local China time. Which would give the possibility of night path propagation. Especially considering that it might be coming over the North Pole into your station. It could always be a US based station or Canadian. Since you've tried several radios with similar results. It sounds not to be a receiver issue with images or something like that.

75 meters within a few hundred miles totally dropped out last night around 400 UTC and 40 meters was totally non existant. However, 160 meters was quite good and this morning quite a bit of long distance DX work between US and Australian stations is occuring. So perhaps the ionosphere is favoring long distance DX. Its about time as things have been dead here in the Midwest.

Definitely from the tailfin era. With its vacuum tubes, would probably
take a vibrator to power in a car. Probably not worth the trouble.

Certainly different. First is AW-toe. Second is AH-toh.

Look in the front of any paper dictionary for a prononciation guide to
the various vowel sounds.

They promise it's like regular radio only more and the people flee for
the exits. For 1/4th the cost of an HD radio you can buy a satellite
receiver and get 120+ stations, not just a handful. The monthly fee
is much less than the cost of buying music on CDs or ala carte
downloads.

Are you sure it isn't Toronto? (I guess I wouldn't doubt either one)

There certainly is plenty of Chinese on the domestic bands, (even here in
Nashville, on a FM station on weekends) just not on 650KHz!

Judging from nearly 30 years experience in MW DX and 20 years' membership in the National Radio Club, I think I can safely say it's impossible for someone in Kentucky to receive MW signals from China without a multi-thousand-foot Beveridge antenna and a communications receiver. (Drake R8 etc.)

Even with such an installation, the chances of getting audio from an Asian station in Kentucky are very close to nil. As in, I *may* have seen *ONE* report of such reception in my 20 years in the NRC. That, on a frequency clear of powerful nearby stations. 650KHz in Kentucky does NOT qualify as a "frequency clear of powerful nearby stations"!

I am >95% certain the original poster heard a spurious response - that the Chinese program was being broadcast on some other frequency, probably shortwave. Only other possibilities:

- A local pirate. (but 650 is the *last* frequency I'd choose for a pirate in Kentucky!)
- A local carrier-current station, probably at a nearby educational institution. (but see above!)
- A domestic station operating illegally after hours/on day facilities. (but none listed on 650 except a Boston-area station that shouldn't be strong enough to override WSM in Kentucky even if it was on with day power at night) (maybe a special program on a station whose format doesn't normally include Chinese? But none seem likely that close to WSM.)
- Cuba playing tricks? (but if it was Cuba I would expect other DXers to have heard & reported on this, especially as DXers are scouring the dials for IBOC interference this week and would have almost certainly have noticed anything interfering with WSM.)

He did NOT hear a broadcast from a transmitter in China. I'm certain of it.

Stations holding a Construction Permit may begin broadcasting upon receipt
of Program Test Authority. That authority doesn't show up in the CDBS
database or the AM Query derived from it.

So it is possible WHAN has completed construction of its 650KHz facility
and begun broadcasting, and it would be perfectly legal for them to do so,
assuming such authority has been granted.

That said, I haven't seen any DXer reports of WHAN on 650, and given the
concentration of DXers in that part of the country (and the number
monitoring WSM for IBOC interference) I'm pretty sure we'll know within a
day or two of when WHAN completes their move.

Marsha Clark virtually allowed the defense team to cherry pick
the jurors. Everything after that was a dog and pony show. The verdict
was "almost" a forgone conclusion. About the only thing that would have
made any difference is a live, unimpeachable witness to the crime, or
a video of same. Read Vincent Bugliosi's (i.e. Charles Manson) on
the subject, his view for the most part is the whole trial was a sham.
A dumbed down jury, bad presentation of evidence, allowing the
defendant to have access to evidence, (the gloves,, "If it dont fit, you
got to acquit") ,, not knowing the background of your witness's
(Mark Firmans racist comments he made in public,, on and on.
She lost that trial before it ever got started.

I show it as a CP, also. But it is possible it is active, since CPs go on the air and then apply for a license for the new facility... Since the person hearing Chinese on 650 wanted to know what the possibilities were, a recently activated CP is certainly one of them, particularly at that power level. The FCC database is full of active CPs that are on the air but waiting to be licensed. In fact, 1134 stations in the US hold CPs, about 8% of the total. Many are not noticed, as they are CPs for upgrades or changes... but all go through he same process of getting a CP, building, and then applying for a license.

My suggestion certainly beats the possibility that it was a fully readable mainland China reception, something unheard of, even with Beverage antennae, in the last 40 to 50 years in that area of the US.

Not in the slightest. I don't log onto the internet before I turn on my radio, and I doubt many people do. HD is a long range proposition, and is relatively on schedule from our perspective. A lot of parts have to come together for it to continue growing, like chips that are cheaper and allow portables, better HD-2 programming, interesting and useful text streams, a method to measure HD and HD2 channel listening (exists, but will not finish rolling gout to top 50 metros for 3 years), etc. In the meantime, about 96% of all Americans listened to the radio last week.

If you were about to commit engineers and money, would you do it for an unlicensed service that might change, or not be approved. Nobody important in radio and component manufacturer made any significant commitment to HD prior to the FCC approval just months ago.

Conceptually, HD goes back to the work done at AT&T Labs and Lucent more than 15 years ago... but it has only been approved for about 6 months, so the start date for all practical purposes was earlier this year. Companies like Samsung wanted FCC approval as well as an installed base of stations covering a significant portion of the US... at present, there is HD coverage of about 70% of the country, and virtually all the "good" facilities in the top 100 markets are on... that alone represents nearly two-thirds of the US population.

Shhhh. Don't say it out loud or they may get ideas. WSM is now just about at the bottom billing-wise in Nashville (one of the gospel daytimers outbills it by double) so something that made them real money might just happen. WSM is the lowest billing of all the old 1-A clears and nearly the lowest of all the 98 stations in the US that have 50 kw at night.

What kinds of comparisons do they do with your ginseng supplement?

But this is just something you said. He's interested in what he can
reasonably BELIEVE, and the things you say fall well outside of this
category.

Not true. The availability of portables was predicted well before
2006.

> In a luncheon address to the Program Directors and Managers I work with, in
> 2005, the CEO of iBiquity stated that there was no chip capable of portable
> usage and that there were no portables in the immediate future.

That's interesting because at a keynote address in December of 2004 he
said that portables would shortly be available.

This was the

Actually, not according to the CEO of Samsung, who predicts that their
chipsets will be among the most expensive.

Has anyone important in radio and component manufacuring made any
significant commitment to colloidal silver?

www.devilfinder.com Market Share WebTV
0.03 %

I own a very nice Velocity Micro tall desktop computer, it has a big window in the side of it, I can see everything in there I paid $1,330.00 for it, from www.velocitymicro.com www.velocitymicroblog.com in Richmond,Virginia about four years ago.I have/pay for all in one Trend Micro and a hardware router.I keep it updated, I never have any problems with it.I am thinking about getting Vista on there, I am not too sure about that yet.I still think Vista SUCKS! I turn it on and use it once in a while.I still like WebTV the bestest though.

That may be a while yet. If you look around on the Internet you will
find a transportable that can shuttle between car and home. This notable
development indicates a battery operated unit is still a long ways off
if it ever happens.

< Snip >

That's correct. The marketing bozos don't realize that HD, DRM or other digital modes will require a constant processing load in order for the receiver to function. This means there will be a constant demand for power from the batteries. One way that semiconductors can save power is by shutting down circuits from switching when they are not needed but that can't happen here.

I don't expect someone like Eduardo to understand the technical details of the hurtles that need to be overcome for HD portable development.

I expect Eduardo to have the first HD portable though. This portable will be held in one hand and his other hand will be used to pull the small cart with a diehard car battery to power it walking the streets of LA.
